TEHRAN – Iran has underground missile cities along southern coasts, commander says

Iran has underground missile cities along southern coasts, commander says

The missile-launching floating cities would be put on display at the discretion of the authorities, the commander noted, adding, “The enemy knows that the Army and the IRGC have underground (missile) cities all along the Persian Gulf and the Sea of Oman, but it is information that is not accurate.”

The IRGC Navy is present everywhere in the Persian Gulf and the Sea of Oman, in every place that the enemy would not even think about, like a ‘nightmare’, the admiral warned. Tangtai pointed to the IRGC Navy’s initiative to form “novel Basei” on 2,500 km of Iran’s southern coasts, excluding the islands, saying the force involves self-defence and more than 25,000 servicemen.

“Each one of our armed and the underground cities of the Army and the IRGC have various defence batters that can counterattack the entire southern coasts. The coast is fully armed as well,” he added.  21

Establishing 8 new FTZs across Iran on agenda

TEHRAN – Secretary of Iranian Free Zones High Council Mostafa Bakri said on Saturday that eight new free-trade zones (FTZs) are going to be established across the country, INCA reported.

“Currently, in pursuit of the current eight free zones, the creation of new eight zones is on the agenda, and we are certain of the benefits from the policy of the (Transport Ministry’s) Research Center in this regard.”

Bakri made the remarks in a gathering of the heads of the country’s FTZs with exports from the Transport and Urban Development Ministry’s Research Center in Tehran.

Speaking at the gathering, the official underlined the significant role that the Transport Ministry’s Research Center play in development of the country’s free and special zones and said the said that the center provides the ground for future cooperation.

“We are a constructive initiative for development of standards and regulations as well as the insurance and reinsurance companies and the relevant bodies and companies’ co-operations with the research center and said we are working on the establishment of customs, energy and disaster management fields, and we hope that the results of the studies by the center would help us in this area.”

Establishment of free trade zones in Iran dates back to the Iranian calendar year 1356 (March 1978- March 1979), following the fall in the country’s oil income in the preceding year which prompted the government to promote the non-oil exports.  

No hidden issue in Iran-China agreement

TEHRAN – Jin Liangqiang, an associate research fellow at the Center for West Asian and African Studies, tells the Tehran Times that Iran has been very cooperative in the IRGC and that “no member states can accept endless inspections” and “limitless access” to locations in their territories, specifically without “solid evidence.”

“De-Jin, a senior research fellow in the institute for International Strategic Studies (ISS) also says the EU cannot stand up to the U.S. as the EU is vulnerable both because of its internal division, particularly as a result of US international and role policy toward the EU, and its dependence on the U.S. for security protection.”

On the future of Sino-Iranian relations, he notes, “The future will see that the Comprehensive Strategic Partnership is growing stronger and stronger as political elites on both sides attach great importance to such relations, and trust and friendship between the two peoples are growing stronger.”

The test of the interview with Jin Liangqiang is as follows:

The International Atomic Energy Agency’s Board of Governors adopted a resolution drafted by the UK, France, and Germany, calling on Iran to cooperate immediately and fully by providing the Agency with prompt access. But Tehran says the Agency has not provided it with clear and legal reasons. Besides, Iran has warned against attempts to engage it in an endless process with the Agency. What is your thought?

A: Member states are indeed obliged to cooperate with the IAEA in inspections regarding their nuclear activities. Iran is one of the countries that the IAEA has sent most insufficient cooperation with, as various IAEA reports have indicated. On the other hand, member states are also sovereign states with sovereignty. No member states can accept endless inspections or grant limitless access to locations in their territories, particularly if the request is not based on solid evidence.

European signatures to the 2015 nuclear deal have never seriously stood up to the U.S. while they have already failed to meet their commitments under the agreement following Washington’s unilateral withdrawal from the accord. In your view, has Iran any reason to trust Europe?

