In addition, the Neyshabur Office of Trade and diplomacy in Iran. Now, it is one of Iran’s top tourist destinations for good reason: it’s filled with many architectural wonders such as unmatched Mosques, buildings, museums, Persian gardens and tree-lined boulevards. 

The astonishingly high prices come despite the fact that the industry minister and chairman of the National Competition Council had announced, earlier this year, a new formula for car pricing, promising that prices will probably drop by 30 to 40 percent.

Several organizations have blamed rising prices on "organized brokerage", while those active in the car market believe the closure of some representative dealerships offices to be the main reason for this situation: others believe that the recent rise in prices is due to general inflation.

Whatever the reason, the question is what the government should do to calm the turbulent market and pull the prices back to a normal level.

The reasons

The explanation of the output of the country’s major automakers has been pointed as one of the main reasons for the recent price hike.

Some experts also believe that the surge prices for some auto models following SAIPA Group’s Pride - which was traded in late April - were only valid on paper and cars were not actually traded at that price in the market.

In late April, Sassed Motamednia, the president of Tehran’s Auto Dealers and Insurance Bodies, told IRNA: “When there is little supply from carmakers, people who have already bought a car as investment become the main players in the market and they are the ones who determine the prices (at least in our paper).”

According to Motamednia, in the first two months of this year, auto prices, as in previous years, are pursuing a strategy for raising prices by dintional reduction of supply to the market.

“Contractor and supervision on the auto dealerships companies and agents, and price the car the official and impose their prices on the market.”

Iranian diplomat says INSTEX is not enough

The statement was delivered by the Iranian Foreign Ministry and was published in the International Daily.

The tweet highlighted the need for the international community to support the Palestinians and condemned Israel's actions.

The tweet read: "The Palestinian cause is an international cause. The international community must take action to support the Palestinians and condemn Israel's actions."
Javad Zarif has likened Washington’s disinfectant idea, continued to say, “You see it or almost a cleaning,” the president said. “We’re going to have to use a mechanism embedded within the agreement to make the UN maintain an arms embargo on Tehran.”

U.S. Representative for Iran Brian Hook also told reporters, “We are operating under the assumption that we will be able to return the arms embargo.”

In similar remarks earlier on Thursday, Zarif said that making “foolish” claims by U.S. officials is nothing new. Referring to Zarif, Sarah said, “It is not unexpected if these people are going to stretch out arms and lift the embargo. We are still waiting for the U.S. response.”

Observers say the United States would face a messy battle if it tries to trigger a return of UN sanctions. The administration has started a new round of UN Security Council resolutions that would impose sanctions against Iran. The United States has invited the United Nations’ Security Council to impose sanctions against Iran.

Such a crisis could provide the Trump administration with an opportunity to negotiate a better deal with its long-suffering Iranian people. The American non-kinetic tool of foreign policy. Sanctions, like antibiotics, are the only way to help Iran.

The administration should stop using its non-kinetic tool of foreign policy. Sanctions, like antibiotics, are the only way to help Iran. The Trump administration has been directly involved in terrorist activities worldwide; and to block its menacing activity.

Pompeo’s order to launch the cost to extend a UN embargo has been supported by Iran’s hardline forces. Iran has been directly involved in terrorist activities worldwide, and to block its menacing activity.

The Leahy Amendment was not adopted at the UN Security Council. The United States must continue to support its hardline forces. Pompeo’s order to launch a UN embargo has been supported by Iran’s hardline forces. Iran has been directly involved in terrorist activities worldwide, and to block its menacing activity.

Iran’s turbulent automotive market: will prices calm down?

By Chris Bailey, European Market Correspondent

Teheran

Another high volume of steel ingots is expected to go on auction this week, with many industry players concerned about the sustaining of prices.

Iranian authorities have announced plans to auction a third of the total ingot production this month, after a rally since mid-March, also reflected growing concerns here in Europe that the market is the very basic duty of any government, so that should not be neglected as well.

According to Mohammad Rastad, the damage to the Iranian cargo ship that collided with the US oil tanker, has already come true.

Iran Denies Collision of its Tanker with US Ship in the Strait of Hormuz

The report also said that major steel producers have produced 1577 thousand tons of steel ingots during the first Iranian calendar month of Vordashri (March 20 - April 19), which accounts for 5.4 percent of the planned 33 million tons output. The figure shows a monthly growth of one percent.

