UAE finances PKK terrorists in northern Iraq

A report says the United Arab Emirates has allegedly provided financial support to the anti-Turkey PKK militant group in Iraq's northern semi-autonomous Kurdistan region.

A security source at the Kurdish Regional Government (KRG) told the London-based al-Araby al-Jadeed newspaper that the authorities had imposed limitations on money transfers coming from the UAE. The source said any money transfers exceeding $5,000 coming from the UAE to the region's foreign exchange companies and banks required a “proof of approval” from security authorities.

British consuls’ review of Iran economy in 19th century published

TEHRAN — A book containing the British consuls’ review of Iran economy during the 19th century has recently been published. "The Economy of Iran in Documents from the 19th Century" has been authored by Ahmad Mozafari, a course leader and lecturer in political economy at the New College of the Humanities in London.

The next issue of the Tehran Times will be published on Saturday, June 20.
Turkish officials.

Several weekend-long protests against the Turkish government were being reported in Istanbul and other major cities. The protesters were angry over police brutality and the lack of accountability for those responsible.

A new round of negotiations between Iran and the United States in Vienna has been postponed indefinitely. The talks were expected to resume this week, but have now been pushed back to next month.

The United Nations has condemned the use of force by security forces in Iran, following reports of clashes between the armed forces and protesters.

Over 21,000 Iranian lawyers condemn U.S. sanctions as violation of human rights

The statement, signed by 21,333 lawyers and legal experts, argues that the U.S. sanctions are a violation of human rights, calling on international organizations to strongly counter such measures.

The statement criticizes the U.S. sanctions as a violation of the international nuclear deal, saying they are aimed at destabilizing the region.

The statement also mentions the case of Iranian guards who were killed by a drone strike in the Strait of Hormuz, and demands accountability for those responsible.

Iranian media has been critical of the U.S. measures, calling them illegal and unjustified.

The U.S. has repeatedly condemned the Iranian regime, accusing it of violating human rights and supporting terrorism.

The European Union has also expressed concern over the U.S. sanctions.

A number of international organizations have called for an end to the sanctions, including the International Committee of the Red Cross, the International Federation of Human Rights, and the International Union of Jurists.

The U.S. has continued to impose sanctions on Iran, arguing that they are necessary to prevent Iran from developing nuclear weapons. However, the Iranian government has denied these claims.

The situation in Iran remains tense, with protests continuing in various parts of the country. The government has accused the protests of being instigated by foreign powers.
Iran's 5 countermeasures to an arms embargo

By Fatemeh Bahrami

Iran has five options on the table to counter the U.S. plans to lift an arms embargo on Tehran, which will allow the United States to sell arms to other countries against Iran.

As the time for the removal of the arms embargo approaches, Iran is trying to create obstacles and prevent the normal operation of the embargo both in the global arms market. However, the fact of the matter is that Iran's hands are not exactly tied in this situation.

Last year, the U.S. Secretary of State Mike Pompeo, who had worked hard to get Iran out of the country and also imposed maximum pressure on the country, failed to achieve any of his goals in the U.S.-Iranian nuclear deal known as the JCPOA.

In the first interview he gave after the JCPOA was signed, which was during the tenure of former President Hassan Rouhani, in a letter to the UN Secretary-General Antonio Guterres, the former UN secretary-general said: "Iran's nuclear program has a peaceful character and is in line with the three main principles, and that the International Atomic Energy Agency (IAEA) inspection system is in place, and that Iran is not seeking nuclear weapons."

However, in 2019, President Donald Trump withdrew from the JCPOA and imposed sanctions on Iran, which led to Iran's decision to breach certain of its commitments under the deal.

After the U.S. withdrawal from the JCPOA, Iran's change of attitude in the nuclear field was in line with the JCPOA and the provisions of the JCPOA. However, the U.S. administration imposed sanctions on Iran and threatened to use military force against the country.

In this regard, the Iranian Foreign Ministry spokesperson has repeatedly said that Iran will counter the U.S. pressure and will not allow the U.S. to impose any restrictions on Iran.

Iran's five countermeasures to the U.S. plan to lift the arms embargo are as follows:

1. **The JCPOA**
   - Iran has already implemented the JCPOA in a comprehensive manner and has taken all the necessary steps to ensure that the U.S. sanctions do not affect the implementation of the JCPOA.

2. **The Additional Protocol**
   - Iran has signed the Additional Protocol voluntarily under the JCPOA, which means that Iran is not forced to implement it. However, Iran has implemented the Additional Protocol pursuant to the JCPOA.

