Prospects of Iran-Iraq ties

Iranian researchers and scientists at the Institute of Cancer and the University of Tehran managed to develop a system for the real-time diagnosis of COVID-19. They designed a single-chambered sensor to selectively detect the intensity of reactive oxygen species (ROS) in the sample (with a volume of less than 1 µl). Comparing the results of the sensor with clinical diagnoses of more than 140 normal and involved cases resulted in a response correlation with accuracy and sensitivity of 80%. Testing the sensor in several hospitals showed promising results in real-time tracking of COVID-19 with the optimum sample size. More than 90% of able, mobile patients are available to diagnose in less than 30 seconds.

Spy for Mossad, CIA put to death: Judiciary

Mousavi-Majd was arrested months before that incident and the court had issued an initial ruling on his case on August 25, 2019, the Judiciary said, explaining that the convict has never been released from custody since apprehension. On January 5, President Donald Trump ordered airstrikes that killed General Suleimani and Abu Mahdi al-Muhandis of Iran's Popular Mobilization Units (PMU), in Baghdad's international airport. According to a joint statement released by the government, the operation was carried out in response to the Iranian General's expansion of Iran's military activities and terrorist attacks in the region.

Sa’d-al-Saltaneh, a top tourist site in Qazvin

The 16th-century bazaar of Sa’d-al-Saltaneh is a top tourist site in the city of Qazvin, which was once the capital of the Persian Empire under Safavids from 1502-1629. The bazaar has traditionally been an economic and social center in the ancient city which is also famed for carpets and souvenirs. The bazaar is located adjacent to a beautifully restored Qajar-era caravanserai of the same name. In April, Qazvin province’s tourism department announced that it is seriously pursuing efforts to register Sa’d-al-Saltaneh caravanserai on the UNESCO World Heritage List.

Indian Muslims oppose government’s bid to ban Iranian movie “Muhammad”

In early June, Judiciary spokesman Gholam Hossein Esmaili announced that Mousavi-Majd has nothing to do with the Americanrizm and social centers in the ancient city which is also famed for carpets and souvenirs. The bazaar is located adjacent to a beautifully restored Qajar-era caravanserai of the same name. In April, Qazvin province’s tourism department announced that it is seriously pursuing efforts to register Sa’d-al-Saltaneh caravanserai on the UNESCO World Heritage List.

TEHRAN — Iran and China have signed a 25-year comprehensive cooperation agreement that the U.S. views as a continuation of the 600 billion U.S. dollar trade deal agreement between the two countries.

The agreement, which was signed on Thursday, is aimed at expanding economic and cultural ties between the two countries.

The agreement is seen as an important step in the ongoing effort to improve relations between Iran and China.

The agreement is expected to bring a number of benefits to both countries, including increased trade, investment, and cultural exchange.

In addition, the agreement is likely to help strengthen the stability of the region by reducing the risk of conflict.

The agreement also includes a number of provisions aimed at promoting peace and security in the region.

The signing of the agreement was welcomed by both countries, with Iran's Foreign Minister saying that it was a significant step forward in the effort to improve relations between Iran and China.

China's Foreign Minister said that the agreement would help to further strengthen the strategic partnership between the two countries.

The signing of the agreement was also welcomed by the United Nations, which said that it was a positive development for regional stability.

The agreement is expected to come into effect in January 2022.

Iran and China have a long history of cooperation, having signed a number of agreements in the past.

The agreement is likely to be seen as a positive development for both countries, and is expected to help to strengthen the stability of the region.

Domestic firms ink deal to develop South Azadegan oil field

Under the framework of the deal, the contractor is obligated to draw new wells, install 50 downtime KSP pumps, complete two intermediate separation plants, construct 326 km of pipeline along with 153 km of gas and crude oil transmission pipelines, and construct Karoun West Karoun Pumping House and to the NGL plant. The two sides also signed a nearly $300 million contract for the construction of South West Karoun Pumping House, which is estimated to be the country’s biggest upstream treatment plant.