No IAEA member states can accept endless inspections: Chinese expert

The British website “DescaledUK” published an elevated report saying that hundreds of Saudis from Saudi Arabia and other Persian Gulf Arab countries had received training at the Ministry of Defense, and the Saudi government had also been training at the Ministry of Defense in Liliivost, western Ukraine in 2019. While the British Ministry of Defense did not reveal the nature of the trainers, if they were pilots or crew operating in the ground, Saudi Arabia acquired “Typhoon” aircraft in a deal with “Bil-Sultan,” the arm of the British army, at a value of 20 billion pounds.

The investigation revealed that Yemen was subjected to thousands of raids carried out by coalition warplanes, which killed (93) civilians last year, including (77) children.

The investigation stated that it had received training from the Defense College of Oxford for technical training in Sheffield, western England last year, indicating that the British Ministry of Defense refused to reveal the nature of the courses that the Saudis had resorted to the College of Oxford.

Iran has underground missile cities along southern coasts, commander says

The commander also said the enemies should brace themselves for a new wave of long-range Iranian missiles and vessels that they could not even imagine.

Mishra’s dismissed claims of any new negotiation about the cooperation plan.

The commander further said the government spokesman explained in a meeting on June 21, the cabinet of ministers approved the draft of the 2024-2025 comprehensive cooperation plan between Iran and China.

Mishra’s draft concerned the strategic partnership between the two countries is a win-win approach.

This cooperation is a ground for Iran and China to further develop their cooperation in the fields of development, infrastructure, including advanced transportation and telecommunications, information and communication technology, and information and communication technology, according to Foreign Minister spokesman Alireza Moussavian.

He said that the 25-year plan is based on a win-win approach and encourages cultural communications, encouraging multilateralism, supporting cooperation, and forging a new international economic and domestic parts are full.

In response, Iranian parliamentarians, along with the Foreign Ministry, condemned the new resolution, calling on the government to take appropriate and immediate response to the move.

The commander also said that Tehran will take new decisions of options. It is desperate. The policy of maximum pressure has not worked.

He made the remarks in a message to the United Nations Security Council (UNSC) in the form of its Resolution 2535.

The U.S. invasion andquoise on the face of the facts that the deal has been approved by the United Nations Security Council (UNSC) in the form of Resolution 2535.

Thani also added that Iran’s nuclear program is not just an announcement of nuclear power, it is that they are changing arms across the Middle East. Look at Houthi in Yemen, we are making broad diplomatic efforts across the world, he further claimed.

Iran has made achievements in discussing issues.

Mishra has said that Iran has made achievements in discussing issues.

“The motion to ask questions from Mr. Rouhani and signed by 130 MPs was presented in the parliament on Sunday that the U.S. seeks to seize Iranian oil tankers by the names of Petunia, Forest, Faxon, Clavel, and Oferta. They filed another lawsuit, first reported by Bloomberg, on June 22.

The EU foreign policy chief concluded, “As we approach the fifth anniversary of the JCPOA, a true friend of our region, Iran, has shown the world that despite the US’s unfair and illegal sanctions, it has continued to pursue its peaceful nuclear activities.”

Rouhani’s government issues a new resolution to impose of sanctions on Iran. The draft of the new resolution was introduced to the International Atomic Energy Agency (IAEA) in the form of Resolution 2535.

The president said, “For decades, I have been trying to bring the crises to the UN, but Iran has been excluded.”

The president was referring to the executive of the United Nations Security Council (UNSC), which is responsible for implementing the JCPOA.

The JCPOA safeguards the peaceful uses of nuclear energy and non-proliferation, contributing to regional and global security. It has been determined to continue working with the participants of the JCPOA and the international community to preserve it.

Rouhani also said that Iran has made achievements in discussing issues.

The United States is running out of options. It has failed to impose its will on Iran.

Rouhani said that Iran and Venezuela should deepen ties

The president said that Iran and Venezuela should deepen “strategic” and “friendly” ties.

“In the context of deepening friendly and strategic relations between the two friendly countries, the development of infrastructure, including advanced transportation and telecommunications, information and communication technology, and information and communication technology, is very important.

The agreement concluded.

The president also said that Iran has made achievements in discussing issues.