3. **The National Security**
   - Iran's National Security and Foreign Policy Committee has approved the Additional Protocol, which means that Iran is not forced to implement it.

4. **The International Atomic Energy Agency (IAEA)**
   - Iran has implemented the IAEA inspections system in a comprehensive manner, and the IAEA has verified that Iran is not seeking nuclear weapons.

5. **The JCPOA's Spirit**
   - Iran has implemented the JCPOA's spirit, which means that Iran has not breached any of its commitments under the JCPOA.

In conclusion, Iran has five options on the table to counter the U.S. plans to lift the arms embargo on Tehran, which will allow the United States to sell arms to other countries against Iran.
According to Lahouti, the Ministry of Industries, Mines and Agriculture has been targeting 15 neighboring countries for non-oil exports in the current year, and the diversification of the target markets has not changed much. Iran is to launch a joint chamber of commerce and industry office in Syria.

Excluding in his remarks, the Export Confederation head said Iran Chamber of Mines, Industries, Agriculture and Agronomy (CCIMA) has purchased a building in Syria and has signed an agreement with the chamber of commerce in the Arab country.

“Naturally, by launching the Iranian Chamber of Commerce office in Syria, we can expand exports and investments in this country,” he said.

“In the future, a market opens and conditions return to normal, we will see new opportunities and Iran is able to increase non-oil export to the country, as well as in other countries. Iran’s markets are ready, but infrastructure must be improved to make this happen,” Lahouti emphasized.

The U.S. is not running the IMF, and the manage ment of it is an important issue. We have our own work and ensure that the IMF delivers on its mandate. But we are also in talks with the IMF and WTO, who should stay away from politics and deliver on their promises and commitments,” he added.

The U.S. approach toward Iran’s revised nukes deal evoked reactions from other countries, as strongly made by these states.

Steel ingot output rises 4% in 2 months on year

The project inaugurated in a 15,000-ton and 12-ton total capacity Iran’s new steel ingot production line in the country’s steel sector.

The official noted that Syria is also a good market for joint ventures, but the lack of sanctions and technical cooperation between the two countries can expand exports and investment in this sector.

Some 1.11 trillion rials ($26.4 million) plus $118 million have been invested in steel ingot production in Iran during the first two months of the current Iranian calendar year (March 20-May 20).

According to Lahouti, the country’s production of steel ingot has reached 4.697 million tons during the first two months of the year, which is four percent higher than the same period in the past year. IRNA reported citing the data released by the steel industry officials.

Steel ingot production at the 12-ton in the two-month period of this month, which was two percent more than that of the same period in the previous year.

The major part of Iran's red meat imports comes from countries like the U.S. and Australia, mainly due to the previous and their positive performance in the market.

Steel ingot production at the 12-ton in the two-month period of this month, which was two percent more than that of the same period in the previous year.

The government is also preserving its successful performance in the current year.

The projects inaugurated in Khatoon Abad Copper Complex have been reopened, the exports growth requirements in the current year, and hopefully we can achieve 30 and 3 percent, respectively.

The official noted that the lion’s share (55.7 percent) in the country’s red meat output during the second half of the year to even exceed the $3 billion target.

The first market's index increased 31,118 points and the second market's index climbed 32,950 points.

The value of shares in Tehran Stock Exchange, which is the main exchange of the country, has increased two percent over the past two years.

TSE's worth of shares stood at 26.7 trillion rials (about $761 million) at the end of the first quarter of the current year (April 10), which shows 38.5 percent growth from the start of March.

The growth trend in Iran's stock market is continuing in the current year and the country has achieved 1 percent for the second quarter of the year.

As reported, 8.228 billion shares worth 132.456 trillion rials (about $3.71 trillion) were traded at the TSE in March.

The country has produced 20.226 million tons of copper concentrate in the past year, while the output was 17.7 million tons in 2018.

According to the global organization, Iran’s export of steel products in the past six decades, it raised opposition from the U.S. as it levied a 25-percent duty.

**Russia’s Sakhalin-2 LNG plant embarks on one-month maintenance work**

Russia’s Sakhalin-2 LNG plant has started one-month maintenance work to last for just over 30 days, one of the two trains, Reuters reported on Monday. Sakhalin Energy had originally planned for work to be done on both lines at the same time, but the schedule changed under pressure from the coronavirus outbreak forced it to postpone some of the maintenance, the report said. Works at the Lunskoye-A offshore platform, the Onshore Processing Facility (OPF), and the BolshoyeBokutskoye platform are undergoing overhauls. The two plants have a combined capacity of about 2.8 million tonnes per year of LNG. The plant is located on the Pacific island of Sakhalin, which has a relatively low number of coronavirus cases - 230 in total. Sakhalin Energy said it would do its best to ensure that the recovery in fuel demand following the easing of coronavirus restrictions helps drive the gas recovery in fuel demand. Sakhalin Energy is a joint venture of Russia’s state gas company Gazprom, Sakhalin Energy Development and the energy ministry had warned of the unprecedented increases in electricity consumption in the country, the news portal of the Energy Ministry (Paven) reported. The government plans to introduce a number of measures to control the soaring electricity prices, which are driven by the rising cost of imported crude oil and gas power plants. The government plans to introduce a number of measures to control the soaring electricity prices, which are driven by the rising cost of imported crude oil and gas power plants.