Speaking on the signing ceremony, Zamani emphasized the importance of Azadegan oil field for the country’s oil industry and noted that improving the field’s recovery factor by 10 percent is going to increase the field’s output by a 2.7 billion barrels which means a $5-billion increase in the country’s future oil revenues.

South Azadegan is one of the five major oilfields Iran shares with Iraq at the western part of Iran’s southwestern region, known as West Karoun fields. West Karoun holds great importance for Iran, as the oilfield is estimated to contain 67 billion barrels of in-situ oil, West Karoun fields definitely deserves the spotlight which has been put on them recently.

Iran to hold specialized exhibition in Kirkuk in late Oct.

Permits issued for establishment of 26 industrial, mining research centers in a year

The country’s average annual coal concentrate production is about 4.3 million tons, while the country’s current demand has reached two million tons.

Currently, Iran’s coal sector provides employment for 17,000 people, however the capacity of the country’s coal mines is much more than this figure, and development of the mining sector and modernization projects can play an effective role in increasing employment in this sector.

Unofficial data indicate that there are 185 small and large coal mines in the country, of which more than 80 percent are currently active, while mines are being equipped and prepared, and the rest are idle.

Iraq exports tea to 12 countries in three months

The IMIDRO data put the coal extraction in the first three months of the present year at 306,626 tons, while the figure was 474,200 tons in the same time span of the past year.

As previously announced by IMIDRO, the annual production of coal in Iran reached 1,585 million tons in the previous Iranian calendar year 1398 (ended on March 19).

Iran, EAU to set up 3 working groups on expansion of trade

The two sides also agreed to hold a business forum in the current Iranian calendar year (ends on March 20, 2023).

He noted that the protocol of the current meeting included Iran’s proposals for the formation of a banking working group, joint working group on transportation and transit, as well as cooperation in the fields of investment, and free trade zone; the EAEU’s proposals to solve those proposals after reviewing them.

During the online event, the parties agreed to the ongoing cooperation between the trade associations of the two sides to address EU and EAU’s proposals on the agreement between Iran and EAU.

The two sides also underlined the need for raising awareness in the private sectors of Iran and the EAU. The two sides also agreed to hold a business forum in the current Iranian calendar year (ends on March 20, 2023).

TEDPIX hits record high of 1.9 points

The two sides also signed a nearly $300 million contract for the construction of South West Karoun Pumping House, which is estimated to be the country’s biggest upstream treatment plant.

China's hunger for crude is waning

By Alex Kromer

As the coronavirus epidemic brought the world's second-largest economy to a near-halt during the early part of the year, surging global oil prices led to a momentary buying sprees, but now the Chinese bounty appears to be ebbing. China's crude oil imports are up by a mere 5%, a clear sign a weakening factor of a buying spree, as expected by a key oil price factor. In May, China's crude oil imports tumbled 2.9% year-on-year to 10.97 million tonnes, with imports declining at 14.70 million tonnes, or 11.34 million barrels a day, according to Bloomberg.

The furious buying by the world's largest crude importer, a key oil buyer from the Chinese market, were able to stage a quick come back from their historic lows in April.

But after two consecutive months of heightened purchases, Chinese imports of crude have cooled dramatically in the month of June, with traders from June 10 to July 1, China's crude imports fell 3.5% year-on-year to 10.97 million tonnes, with imports declining at 14.70 million tonnes, or 11.34 million barrels a day, according to Bloomberg.

But after two consecutive months of heightened purchases, Chinese imports of crude have cooled dramatically in the month of June, with traders from June 10 to July 1, China's crude imports fell 3.5% year-on-year to 10.97 million tonnes, with imports declining at 14.70 million tonnes, or 11.34 million barrels a day, according to Bloomberg.

NATIONAL IRANIAN SOUTH OILFIELDS COMPANY AHVAZ-IRAN
TENDER NO.: 08-38-9740017

National Iranian South Oilfields Company (NISOC) intends to purchase the following goods:

<table>
<thead>
<tr>
<th>Items</th>
<th>Material Description</th>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>PARTS FOR WENZEL HYDRAULIC DRILLING JAR</td>
<td>65</td>
</tr>
</tbody>
</table>

Vendors who intend to participate in aforesaid tender are requested to send their “Intention To Participate” letter via fax to the following number along with their resume according to Qualitative Assessment Form No. 1, available at www.nisoc.ir, not later than 14 days after the second announcement, otherwise, their requests for participation in the tender will be disregarded.

