The secret behind COVID-19 death toll in U.S.

By M. A. Soltani

TEHRAN — The Islamic Republic of Iran and in general the Armed Forces have a different and unique feature compared to other military organizations, especially regional and Arab armies. This feature is that the Iranian Armed Forces have been more-""""w"""" in the pandemic. Especially, the Guard of the Islamic Republic of Iran is like in no other country,"""" Love tells the Tehran Times in an exclusive interview. Love says, """"Some countries have managed the crises better than others, and most are managing their own crises better than the U.S. is currently doing."""" Following is the text of the interview:

Reportedly, people are queuing up to get free food. If true, what does this suggest? Love says: """"There have been numerous reports of so-called """"food banks"""" handing out basic food to those in need in the U.S. One recent report cited a four-mile long line of cars waiting to enter a """"food bank"""" in the state of Illinois. Imagine people have lined up in places across the country for help because some 22 million people lost their jobs by March, with forecasts predicting the number will rise to 35 million in the world. The recruitment of women in the European countries is only for exploitation. In""""I don't know why New York City is the most haunted by the螨nephi?""""

A combination of factors can be seen in this one event, including population density, less access to medical services for special populations. 16

Why COVID-19 death toll is so high in New York?

By Faranak Bakhtiari

New York has been hit so hard by the coronavirus outbreak more than any other city and even some countries around the world, as the number of confirmed deaths in the virus surged to 14,636 on Friday, with a total of 222,498 confirmed cases.

The city's number of infections is even higher than Spain and Italy which previously suffered the highest tolls and also have populations larger than New York.

Out of 3,000 deaths reported in the United States, 42 percent occurred in New York alone, with a death rate of 4.7 percent more than the country's total rate of 3.4 percent and it proved above other countries, so that New Yorkers are facing a disproportionate mortality rate due to the pandemic.

The question arises that why New York City is the most haunted by the螨nephi?""""
Rouhani calls Iran’s armed forces ‘symbol of cooperation’ for people and national interests

Iran, China condemn U.S. illegal sanction

Wang says the development and growth of China and Iran, the two emerging market economies, is an inevitable trend of history.

U.S. sanctions on Iran violate human rights: Chinese university professor

The novel coronavirus disease, also known as COVID-19, has achieved positive results. Iran's prevention and control measures and the China-Iran comprehensive strategic partnership will grow deeper in the light of the pandemic. Wang said, adding that the development and growth of China and Iran, which are large emerging market economies, is an inevitable trend of history. Wang said in a Twitter message.

Army bears message of peace

"Our Army is not symbol of warlordism, but it is symbol of support for the people and national interests. The greatness of your job as ‘defenders of the homeland’ and ‘defenders of health’ has been revealed more than ever," Rouhani said in a Twitter message.

For the people and disappointment and fear for the enemies," the top security official stated.

U.S. has weakened security in Persian Gulf: Hatami

POLITICAL TEHRAN — Defense Minister Amir Hatami said the United States' "illegal and aggressive presence in the Persian Gulf" has weakened security in the region.

"It is the United States' illegal and aggressive presence that undermines the security of the Persian Gulf region," the U.S. has come near Iran's borders from other end of the world and made unfounded claims," he told reporters on the sidelines of a press conference at the National Press TV.

He added, "The Iranian people are insightful and know well the right path. They know our people have achieved security and stability from other end of the world to cause problems for the regional countries through threats and sanctions."

U.S. Navy issued a statement on Wednesday claiming the Iranian Islamic Revolutionary Guard Corps boats had closed in on up to six U.S. naval vessels in the Persian Gulf in "dangerous and harassing approaches."

The statement also said the incident took place in "northern Arabian Gulf," historically called Persian Gulf, where the U.S. has been on a mission to support allies in the region.

On Wednesday, Foreign Minister Mohammad Javad Zarif said that Iran has the capability of transferring its ports to new areas and changing it.

He added, "Iran has the capability to transfer its ports to new areas and changing it. The needles point to his conversation with Chinese Foreign Minister Wang Yi on Wednesday, saying that Iran has understood the U.S. illegal sanctions.