“This plan proves failure of the United States’ strategy to impose economic sanctions on Iran,” he said.

In response, Iranian parliamentarians, along with the Foreign Ministry, condemned the new resolution, calling on the government to take appropriate and immediate response to the move.

The commander also said that Tehran will take new decisions of options. It is desperate. The policy of maximum pressure has not worked.

Ghalibaf: We won’t let IAEA complete espionage circle of hostile countries

The Islamic Republic of Iran foreign policy chief and the JCPOA coordinator, and once again referred to the cases of the European countries’ non-compliance to the JCPOA and the International Atomic Energy Agency (IAEA) Joint Commission for settlement.

The statement was in reaction to a letter forwarded by Iranian Foreign Minister Mohammad Javad Zarif to the EU High Representative for Foreign Affairs and Security Policy Josep Borrell on invoking the Dispute Resolution Mechanism (DRM) under the context of the JCPOA.

Iranian Foreign Ministry spokesman Maria Zakharova has rebuked the UK, France, and Germany for introducing the resolution, saying such measures are rooted in “destructive” measures adopted by the US against the Islamic Republic. She said the move is an attempt to exacerbate tensions and escalate the situation.

The IAEA’s explicit stance that the safeguards issues are urgent and poses a proliferation risk, Lijian explained, adding, “The Iranian side also expressed its determination to resolve issues through dialogue with the US. The Iranian side stressed that it does not approve of actions that artificially create tensions and escalate the situation.”

derives from the existing framework of the nuclear deal and only if the US returns to the deal and honors its commitments, Tehran has emphatically rejected any prospect of bilateral negotiations.”

Leader of the Islamic Revolution Ayatollah Ali Khamenei has ruled out the possibility of Iran’s “problems” hinges on rapprochement with the United States. ‘

Iran-China agreement should be based on mutual interest: ex-diplomat

President Hassan Rouhani has said the strategic partnership is a ground for Iran and China’s participation in the global, regional and local peace, stability and development.

By invoking DRM, Zarif expressed dis- guise of the Islamic Republic of Iran’s lack of respect to the nuclear deal and failure of France, UK and German Governments to honor their JCPOA commitments. France together with Germany and the UK are committed to preserve Iran nuclear deal, French Foreign Ministry said adding that they respect their com- mitments to the JCPOA.

We have even taken steps for supporting legitimate trade with Iran, it added. Without invoking European parties’ impartiality with regard to their commit- ments, the French Foreign Ministry urged Iran to return to its JCPOA commitments.

We negotiated with Iran and other JCPOA parties based on a basic and realistic approach, the statement read. Zarif in a letter to the High Representatives of the European Union and Josep Borrell once again referred the cases of European countries’ non-compliance to the Joint Commission for settlement in accordance with Article 36 of the JCPOA.

Iranian Foreign Ministry’s letter warned that any interference in the ongoing coopera- tion between Iran and the IAEA would be considered a violation of the JCPOA and could have negative impacts on the existing coopera- tion under the Safeguards Agreement. Meanwhile earlier, Borrell said in a statement that the US had launched the JCPOA in historic transitions and the global non-proliferation contributing to regional and global peace and security.

The US government has also made empty calls for talks, the statement reads. “The International Atomic Energy Agency (IAEA) Board of Governors has warned. “When they lose hope to reach their goal, they will lose hope to reach both of their goals, they ask the parliament to give them enough time to work,” the parliament speaker added.

The 35-member IAEA board of government passed a resolution on June 19 demanding access to two old places under the allegation that nuclear work may have been done there.

Nine countries out 35 members to the IAEA board did not vote for the resolution and China and Russia voted against the resolution and Thailand, Mongolia, Nigeria, South Africa, India, Pakistan and the Republic of Azerbaijan abstained to vote.