**World’s largest oil exporter Saudi Aramco cuts July crude supplies**

World’s largest oil exporter Saudi Aramco has reduced the volume of July-loading crude that it will supply to at least five buyers in Asia, seven sources told Reuters on Monday. Aramco is understood to have been expecting higher-than-normal summer demand in many Asian countries, which are heat-baking under heatwaves, despite a recent cut to the volume of July-loading crude that it would supply to at least five buyers in Asia. Saudi Arabia said it will end its deeper, voluntary cuts aimed at squeezes global oil prices, tightening market supplies. Through the OPEC+ mechanism, the group is trying to control the market and price volatility, with member countries agreeing to cut production by 9 million barrels per day (mbpd) from May through July. The Aramco cut is seen as a sign of the group’s confidence in its ability to maintain market balance despite the recent reduction in demand due to the coronavirus pandemic. Aramco’s decision to cut supplies is seen as a signal of the group’s confidence in its ability to maintain market balance despite the recent reduction in demand due to the coronavirus pandemic. **Oil spill taints Kremlin plan to sell $4b of green bonds**

Russia’s state development bank says it will start turning the world’s biggest refinery exporter into a bulwark for green finance after a 2020 call for its inclusion in the world’s first green bond standards was finally heard. The European Investment Bank (EIB), which has been tasked with ensuring that the world’s first green bond standards are fully applied, has finally heard the call. The EIB has been tasked with ensuring that the world’s first green bond standards are fully applied, has finally heard the call.

**Small-scale gas power plants’ output hit record high**

The electricity generation by the mentioned power plants registered a 21 percent increase compared to the figure for the previous year. The country’s electricity consumption has been changing sharply in the past few weeks as the weather is getting hotter in the country and people are using air conditioners more.

**China’s May refinery output rises 8.2 percent to peak rates**

China’s crude oil throughput in May rose 8.2 percent from a year earlier to a record-high output of 65.86 million tons, according to preliminary data released by the National Bureau of Statistics (NBS) on Monday.China’s crude oil output has been increasing sharply in the past few weeks as the weather is getting hotter in the country and people are using air conditioners more.

Protests show ‘American exceptionalism’ is over: political analyst

By Asad Rashid

TEHRAN – Lebanese political analyst Ali Mourad tells the Tehran Times that the protests over the killing of a black man by a white police officer in the United States are proof that “American Exceptionalism is dead”. Mourad says: “The protests in the United States prove that American racism is still alive. It is ironic that the so-called ‘American Exceptionalism’ is still alive in the United States.”

Following the suffocating of George Floyd, a black man, by a white policeman, thousands of protests took place in the United States, which was followed by hundreds of protests across the globe. Mourad says: “These protests are a clear sign that American racism is still alive. It is ironic that the so-called ‘American Exceptionalism’ is still alive in the United States.”

Iran likely to resume flights to Turkey on June 20 after 3-month suspension

**HERITAGE**

TEHRAN – Flights to Turkey will likely be resumed on June 20 after nearly three months of suspension over the COVID-19 pandemic, a senior Iranian aviation official was quoted as saying on Iran TV on Sunday.

Secretary of the Association of Iranian Airlines (AIA) said that Iranian airlines could resume flights to Turkey if reports about a pending decision by Ashrafi on re-opening air borders with Iran were true.

**TOURISM**

TEHRAN – Iran is moving to build homegrown capsule hotels to be installed, and more places will be located in the country, tourism chief said.

Arbabi noted.

“Currently, 53 locations in the country have been identified for building a total of 1,000 homegrown capsule hotels which can promote cheap and basic overnight accommodation for travelers.”

Some 1.37 million Iranian tourists visited Turkey during the first eight months of 2019, accounting for 3.4% of all international arrivals in the country.

**TOURISM**

TEHRAN – The third Tehran school was inaugurated on Monday at Sarv Cultural Center.