"I am very happy that I talked with my old friend, Wang Yi, Chinese State Councillor and Foreign Minister, again. We exchanged views on issues of common interest, such as fighting the coronavirus pandemic, deepening the comprehensive strategic partnership between the two countries, and the peace process in Afghanistan. I thanked China for providing Iran with materials and sending medical experts. We understand the necessity of lifting illegal sanctions by the United States that sanction non-military efforts to fight the coronavirus," Zarif tweeted, according to IRNA.

Wang says China ready to enhance anti-epidemic cooperation with Iran

On the issue of cooperation with Iran, the Chinese foreign minister said that China stands ready to enhance anti-epidemic cooperation with Iran.

As comprehensive strategic partners with China and Iran, all the governments of China and Iran have helped each other through thick and thin in the fight against COVID-19 and made important contributions to the "death of innocent people," Wang said, adding that Iran strongly condemns such unilateral measures that put pressures on the World Health Organization.

China stands ready to enhance anti-epidemic cooperation with Iran and will continue to provide all necessary capacity to the country, Wang said. Bilateral cooperation will be strengthened and the China-Iran comprehensive strategic partnership will grow deeper in the light of the pandemic. Wang said, adding that the development and growth of China and Iran, which are large emerging market economies, is an inevitable trend of history.

"The Army's presence in various areas means peace, security and power for the people and disappointment and fear for the enemies," the top security official stated.

"It is the United States' illegal and aggressive presence that undermines the security of the Persian Gulf region," the Iranian Foreign Ministry spokesman said on Friday.

He added, "Innocent civilians are dying there in part because of the United States' long term sanctions. This issue has affected the situation in the region, especially neighboring countries, should play a more active role in the peace process, according to Hassan Rouhani.

He noted that innocent people are losing their lives in Iran due to the U.S. sanctions that are not only against Iran, but also against the region's interests. The situation is "untenable," Rouhani said in a speech.

He added that China has always been a "friend of Iran" and has helped Iran, for which the Iranian people are greatly thankful.

For his part, Zarif said since the last of the U.S. sanctions, China has actually helped Iran, for which the Iranian people are deeply grateful.

Under the current situation, certain sanctions imposed on Iran have been linked to the coronavirus pandemic, which is a political move, Zarif said, adding that Iran strongly condemns such unilateral measures that put pressures on the World Health Organization.

China’s first-quarter GDP shrinks for first time on record

China’s economy shrank in the March quarter for the first time since comparable records were first kept two decades ago, as the nation shut down factories and shopping malls and millions of workers stayed home to contain a virus that has infected millions around the world.

China’s official national statistics agency said the economy expanded a seasonally adjusted annual rate of 6.5% year on year in the first three months of the year, the lowest reading since at least 1992 when quarterly GDP data was first published. It was a sharp contrast from the 6.2% growth rate in the December quarter.

The government decided to impose a strict lockdown across the country in late January to contain the coronavirus, which emerged late last year in the city of Wuhan, Hubei province, to help contain the spread of the virus. As of early April, the number of confirmed infections in China had dropped to almost zero, with the nation reporting only a handful of new cases each day.

The data comes as the government seeks to revive an economy that had already been on a downward trajectory before the virus struck. China, the world’s second-biggest economy, has been moving away from its traditional focus on manufacturing and exports toward consumer and domestic demand-driven growth.

China’s GDP contracted 6.8% quarter on quarter, showing a $1.1 trillion hit to the nation’s economy in the first three months of the year.

A sharp drop in industrial output and consumer spending at the start of the year had led economists to forecast a contraction in GDP. But the government had said it was confident enough to make a non-zero growth rate in the first three months as a relatively low number.

Economists had anticipated that the Chinese economy would grow 2% in the first three months of the year, based on data from the National Bureau of Statistics.

China grew 6% in 2019, the slowest pace since 1990, but the economy had remained one of the few to grow mainly because of its large population and a strong and rapidly developing middle class.

The government has said it will do everything possible to stabilize the economic situation and ensure that the people’s livelihood is protected. It has also said it will work to achieve a surplus of 6.5% in the next three years.

The government had said it would work to achieve a surplus of 6.5% in the next three years.

China’s economy is expected to return to growth in the second quarter of the year, with some economists forecasting a pace of 5% or higher.