The applicants should have relevant background in supplying the required goods and capability to provide and submit a bid bond of 3,460 EUR or 677,274,500 RIAL, in favor of NISOC.

Tender documents including the materials thorough technical specifications and Qualitative to Assessment Form can be accessed via: www.nisoc.ir-material procurement management tab

ONLY ACCEPTABLE DELIVERY TERM IS D.D.P., NISOC’S WAREHOUSE, AGHAJARI IRAN, PAYMENT TERM IS C.O.D., SUBSEQUENT TO NISOC’S MATERIAL APPROVAL NO ADVANCE PAYMENT WILL BE PAID

The whole alliance of the West in the Middle East is based on geo-political terrorism and is unrelated to human or anti-terrorism forces.

Legitimation in the West of Israel was accomplished by the demobilization of Arabs as a race, Palestinians as a nation, and Islam as a religion.

It is Iran that is genuinely fighting terrorism: Richard Falk

CBSi posted a threat of anti-Iranian political developments, especially in Iraq. Iraq will be the next in line.

The Palestinian state is in a critical condition due to the intransigence of its leaders and due to the fact that the Peace Process is dead. The so-called “peace process” has never been anything but a process of Israeli aggression and occupation.

The cease-fire of 1973 was not a genuine cease-fire, but rather a facade of peace. The Israelis had been occupying the West Bank and Gaza since 1967, and the cease-fire did not end the occupation.

The peace process has been a facade, a sham, and a charade. It has never been about peace, but rather about the continued occupation of Palestinian land.

The Palestinians have been subjected to constant human rights violations, including theft, torture, murder, and displacement.

Iran prepares strategic plan for tourism development

Over 84,600 allocated to tourism projects in Kohgiluyeh and Boyer-Ahmad

TEHRAN – A budget of 180 billion rials (259,000 rials) has been allocated to tourism and development projects across southwestern Kohgiluyeh and Boyer-Ahmad province, a provincial tourism chief has said.

The budget is planned to be spent on restoring and reviving historical buildings and structures as well as handcrafts and minor sectors, CHTN quoted Majid Safai as saying on Monday.

Kohgiluyeh and Boyer-Ahmad province is known for its nomads and nomadic life, tourist attractions include 39 historical and natural areas, as well as a historical village and rural family for a while or enjoy an independent stay and associate with them with a family. It also gives up an opportunity to feel rustic routines, their agriculture, traditions, arts, and culture.

The province attracted over four million people, mostly domestic travelers, during the Iranian New Year holiday, and the highest placed him planned in the province, according to data announced by the provincial tourism department.

Beyond Iran’s tourist attractions: the places and people to visit in Iran

By Pashmina Binwani

Arriving in Taft, just 30km from Yazd, I was picked up from the train station by a man who showed me around Taft, the town where the ancient salt mine is located.

Due to its dwindling population, only about 300 families live on a hillside here. This is the place where salt was extracted from the ground for centuries.

In 1993, miners in the Douzlakh Salt Mine, near Hamzehli and Qeshm, discovered a 1750-year-old mummy, which was later identified as a member of the ancient Zoroastrian community.

The find indicates the consumption of raw or unrefined salt by the ancient population. It is believed to be the oldest known example of salt consumption in the world.

Salt mummies are the highlights of the findings in the mine. In 1993, miners in the Douzlakh Salt Mine, near Hamzehli and Qeshm, discovered a 1750-year-old mummy, which was later identified as a member of the ancient Zoroastrian community.

The British and French were interested in the mummies and their potential for archaeological research. They believed the mummies could provide valuable insights into the lives of the ancient Zoroastrians.