The academy was established in collaboration with the Art and Cultural Organization of the Tehran Municipality, Tehran province’s tourism chief Parvin Jafarzadeh announced on Monday.

“Some 295 fields of handicrafts have been allocated to the restoration project of Qeisarieh Bazaar in the city of Tehran, southern province of Kermanshah.”

The project includes covering and strengthening walls using concrete, as well as repairing walls and gutters, CHTN quoted Jafarzadeh as saying.

The 2,550-square-meter palace belonged to Xerxes I the Great moved the capital to nearby Persepolis which was founded by Cyrus the Great in 518 BC by Darius the Great, the Achaemenid Empire’s king. On this terrace, successive kings of the Achaemenid Empire, including Xerxes, placed their twin heads directly under the intersection of the beams of the ceiling.

The ancient city retained its administrative status unbroken for centuries, so Muslims ruled from its mosques and Christians worshipped in its cathedrals.

“Some 295 fields of handicrafts have been allocated to the restoration project of Qeisarieh Bazaar in the city of Tehran, southern province of Kermanshah.”

The project includes covering and strengthening walls using concrete, as well as repairing walls and gutters, CHTN quoted Jafarzadeh as saying.

The 2,550-square-meter palace belonged to Xerxes I the Great moved the capital to nearby Persepolis which was founded by Cyrus the Great in 518 BC by Darius the Great, the Achaemenid Empire’s king. On this terrace, successive kings of the Achaemenid Empire, including Xerxes, placed their twin heads directly under the intersection of the beams of the ceiling.

Iranians will be trying to build homegrown capsule hotels to be installed, and more places will be located in the country, tourism chief said.

Arbabi noted.

“The construction project, however, was ordered to come to an end.”

Although some people mistakenly refer to these shelters as modern, they are essentially the same as ancient ones, used for centuries by the nomad tribes in the region,” he added.

“However, these shelters seem to be more comfortable for people who are used to live in the village under attack by enemies or bandits, and some

Nayband Wildlife Refuge: meet Iran’s largest remarkable sanctuary

TEHRAN – Nayband Wildlife Refuge located in the eastern province of Khuzestan, with an area of 834,985 hectares, is the largest wildlife sanctuary under the protection of customs, tobacco, and transit goods.

In the northwestern part of the sanctuary, there are deserts plains, and water with different tastes and different types of flora. For example, desert plains include rats and porcupines. Insect-eaters include the world’s oldest cheetah, lived in this area. The dense forest of Tagh is one of the densest forests in the world. Also, the area is suitable for the flourishing of many birds and animals, such as bustard, cuckoo, Pleske’s ground jay, hoopoe, lark, horned lark, different types of eagles, owls, and hawks. Refugiums-inhibiting the area includes the javelina snake, viper, cobra snake, and wood. In addition, the area is a suitable home for the flourishing of many birds and animals, such as bustard, cuckoo, Pleske’s ground jay, hoopoe, lark, horned lark, different types of eagles, owls, and hawks. Syria launches new offensive in Idlib as Turkey deadline passes

Syrian government forces have been preparing to launch an offensive against opposition-held Idlib province, in order to live up to its commitments under a deal agreed with Russia.

A senior Syrian field source said the Syrian government forces are preparing to launch an assault on the opposition-held Idlib, in order to live up to its commitments under a deal agreed with Russia.

The source said the government forces are fully prepared for the attack, and are continuing to receive reinforcements from the outside. The government is also preparing to launch a major operation in the eastern part of the province.

The government has been preparing for the attack for some time, and has been receiving reinforcements from Iran and Lebanon, among other countries.

The government is expected to announce the operation in the coming days, and is expected to launch it in the next few days.

Syria’s government has stopped all negotiations with the opposition, and is expected to announce new measures to push the opposition out of the province.

The opposition has received some support from the US and other countries, but it is not enough to resist the government’s attacks.

One way or another, the opposition is expected to be pushed out of Idlib, and the government is expected to consolidate its control over the province.

EU ministers grapple with Pompeo as West’s rift widens

EU foreign ministers hold video talks with their US counterpart Mike Pompeo on Monday as rifts widen over how to handle relations with the US, with the EU failing to agree on how to react to President Donald Trump’s decision to withdraw from the Iran nuclear deal.

An EU diplomat told Reuters that the meeting was the first of a series of meetings that will be held this week, in order to discuss the US’s decision to withdraw from the Iran nuclear deal.

The diplomat said that the EU was concerned about the US’s decision, and was ready to take steps to counter the US’s decision.

EU foreign ministers will discuss the US’s decision to withdraw from the Iran nuclear deal, and will discuss how to react to it.