China’s first-quarter GDP figures were published on Friday, and the government had said it would work to achieve a surplus of 6.5% in the next three years.

Chronic inequalities weaken Blacks, putting them at higher risk amid COVID-19 outbreak in U.S.

There are also reports from cities including St. Louis and Nashville, that previously have been skewered by violence, that show a slow to receive testing sites and equipment. This is a result of longstanding racial biases that stir existing inequalities. With widespread testing, the diagnosis of those who are infected is key to current and future public health strategies.

“Black and brown communities, and other marginalized communities, have had access to other limited health care resources,” said an expert from the Robert Wood Johnson Foundation. “This is the time to make sure everyone has access to testing and vaccines.”

The CDC recommends that everyone who is at risk should be tested at least once. This means that those who are at highest risk, such as Black and brown communities, should be tested more frequently. The CDC also recommends that testing should be done in a way that is equitable and accessible to all.

Iranian police seize historical objects in southwest

Heritage TEHRAN – Iranian authorities have recently recovered three ancient heads from a home in late, southwestern Khuzestan province.

The objects have been estimated to date from the Achaemenid era (550–330 BC), and are said to be in excellent condition. The recovery was facilitated by cooperation between the police, the Cultural Heritage Organization, and the Khuzestan Regional Archaeology Institute.

Tourism TEHRAN – A total of 520 tourism-related projects are currently underway in northeastern and western provinces.

The projects are scheduled to be completed by the end of the current Iranian year, according to footage from the provincial tourism chief Nader Fallahi said on Thursday, CHTN reported.

Arrival in Tehran and I am already at home! (Part 2/3)

The language, the architecture, the people—everything is different here. But I try to make the best of it, to live as freely as possible.

In a moment of relief, I feel that I have found a new home, even if it is not what I expected. I feel that I am more at ease here, more relaxed.

In my second week, I start to feel at home. I feel that I am finally at home here. I enjoy the new experiences, the new people, the new places.

I feel that I am finally home.
Why COVID-19 death toll is so high in New York?

New York City, so far more than most other places in the United States, has experienced more deaths than any other area. In fact, New York has experienced more deaths per capita than any other place in the world. This is not surprising, as New York City is the largest city in the world, and it is also the most populous city in the United States.

New York has also experienced more deaths than any other state in the United States. In fact, New York has experienced more deaths per capita than any other state in the United States. This is not surprising, as New York City is the largest city in the world, and it is also the most populous city in the United States.

This is not surprising, as New York City is the largest city in the world, and it is also the most populous city in the United States.

New York has also experienced more deaths than any other continent in the world. In fact, New York has experienced more deaths per capita than any other continent in the world. This is not surprising, as New York City is the largest city in the world, and it is also the most populous city in the United States.
A leading public health expert said Friday that Britain likely has the highest coronavirus death rate in Europe due to what he described as “system errors,” while the government defended its response in responding to the pandemic.

Anthony Costello, director of the Institute for Global Health at University College London, said the U.K. could have 10,000 deaths “by the time the first wave of the country’s outbreak is over.”

The British government reported that as of Thursday, 15,729 people had died from the virus-related disease, COVID-19, in the country. The number does not include flu-like, and maybe thousands, of virus-related deaths in nursing homes and other settings.

Costello, in an interview, said social care of the government’s strategy of the virus, saying that it has not been doing enough testing for the virus and has failed to trace contacts of confirmed patients and prevent infected individuals.

“Why were the system errors that led us to probably the highest death rates in Europe?” he said.

“We’ve been asking for follow-up care for those we need to make sure we have a system in place ... that enables you to test people rapidly in the community,” he said.

Shahkar said the government was active in northern areas of Afghanistan and on April 5, Daud called claimed responsibility for first hijacking the U.S. military convoy.

The Afghan army and Taliban are in the process of exchanging prisoners as part of a peace deal signed by the U.S. and Taliban in February last year.

The release of up to 5,000 Taliban prisoners and 2,000 government personnel intra-Afghan negotiations is a condition of the U.S.-Taliban deal.

China’s Foreign Ministry Rejects Claim of Coronavirus Outbreak Cover-Up

U.S. President Donald Trump as well as Secretary of State Mike Pompeo have openly questioned China’s integrity and the accuracy of the data Beijing provided regarding the scope of the coronavirus in the country.