Iranian Development and Industrialization Organization (IMIDRO) has put the value of the projects to be announced this year in the country at 873.4 billion Tomans in the past year at 873.4 million.

Iranian government has announced that production of crude steel in the country in March 2020 to March 2019, and save the ship.

According to the global organization, Iran produced 21.5 million tons of crude steel in 2019, while the figure was 24 million tons in 2018.

The WSA report, which is on steel production and trade, projects the output to be 2.8 million tons in March. WSA has previously announced that Iran’s crude steel production climbed 39 percent in 2019 while the average global growth in this period stood at 3 percent.

According to the global organization, Iran produced 21.5 million tons of crude steel in 2019, while the figure was 24 million tons in 2018.

The World Steel Association (WSA), in its latest report, IMIDRO has also announced that production of crude steel in Iran has increased by 8 percent in March 2020 from March 2019.

Reducing South Pars overtake time Iran over $55m

Oil prices jumped more than 3 percent on Friday, touching more than one-month highs as signs that demand for crude worldwide will increase next month sent renewed demand after lockdowns imposed to prevent the spread of the coronavirus outbreak

The country processed a total of 3.83 million barrels of oil last month, according to South Pars Gas Complex.

The country's gasoline and diesel consumption is expected to pick up in the second half of the year as the world gets back to normal, and travel restrictions are further reduced.

The crude oil prices in April are expected to be around 3 percent higher than the February levels. The market in time will take care of itself, but there is a lot of uncertainty that the path to the next normal is not a straight line.

The margin for new oilfield projects is still below $40 per barrel, the commission chairman said.

The crude oil price fell to below $20 a barrel in March, and is expected to stay low if the economic outlook is not improved.

The IEA estimated that crude oil output from OPEC countries in May was down 6.0 million bpd from April and total output from the OPEC+ cartel was down 11.2 million bpd from April.

The agency revised up its oil demand forecast for 2020 to 9.7 million bpd in May and June, as a gradual easing of COVID-19 related travel restrictions and modest signs of improving demand.

The Paris-based agency revised its oil demand forecast for 2020 to 8.8 million bpd in May and June as a gradual easing of COVID-19 related travel restrictions and modest signs of improving demand.

The IEA estimated that crude oil output from OPEC countries in May was down 7.9 million bpd from April and total output from the OPEC+ cartel was down 12.2 million bpd from April.

INTERNATIONAL TENDER No: 99/103-04/03

Subject of Tender:
Broadcasting the TV network of Hispan TV on Hispasat 1E Satellite (Latin America) for three years in accordance with the technical specification and other terms and conditions mentioned in the tender documents.

Deadline and how to receive the tender documents:
From Sunday 17 May 2020 (1399/02/28) until Wednesday 20 May 2020 (1399/02/31) by 04:00 p.m. with presentation of introductory letter by company or its representative and the receipt of paying the documents fee.

Place of receiving the tender documents:
Interested participants may refer to purchasing (KALA) Dept., 4th Floor of IRIB Administration Complex, Hotel Esteghlal, St. Vali – Asr Ave, Tehran, Iran

Tender Holder:
ISLAMIC REPUBLIC OF IRAN BROADCASTING (IRIB)

Deadline and how to receive the tender documents:
From Sunday 17 May 2020 (1399/02/28) until Wednesday 20 May 2020 (1399/02/31) by 04:00 p.m. with presentation of introductory letter by company or its representative and the receipt of paying the documents fee.

Place of receiving the tender documents:
Interested participants may refer to purchasing (KALA) Dept., 4th Floor of IRIB Administration Complex, Hotel Esteghlal, St. Vali – Asr Ave, Tehran, Iran

The fee of the tender documents and how to deposit it:
Submission of payment receipt for the amount of 1,000,000 Rials to account 4101029171204273 with BIC No: IR 310100004101029171204273 IRAN Central Bank in the name of IRIB.

Type and amount of guarantee for participation to tender:
The amount of deposit for participant in tender is USD 38000 fixed or its equivalent in Rials 6270000000 which should be in the form of Bank Guarantee.

Time and place of delivering Bidding Envelopes:
The sealed packages/envelopes should be submitted no later than 09:00 a.m. on Saturday 20 of June 2020 (1399/03/31) and at the address mentioned in 4th clause.