Foreign Ministry spokesman Abbas Mousavi announced on Friday that Zarif has written to the (JCPOA) Joint Commission, the IAEA Board of Governors and also the con-

**Imports of 2,500 products banned in a quarter**

The Ministry of Commerce announced its decision to ban the import of 2,500 products in one quarter, including steel and iron, aluminum, copper, molybdenum concentrates, pre-petroleum trading floors of IME, different products, VB feedstock, lube products, bitumen, polymer products, and gold bullion. These products are banned due to the government’s focus on self-sufficiency and resilience, and the desire to boost domestic production and limit the import of non-essential goods. The ministry aims to ensure that the supply chain remains stable, and resources are allocated towards the development of domestic industries and the manufacturing sector.
No water shortage, rationing on agenda despite high consumption

Leader of the Islamic Revolution Ayatollah Seyyed Ali Khamenei said on Saturday that rationing of water and rationing in drinking water consumption in the first quarter of this year is due to the water shortage in a number of provinces in Iran.

By Irina Slav

First, they said it nicely: play along and cut your quotas, or we’ll cut your oil prices for less. Then they put their foot down: start cutting deeper or else. And now it has emerged what the “or else” part was—a new price war.

IOC, a subsidiary of the NOC, undertakes most drilling operations across the country and has drilled 4.8 million oil and gas wells and oil and gas fields in the past four decades after the victory of the Islamic Revolution.

Today's drillers are the ones who helped Angolan and Nigerian delegates, "We know who your customers are," said a member of the NOC team. "We know who your customers are." But that was enough to rattle the world.

A second wave of Covid-19 infections in the world’s largest consumers. Meanwhile, demand has been slow to rebound. Imports to small-scale refiners have increased, with some signs as a pickup in gasoline production in the US and a drop in gasoline production in China in the previous round of cuts, agreed on last December. On April 16, the day before Iraq announced its first price war of the year, several estimating companies revised their price forecasts. This was because the ports in Shandong, China’s westernmost province, are still being blockaded by the guards, NOC said on July 1.

It is also exploiting the invasion against Yemen to milk its projects and the escape of its ambassador from Sana’a. It is also trying to contain the danger of the growing awareness of the region, especially the awareness of the rising Saudi people in the region, as we mentioned in the conversation since the wars of Sa’adah, especially the intensive care rooms and medical operations.

Who will benefit from a division of Yemen? What is the real beneficiary of Yemen’s division? Are we talking about the beneficiaries of the division? The answer is in the interest of the region, the region, the region, and the region, especially the areas in the war that were not involved in the war, and the regions that were involved in the war, and the areas that were not involved in the war.

A: Certainly, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

B: Of course, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

C: Of course, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

D: Of course, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

E: Of course, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

F: Of course, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

G: Of course, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

H: Of course, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

I: Of course, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

J: Of course, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

K: Of course, dividing Yemen is in the interest of the region. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war. The region is involved in the war, and the region is involved in the war.

Archaeological survey identifies 205 relics, ancient sites in Kerman

The worldwide outbreak of COVID-19 has brought the world to a standstill, and tourism has been the worst affected of all major economic sectors. Some experts expect Iran to achieve tourism boom after coronavirus contained, believing its impact would be temporary and short-lived for a country that ranked the third-fastest-growing tourism destination in 2019.

Latest available data show eight million tourists visited the country during the first ten months of the past Iranian calendar year (started March 20), a sharp decline of 77.7% compared to the same period last year. Lorestan tourism department is scheduled to hold a familiarization tour in a bid to promote traveling to the western province.

Some 3,000 tourism workers in Kish lose job over coronavirus outbreak

Over the past couple of decades, the coral Kish Island has become a beach resort where visitors can swim, shop, and sample a laid-back and relatively liberated local lifestyle. It is home to evidence of numerous prehistoric and Islamic eras.

A total of 205 relics and historical sites so far identified in Kish Island, according to Jiroft tourism chief Seyyed Amin Qasemi as saying an

Safawi Many historical and natural sites across Kermanshah province have been inscribed on the National Heritage List, ITIS reported on Sunday.

Iran, South Korea enhance co-op on fighting international crimes

TEHRAN – The fifth meeting of the chancellors of top universities of Iran and Russia will be held online on July 8 with the aim of expanding scientific and academic cooperation. This event will be also attended by some political, cultural, and scientific officials of the two countries, ILNA news agency reported on Sunday.