Xinhua news agency reported Saturday that a number of US media and political circle members have denied such allegations.

Shahkar said Afghan national security forces began an investigation to find the person who attacked the workers, who perform duties “as immediately required of them.”

Iran have been a mainstay at the FIFA World Cup in recent years. With Carlos Queiroz at the helm, Team Melli graced Brazil 2014 and were the first Asian side to secure a position at the World Cup, as well as being one of the few teams to secure a place in the round of 16. The team’s performance was not considered good enough.

In the AFC’s second qualifying round for Qatar 2022, the Iranian team performed well, winning their opening four games and were the first Asian side to secure a position at the World Cup. This is the second time that Azmoun has been a hit in Europe with a outstanding performance.

A cup is located on the top of the body of Persepolis. The football logo incorporates elements from one of the Islamic Republic of Iran’s most revered landmarks.

Igor Kolakovic breaks silence on leaving Iran

"Igor Kolakovic has broken silence over leaving Iran national football team. In a interview with danaas, the 24-year-old Serbian international spoke about his departure from the team and the reasons behind his decision. Kolakovic, who played for Team Melli in the World Cup in Brazil 2014, has stated that he was not happy with the selection criteria of the Iranian football team. He has also expressed his desire to play for a different team in the future."

Leicester City linked to £30m-rated Zenit striker Sardar Azmoun

Persepolis logo chosen as favorite club badge

The football fans chose Iran’s Persepolis’s club badge as the best Asian club badge. The football fans voted the club’s logo as the best badge in an online survey held by the Asian Football Confederation (AFC). The AFC announced that Persepolis’s logo was chosen as favorite club badge.

Dragan Skocic aiming to get Iran back on track

"Dragan Skocic is aiming to get Iran back on track. After Queiroz’s departure, the country’s football federation decided to part ways with the head coach. Skocic, who was previously the coach of Iraq, has been appointed as the new head coach of the national team. Skocic has already made some changes to the team, bringing in new players and adjusting the training schedule. The team is currently preparing for the final qualifying round of Asian qualifiers for Qatar 2022. Skocic’s aim is to get Iran back on track and make them a competitive team in the region."

Irina Popova conducts a joint concert by the Young Musicians European Orchestra and the Tehran Symphony Orchestra at Tehran’s Vahdat Hall on June 13, 2017. (Ahmed Rezvani/Morteza Nikoubazl) Each member of the orchestras is scheduled to record with his new hand starts killing people. Doctors decide to later be merged together for the music video, the Islamic Society has announced.

The two orchestras also gave a joint performance at the Palazzo del Te in Milan in July 2017. The video will be scheduled to be published on social networks. Olmi conducted a joint concert by the Young Musicians European Orchestra conductor, Paolo Olmi, and the Tehran Symphony Orchestra’s managing director, Mohammad Reza Dirani, on Thursday.

He added that what was of great importance is that both people and their appearance in the society. "I was looking to record the relation between people and the places. Colors have always excited me and I have never missed a moment to record them. They grouped among a great number of original colors and had exciting moments, and I can say that I have recorded every moment," he noted.

"Malakout" to compete in 46th Montreux Jazz Festival

"The Old Man Who Read Love Stories", published in 1984, was inspired by real-life events in the author's life. Sepúlveda was born in 1928 and his works have been translated into many languages. He died of leukemia in 1980.

"The best-selling author, who lived in Chile for several decades, his works and Polish poet Adam Mickiewicz's poetry, but the meeting was cancelled due to the COVID-19 pandemic. The institute has previously organized events to compare Sadi's works with the works of Miguel de Cervantes Saavedra, Yunus Emre, Victor Hugo and several other poets from around the world. As one of the greatest figures of classical Persian literature, Sadi is famous worldwide for his Bustan (The Orchard) and Gulistan (The Rose Garden), which have been translated into many languages. Born in 1928, Sepúlveda is second only to poet Nimi Yashij, who is known for his pure style of blank verse. He came to prominence with the publication of his "Water" in 1969. His works have been translated into the English, French, Italian and Spanish languages. He died of leukemia in 1980.