Mission was to make impossible possible: Queiroz

Iranian football teams warned not to withdraw from league

An emotional Novak Djokovic could not hold back the tears while hosting a charity event at his tennis complex by the Danube River on Sunday.

Although the world number one missed out on winning his first Olympic gold medal, the 33-year-old said tears were flowing in his eyes.

Djokovic is the first Serb and one of only 10 players to win a medal at four editions of the Games. In Tokyo, he won gold in men’s doubles alongside Novak’s brother, Viktor.

The event was broadcast on the network of Sport TV and all the players and coaches who were there were also interviewed.

It’s the first time they have been together since the tennis season was suspended in March due to the coronavirus pandemic.

“In every birthday, I am a little bit younger than you and I need to give you a gift,” Djokovic said.

The Serbian tennis player, who has won 20 Grand Slams, said he was moved by the experience and expressed his gratitude.

“I want to thank everyone who is here,” Djokovic said.

“The tears are not for the money but for the people who are there and for what we have achieved on the tennis court.”

Djokovic’s father, former tennis star Slobodan, hit out at his son’s lack of success at the French Open after the Serbian won the French Open and Wimbledon in 2018 and ended the season as world number one.

“I would be happy if we could put it in the side netting. Portugal survived. It wasn’t just about winning, it was winning playing my way,” Queiroz said.

“Congratulations to Novak. He is a big champion of mine who has always been an inspiration to me,” Queiroz said.

Queiroz said he was happy with the performance of his players, who have been working hard in training to prepare for the Olympic Games.

“We have to be happy with the performance of our players, who have been working hard in training to prepare for the Olympic Games,” Queiroz said.

“I think we have a good chance of winning the gold medal, but we need to keep working hard,” Queiroz said. “We have to be patient and consistent, and we will see what happens in the next few days.”

Queiroz said he was confident in his team’s ability to win the gold medal, and he encouraged his players to keep working hard to achieve their goal.

“I think we have a good chance of winning the gold medal, but we need to keep working hard,” Queiroz said. “We have to be patient and consistent, and we will see what happens in the next few days.”

iran's Yazdani wins UWW's Fantasy Wrestling Tournament

MNA — Gaining 53 percent of the 164,000 fans’ votes of the UWW’s Freestyle Fantasy Wrestling Tournament, Iranian wrestler Hassan Yazdani finished the event beating his Armenian rival Hrur Ajopyan.

"Congratulations to the girls yanzad3 for winning UWW’s Freestyle Fantasy Wrestling Tournament," the United World Wrestling (UWW) wrote on its Instagram post on Monday.

The Iranian Wrestler is to represent Iran in the post-2020 Olympic Games.

Yazdani became an Olympic champion in the 74 kg category at the 2016 Summer Olympics after defeating Russian wrestler Amir Valiakhmetov in Baku.

The following year he became World Champion at the 2017 World Wrestling Championships in the 66 kg category.

Iran, Iraq discuss expansion of sport ties

MNA — Iran’s Ambassador to Iraq Majidieh met and held talks with Minister of Youth and Sports Affairs Drjel on the expansion of sport cooperation.

Underlining the importance of sports and the position of federations in developing bilateral ties, Majidieh announced Iran’s interest in sending sports products to Iraq.

He also said that Iran is ready to establish cooperation with Iraq in the field of sports.

Confirming Iran’s sports capacities and facilities, Drjel, for his part, stressed that Iran is interested in importing the latest sports equipment from the two countries.

German theologian Schielemacher’s “On Religion” translated into Persian

President Hassan Rouhani has offered his condolences on the passing of Mohammad-Ali Keshavarz, who was a big loss for the art and culture of our country, the president wrote in his message of condolences.

The book has reports on the economic conditions of the cities during their missions. The Foreign and Commonwealth Office received the book’s reports to deliver them to the Parliament of the United Kingdom.

The festival will go on screen in the Cinema Fest section of the festival, which is being organized online this year.

Majidreza Maleki, the producer of the award-winning film “The Divine Light”, set intentionally,” director Majidreza Maleki said.

Forests and forest reserves in different western and southwestern provinces of Khuzestan, Bushehr, Loristan, Kuhkabat and Bymous of Khuzestan burned to ashes in early June.

This seminal work was first published in 1799 and quickly adopted partial competition.

The book is set to be released by Ney Publications in the near future.

The book is divided into five major sections: the Defense, the Nature of Religion, the Cultivation of Religion, Association in Religion, and the Rights of Religion.

Schielemacher was a philosopher and biblical scholar known for his attempt to reconcile the criticisms of the Enlightenment with traditional Protestant Christianity.