Since 2015, four meetings have been held at the University of Tehran and State University of Moscow, through which a Memorandum of Understanding has been signed to establish the Union of Iranian and Russian Universities. The meetings also led to signing and publishing some joint statements focusing on the expansion of Iran-Russia academic relations. Moreover, several MOUs were signed between universities of the two countries in the fields of teaching Persian and Russian languages, mathematics, aerospace engineering, and medical sciences.

The IRGC at full capacity in fight against coronavirus

The IRGC has informed the provincial commanders to be prepared to deal with the second wave of coronavirus. It has highlighted, concluding, to battle the pandemic, we all set the IRGC's power and move into any challenge.

Over the past 24 hours, 2,586 new cases of COVID-19 were identified in the country, of which 1,295 were hospitalized, 402 were in the intensive-care units, and 210 had been intubated, Health Ministry spokesman Sima Sadat Lari said on Sunday, adding that the total number of patients in the country reached 1,425,438.

Unfortunately, 147 patients lost their lives over the past 24 hours. The total number of COVID-19 deaths in the country reached 13,571, she said.

Thawing Arctic permafrost could release deadly waves of ancient diseases, scientists suggest

It is at this pivotal moment a startling new risk could also be unleashed upon the world – one which binds both together and on the edge of the tragedy of a highly contagious disease. Scientists have said the rapidly warming climate in the far north exposes long-enduring viruses, which may be tiny or even hundreds of thousands of years old, and have been frozen in the permafrost for millions of years. Due to the rapid heating – the Arctic is warming up at least twice as fast as the rest of the world – the permafrost is now thawing for the first time since before the last ice age, potentially freeing pathogens like the one which modern humans have never been exposed to before. Jean-Michel Claverie, a virologist at Aix-Marseille University, told Greenpeace’s investigative journalism outfit Unearthed: “The idea that bacteria can survive for very long time is definitely accepted. The question is whether these ancient viruses may be more virulent.”

So far researchers have been able to successfully reactivate ancient viral strains, but so far none have been able to go to 3,000,000 years. However, he added: “There are extremely good papers saying yes, you can reactivate bacteria from deep permafrost.”

The Thawing Arctic project will be also attended by some political, cultural, and scientific officials of the two countries, ILNA news agency reported on Sunday. FAO shares international expertise and knowledge with Iran in Early Warning Early Action systems

Tehran – The Food and Agriculture Organization of the United Nations (FAO) in its partnership with its national stakeholders in Iran has organized a knowledge-sharing event for Iranian experts, providing a unique opportunity to technology transfer and the shift from managing disasters to managing risks. The event focused on discussing different aspects of early warning and early action for Disaster Early Warning and Early Action (EWEA) systems between the two nations.

According to a press release published by the FAO Representative in Iran, the event focused on discussing different aspects of early warning and early action for Disaster Early Warning and Early Action (EWEA) systems between the two nations. It was held in the framework of the FAO’s Global Warning Early Action platform and its lessons learned and taking anticipatory measures by national authorities focused on the latest update.

As presented in the webinar, the FAO’s expected project in Mongolia not only can national authorities to mitigate the negative consequences being used to support the development of the vulnerable population in the affected rural communities and the empowerment of vulnerable population to maintain their livelihoods during the disaster and rebuild them in post-disaster periods.

In this regard, the achieved results demonstrated how such measures are cost-effective for the national government as every USD 1 spent on early actions taken by authorities to help the risk prone households, returns more than USD 7 in benefits – reduced damages and losses to – each disaster affected-family.

The outreach results demonstrated how such measures are cost-effective for the national government as every USD 1 spent on early actions taken by authorities to help the risk prone households, returns more than USD 7 in benefits – reduced damages and losses to – each disaster affected-family.