Time and place of opening Qualification Evaluation envelopes:
The date of opening the Qualification Evaluation envelopes is on Saturday 20 of June 2020 (1399/03/31) at 10:00 a.m in the office of International Purchasing.

Time and place of opening Envelopes:
The envelopes A of those eligible participants who meet the qualification criterion and approval of Technical and Commercial committee will be opened on Sunday 21 June 2020 (1399/03/01) at 02:00 p.m in the office of Financial Vice President. In case of complete content in the envelopes A the envelopes B and C of eligible participants will be opened at the same time and place.

It's a city for walking, getting lost in its maze-like bazaars, enjoying beautiful gardens, and meeting people.

The city has long been nicknamed as Nfeel-e-Jahan which is translated into “half the world”; meaning, seeing it is relevant to seeing the whole world. In its heyday, it was also one of the largest cities in the region with a population of nearly one million. Isfahan is renowned not only for the abundance of great historical bridges, but also for its ‘life-giving river’, the Zayandeh River, which has long bestowed the city an original beauty and a fertility. The cool blue tiles of Isfahan’s Islamic buildings, and the city’s majestic bridges, contrast perfectly with the encircling hot, dry Iranian countryside.

The huge Imam Square, best known as Naghsh-e Jahan Square (literary meaning “image of the World”), is one of the largest in the world (500m by 950m), and a majestic example of open planning. Built in early 17th century, the UNESCO-registered square is punctuated with the most interesting sights in Isfahan. Modern Isfahan is now home to some heavy industry, including steel factories and a nuclear facility on its outskirts, however its inner core wants to be preserved as a priceless gem.

Over 100 relics restored in Chaharmahal-Bakhtari

Nowadays, chogan is played in Iran, Tajikistan, Uzbekistan and Azerbaijan. Polo was invented and first played in Iran (or ancient Persia) thousands of years ago. The original name of polo is ‘Chogan’ and in Iran the game is still referred to as ‘Chogan’. From its original Iran in Persia it spread to Constantinople, and eastward through the Baptisten and Afghanistan to Tibet, China, and Japan, and from Tibet to India, where it flourishished throughout the Mogul (Mughal) dynasty. The word “polo” comes from the Tibetan word for the willow root from which polo balls were made of, which is “Pala”. Polo is said to be the world’s first team sport, the world’s first ball game, and today is recognized as the world’s fastest team sport and ball game. The first recorded game took place in 1295 on the banks of the Indus River in Zanjan, a city in northwestern Iran. The game was popular among generals, warriors, princes, and kings as a means of training cavalry for warfare.

The projects will be inaugurated by late August, provincial tourism chief Hafizi said.

Moreover, six historical monuments, including Khan Bathhouse, Sar-Aqa Seyyed village, and Hafizi mansion, which are related to the gates of the Chogan field, one of which has inscriptions in Persian, Qasemi added.

He also noted that with the completion of this project, Iran’s tourism industry’s ability to attract tourists will be increased to 50 tons, according to official statistics.

The projects, which include two roadside welfare services in Zanjan city, a roadside welfare service and an eco-lodge unit in Zanjan city and an eco-lodge unit in Mahshahr city, will be implemented by the private sector, he added.

Also, it was noted that with the completion of this project, Iran’s tourism industry’s ability to attract tourists will be increased to 50 tons, according to official statistics.

Situated some 70 km to west of Mashhad, Neyshabur was founded in the thirteenth century. However, its origin is disputed, as it has been derived from its alleged founder, the Sassanid king Ardashir I (180-242 CE), who reputedly ordered the construction of two gates, one of which is the remains of an ancient city gate. The city was founded during the Sassanian period, and was granted city status in the eleventh century. The city flourished under the rule of the Seljuk sultans, and was later destroyed and rebuilt during the Mongol invasions.

The official, however, did not refer to the exact age of the relics. The unearthed architectural elements include four standing stone pillars, one of which has inscriptions in Persian, Qasemi added.

Neon waves caused by algae make ocean glow in California

A mesmerizing natural light show has been glowing along the shores of Southern California. The phenomenon is caused by colonies of algae, simple plants that live in water, which bloom in March along the southern coast of counties from Baja to Los Angeles. During the day millions of algae, called dinoflagellates, appear as a reddish-brown colour on the ocean’s surface known as a “red tide” and give off an unpleasant, sulphur-like odor as they decay.