Iraqis rally to deify Saudi paper’s offensive cartoon of Ayyatollah Sistani

Iraqi protesters have staged a demonstration in the capital Baghdad to condemn the publication of an offensive cartoon depicting Iraq’s most prominent Shia cleric Grand Ayatollah al-Sistani.

The demonstrators converged outside the gates of the heavily fortified Green Zone, which is home to several embassies and government offices including the parliament and the prime minister’s official residence.

The protest was organized by the Iraqi parliament and the government offices including the parliament and the prime minister’s official residence.

The demonstration was an extension of a similar protest held in the capital’s Kadhimiya neighbourhood the previous week.

A total of 206 protesters were injured in the clashes, with 156 of them hospitalised.

The protesters chanted anti-government slogans and threw stones and burning tyres at the security forces.

At least one person was killed and five others were injured in the violence.

The incident comes amid ongoing protests in Iraq against corruption and economic hardship, with demonstrators calling for the ouster of Prime Minister Mustafa al-Kadhimi.

Protesters have been casting international pressure against the administration of President Donald Trump.

An adviser to Palestinian President Mahmoud Abbas has also said that an intifada (uprising) could be just around the corner if Israel goes ahead with its illegal colonisation plan to annex parts of the occupied Palestinian territories.

Speaking to France 24 Arabic on Saturday, Nabil Shuhaib, a senior Palestinian official, said that the new US president Donald Trump was “arrogant” and “anti-Palestinian”.

Shuhaib accused the Trump administration of trying to use the potential Palestinian uprising to fund the US war effort in Africa.

He called on all Iraqi citizens to defend their country and resist any attempts to weaken it.

Volleyball can become popular as football: Salehi Amiri

Although he wasn’t the first Iranian player to try his luck in the Bundesliga with Bayern Munich, Ali Karimi is probably the most renowned professional career lasting almost 20 years played out in four countries at a variety of clubs, who helped in Karimi becoming one of Iranian football’s best-known exports.

Born in 1978, Karimi made his first professional contract for Iranian second-flight club, Fath Tehran, where he spent two years. A transfer to Persepolis, the top side in Iran, and in 1998 and 2000 were the following seasons. In 2001, Karimi had already scored the first of 127 caps for Iran in what was a four-year international career.

In the first minutes, Mehdi Tabataba’i slotted his goal beneath Shahin goalkeeper Abdollah Davoudzadeh to seal three crucial points for the Reds.

Three years later Shahin Bagheri’s slot against the in-form Persepolis results the first of the Iranian Cup. At an empty Azadi Stadium, Persepolis were reduced to 10 men after a trial with Perugia Calcio proved unsuccessful, Karimi signed for United Arab Emirates side Al-Ahli. In four years, it was never noted for his strength on the ball intertwined with his sense of timing and his ability to find space. It was these attributes that contributed to his more than healthy 38 goals and took in the World Cup final stages after helping his club with the Iranian Cup.

The Asian Footballer of the Year in 2004 and runner-up of previous eras under former players Pep Guardiola and German Cup success in 2006. Karimi was to play more than forty times for the Bavarian side and was transferred to Tehran after his condition worsened. Nouri won a bronze medal at the 2018 Asian Games. Iran has been battling the spread of the coronavirus, with the total number of cases hitting 2,376,989 on Saturday and a further 48 deaths bringing the country’s toll to 114,069.

Two Iranian league matches cancelled after players test positive for coronavirus

Tasnim — The match between Persepolis’ head coach for the National Team. We have both foreign and Iranian option for the position, we will announce his name in the appropriate time,” Davarzani said.

Amir Sedighi elected as Iran wushu president

Antonio da Silva Campos, president of Rio Ave, has confirmed that several European clubs have shown their interest in signing Mehd Taremi. The Iranian forward has scored 16 goals so far for Rio Ave.

“The match between Pars Jonooni and Esteghlal and Nassaji and Foolad in the Iranian Professional League (IPL) have been postponed after the players tested positive for the coronavirus,” Esteghlal’s head coach Noureddin Bahadori told IRNA.

The 87kg wrestler also won three gold medals at the 2020 Tokyo Olympics and in the Asian Championships in 2018.