“Red tide” pops up all over the world but not quite like this one, Ebrahimi said, adding that when it does it can be a serious risk of disappearing.

Rainfall in Iran 33% higher than long-term average

The average long-term rainfall in Iran’s province is reported to be 15.2 cm, which shows that this year’s precipitation has increased by 25% compared to the average. Almost all the provinces experienced increased rainfall compared to the average, except for Chaharmahal-Bakhtiari, Khouzestan, Hormozgan, and Kohgiluyeh-Boyerahmad.

According to Hossein Ali Ebrahimi, head of Mazandaran province department of Economic Affairs and Finance, the methods that are diagnosed with coronavirus in Iran reached 16,653 on Friday, of whom 6,902 have died and 8,751 have recovered.

Measures to revive Lake Urmia an example to inspire us all: Gary Lewis

“Share with us your stories of how to save nature in your home, at work, in your community,” he said.

“...Some red tides produce dangerous toxins which can be deadly to mammals and fish but the California algal blooms are not poisons, instead acting as a food source.

Thousands of tonnes of ocean microplastics blowing away every year

Hundreds of thousands of tonnes of ocean plastic pollution could blow back to shore with the sea breeze every year, according to new research.

Researchers discovered that microplastics could be ejected from the oceans if the wind is strong enough to blow it into the atmosphere and blow the wind back onto land.
Israel sees Syria as existential threat: Nasrallah

Israeli authorities believe there is an existential threat to the Tel Aviv regime from Syria, particularly in light of the presence of fighters from Hezbollah and Iranian military advisors there; the Security Council of Lebanon’s cabinet, however, said in its statement, “Israel sees Syria as a danger and the country plays a role in the existential threat perceived by Israel. Israel has nothing to do with the infringement government of Damascus and its sympathizers who do not court dominance there.”

“We know that Hezbollah’s involvement in Syria’s war would have deep repercussions,” Israeli Prime Minister Benjamin Netanyahu said. “In that case, we believe we would be indirectly defending Syria and Palestine at the face of the U.S. scheme.”

Israel has been accused by the United States and the United Nations of violating the United Nations Security Council resolution 2231, which calls for all countries to refrain from any “direct or indirect assistance” to Syria and “to monitor and deter violations of the arms embargo.”

Israel has denied any involvement in the situation in Syria and said it would not be the first time that its military would be involved in the conflict. Netanyahu has previously said that Israel would not tolerate a “terrorist state” in the region and would not hesitate to act in Syria to prevent the spread of terrorism.

However, Israel’s military actions in Syria have been met with criticism from the international community, including the United Nations, which has expressed concern that Israel’s actions could escalate the conflict and lead to a larger war in the region.

As a result, Israel’s actions in Syria have been a source of tension between Israel and other countries in the region, including the United States, which has called for a de-escalation of the situation.

A different Ramadan for U.S. Muslims amid Coronavirus lockdowns

The U.S. Arab and a number of its regional allies launched the devastating war on Yemen in March 2015 in order to bring back into line the Iranian-backed Houthis in the country. The war resulted in the world’s worst humanitarian crisis.

The U.S.-led coalition, which includes the United States, Saudi Arabia, the United Arab Emirates, Bahrain, Egypt, France, Italy, the United Kingdom, and Qatar, has been accused of violating international law and committing war crimes.

The coalition has been accused of intentionally targeting civilians and civilian infrastructure, as well ascluster bombing and using white phosphorus in attacks.

The coalition has also been criticized for its failure to hold its partners accountable for their actions and for not taking steps to prevent or respond to violations.

Instead, the coalition has been accused of actively facilitating war crimes and of hindering efforts to investigate and bring perpetrators to justice.

The coalition has also been criticized for its failure to provide adequate protection for civilians and for not taking steps to prevent or respond to violations.

In addition, the coalition has been accused of using blocked aid and resources to support its partners, including the Houthis, and of failing to provide adequate protection for civilians and for not taking steps to prevent or respond to violations.

Iran have two direct slots in 2021 ACL

Four Iranian legends among Asia’s greatest Bundesliga players

Four Iranian football greats are among the top ten best players of all time by AFC, the best players ever who played in Germany’s Bundesliga.

The Football Confederation (AFC) has conducted a poll to determine Asia’s greatest Bundesliga player. The poll is available on the official website of the AFC and football fans can pick their favorite player from a shortlist of ten players.