Soheil Mahdi had already said. “There are three clubs that are interested,” Antonio da Silva Campos told in an interview with O Jogo.

The 87kg wrestler also won three gold medals at the 2020 Tokyo Olympics. Taremi will announce his name in the appropriate time,” Davarzani said.

Iranian taekwondo fighter bags gold in Russia virtual games

IRNA — Iran’s taekwondo ace Amir Salami Farid ranked first in the Russian international virtual tournaments. Sport Twilight president and chairman of previous eras in Iran. The Iranian Olympic Committee held a press conference on Thursday and awarded the highest scores to the Iranian athletes defeated rivals from Kazakhstan, Uzbekistan, and Germany.

Salami Farid, who earlier snatched a bronze medal in Iran virtual Poomsae competitions and bronze medal of the premiership league, noted.

Syria football federation confirms with Iran

Tasnim — A top official of Syrian football federation has confirmed a friendly match with Iran.

Iran机油 injection is under way in Tehran’s Audi Stadium on September 3 but the match was cancelled.

Deagan Skocic’s team are scheduled to host Hong Kong on October 8 in Tehran and meet Cambodia five days later on October 13 in Malaysia.

Professor Mamoud Motedayen finished in second place in the elections with nine votes.

Sedighi replaced Mehd Alimejad who worked as wushu president for 12 years. Alimejad currently serves as the Iranian Deputy Minister of Sport and Youth.

“This is the second time for giving everyone an opportunity to serve as president of wushu federation for the next four years,” Taher Parvin Jonooni said.

Iran songstress Alinejad currently serves as the Iranian Deputy Minister of Sport and Youth.

Xavi signs one year extension with Al-Sadd

Although he wasn’t the first Iranian player to try his luck in the Bundesliga with Bayern Munich, Ali Karimi is probably the most renowned professional career lasting almost 20 years played out in four countries at a variety of clubs, who helped in Karimi becoming one of Iranian football’s best-known exports.

Salami Farid, who earlier snatched a bronze medal in Iran virtual Poomsae competitions and bronze medal of the premiership league, noted.

Syria football federation confirms with Iran

Tasnim — A top official of Syrian football federation has confirmed a friendly match with Iran.

Iran机油 injection is under way in Tehran’s Audi Stadium on September 3 but the match was cancelled.

Deagan Skocic’s team are scheduled to host Hong Kong on October 8 in Tehran and meet Cambodia five days later on October 13 in Malaysia.

Professor Mamoud Motedayen finished in second place in the elections with nine votes.

Sedighi replaced Mehd Alimejad who worked as wushu president for 12 years. Alimejad currently serves as the Iranian Deputy Minister of Sport and Youth.

“This is the second time for giving everyone an opportunity to serve as president of wushu federation for the next four years,” Taher Parvin Jonooni said.

Iran songstress Alinejad currently serves as the Iranian Deputy Minister of Sport and Youth.

Xavi signs one year extension with Al-Sadd

The Blaugrana legend has agreed to stay on as coach of Qatari club Al-Sadd, extending his time until the end of the 2021-22 season.

Xavi

The Blaugrana legend has agreed to stay on as coach of Qatari club Al-Sadd, extending his time until the end of the 2021-22 season.

Xavi, who is currently recovering from an ankle injury, has been cleared to return to training, although he will only be able to return to full training once his ankle heals.

The 40-year-old ex-Arsenal ace has scored 10 goals in 144 appearances for the Gunners in all competitions, and has been a key player in their success in recent years.

Xavi is set to leave the club at the end of the season, with his contract due to expire in June. However, the club has already made a decision to extend his contract until the end of the 2021-22 season, in order to avoid any complications.

The Spaniard scored the fourth goal of the game as Barcelona thrashed Real Madrid in their last game of the season, earning themselves the La Liga title.

Xavi has been a consistent performer for the club over the years, and has played an important role in their success.

In the wake of his contract extension, Xavi has stated that he is committed to continuing his work at the club, and is looking forward to the new season.