Ali Daei, Mohboul Mahdavikia, Ashkan Dejagah, and Vahid Hashemian are the Iranian nominees in the list along with other stars such as Cha Bum-Kun, Hwang Sun-Ho, Son Heung-Min, measure, and Yasuhiro Nakamura, Shinji Kagawa, and Makoto Hasebe, among others.

For more than 40 years, Asian players have started in Germany’s Bundesliga. From pioneers like Okudera and to modern icons like Mohboul Mahdavikia and Kagawa, some of Asia’s greatest footballing names have been made not only in national teams but also in packed stadiums from Bremen to Bayern. However, we choose to name the players as follows:

**Mohboul Mahdavikia (IR)***
- Clubs: VfL Bochum, Hamburger SV, Eintracht Frankfurt
- Games: 253
- Goals: 26
- Honors: AFC Player of the Year (2005), Hamburger SV Third best foreign player in Germany (2006)

*Introduction to German football by Bochum*:
The 2004/05 ER Fais’s appearance at the 1998 FIFA World Cup, it was Mahdavikia’s 16 league goals during the season that earned him the best ever save in AFC Champions League competitions.

*Vahid Hashemian (IR)*
- Clubs: Hertha BSC, VfL Bochum, Bayern Munich, Hannover 96 Games: 438
- Goals: 38

*In the xylophone and beyond*:
Vahid Hashemian was born in 1982 in Tehran and raised in Berlin. Born in 1990 and played for four clubs, including nine league appearances for Hamburger SV as the best foreign player during his time in the Bundesliga. Hashemian’s 16 league goals during the 2004-05 campaign took him to fourth on the scoring charts and helped Bochum to fifth on the table equation. – equating their best ever Bundesliga finish.

*Al Duf (IR)*
- Clubs: Armenia Bifold, Bayern Munich, Hertha BSC
- Games: 107
- Goals: 19

*Famous in the world*:
While he wasn’t as prolific in the Bundesliga, Al Duf was a professional in the club from 2004-05. He played for four clubs and won the league title in 1999 and secured both AFC and China’s double league titles in 1993-94. He was part of the same season’s UEFA cup’s best ever performance in the Champions league.

*Ali Rezaie (IR)*
- Clubs: Esteghlal, Persepolis, Sepahan, Foolad
- Games: 253
- Goals: 26
- Honors: Persepolis goalkeeper Alireza Beiranvand, who saved Al Sadd captain Xavi’s header, came second with 25 percent in the ‘5 of 5’ category.

The 55-year-old coach will be assisted by Dominik Kwaśniewski in his new team.

The 2021 AFC Champions League will represent Iran in the current season of ACL.

Perserolei offered Amr Abdazied

Perserolei football club in Al Ain has offered the chance to sign former goalkeeper Amr Abdazied, who was雪山在德黑兰。Amr Abdazied has had a contract with Belgian football club Antwerp and will leave Persepolis at the end of this season. Perserolei will be Persepolis No. 1, in the next season’s AFC Champions League competitions.

It was rescheduled after the coronavirus pandemic worsened across the world, with the Olympics now set to run from July 23 to August 8, 2021, followed by the Paralympics from August 23 to September 5.

Iranian, Russian centers to discuss man’s place in Safavid paintings

In a message published on Thursday, government spokesman Ali Rabiei also称赞ed Ferdowsi’s work on the Persian identity and the creator of a common pantheon among Iranians.

In a statement, the literati, poets, painters, musicians and architects are those individuals who make our history and national identity, rather than the warriors, governors or the conquerors,” he said. His stories and heroes enliven our social and cultural lives and form the meaning of “we”, he added.

Mumbai (Reuters) — Bollywood is huge draw for India’s subcontinent, West Asia, Central Asia, Afghanistan and Persian Language and Literature, also sent a video message.

“His stories and heroes enliven our social and cultural lives and form the meaning of ‘we’,” he said.

CURLTURE

In addition, the academy invited 25 masters of miniature who together created 30 miniatures, which were first displayed at the Folks Art and Cultural Institute in Tehran on April 11.

The drive-in is giving indie films and drive-in theaters a new boom, a new direction, the bandwagon effect. Indie films and drive-in theaters don’t usually go together. Drive-ins need the big movies, the A-listers, the action, the spectacle, the high production values. Indie films are smaller, more intimate, more personal. But drive-ins can accommodate indie films and offer a unique experience.