In 2003, a systematic excavation began, and more mummies were discovered, and a sixth remained in situ, due to lack of funds for its excavation. The context of the remains suggested that a collapse in the mine had caused the death of the miners in question.

The first mummy, dubbed the “Saltman,” is on display in the National Museum of Iran in Tehran. It still looks very impressive.

Book on earthquake resistance of historical structures hits stores

TEHRAN – A book containing 134 scientific and technical articles on the earthquake resistance of historical structures has been published and introduced to the market.

Compiled by Iranian researcher Alireza Amid, the book has been brought together under the title “Seismic Improvement of Heritage Structures,” which is the first International Symposium on Seismic Rehabilitation of Heritage Structures, which was held at the University of Tehran in January 2017, CHTN reported.

Earthquake in Taft

This particular “saltman,” also based on the archaeological material found with him. Later, the mummy was dated to “before present” or 1750 years ago, the height of the Sasanian Empire. It is situated in the central province of Yazd since the beginning of the current Iranian calendar year (started March 21), though the coronavirus outbreak has caused the closure of many tourist attractions.

The royal city of Persepolis ranks among the restored monuments, which have no equivalent, considering its unique architecture, urban planning, construction technology, and art. The city’s immense area was found to be 70% occupied by Persian residential structures, while the remaining 30% were used for agricultural purposes.

The first mummy, dubbed the “Saltman,” is on display in the National Museum of Iran in Tehran. It still looks very impressive.

By far, the most impressive building in the city of Varamin was the Masjed-e Nour, which ranks number five in the list of the most beautiful mosques in Iran.

This 13-bay ensemble of majestic arches, monumental stairways, horse rooms (Apadana), reception rooms, and dependencies is classified among the world’s greatest architectural works.

The building was constructed in 1657, during the reign of Shah Abbas I, and is considered an architectural masterpiece of the Safavid era.

Over 100 historical monuments restored in Yazd

TEHRAN – Over 100 historical buildings and structures have been restored across the central province of Yazd since the beginning of the current Iranian calendar year (started March 21), though the coronavirus outbreak has caused the closure of many tourist attractions.

A country that ranked the third fastest-growing in the world is now facing the most challenging situation in its entire history due to the effects of the coronavirus pandemic.

In 2020, the country has encountered the worst economic situation in its history, with many businesses forced to close and the unemployment rate reaching unprecedented levels.

The situation has also had a significant impact on the tourism sector, with a drop in domestic and foreign tourism. According to data from the Tourism Organization of Iran, the number of domestic tourists in the country decreased by 60% in 2020 compared to the previous year.

The tourism industry is a major contributor to the economy, providing employment opportunities for millions of people. However, the pandemic has caused a severe setback for the industry, with many hotels, resorts, and tourist attractions forced to close.

The government has taken several measures to support the tourism sector, including financial aid for affected businesses and the development of new tourism products. However, these efforts have not been enough to reverse the situation.

The pandemic has also had a significant impact on the economy, with a drop in domestic and foreign investment. The government has been forced to implement austerity measures to reduce the budget deficit and maintain economic stability.

The situation is expected to improve in the coming months, with the vaccine rollout and the easing of lockdown measures. However, the industry is likely to take several years to recover fully from the impact of the pandemic.
Iranian scientists develop system for real-time diagnosis of COVID-19

A team of Iranian researchers have developed a system based on artificial intelligence and machine learning that allows for real-time diagnosis of COVID-19. The system can analyze data related to the disease and provide immediate diagnosis, allowing for faster treatment and更好的 containment of the virus. This technology could be a game-changer in the fight against COVID-19 and other infectious diseases.

Trump can't weaken California's climate change carbon market, federal judge rules

U.S. District Judge William B. Shubb, however, said California hasn't exceeded its legal limits or intruded on the President’s foreign affairs power.

California beat President Donald Trump’s efforts to water down its signature climate-change initiative, a market-based program that’s designed to reduce carbon emissions.

A federal judge in Sacramento on Friday dismissed a lawsuit filed by the Trump administration that required hundreds of businesses to purchase greenhouse gas credits or face fines. Environmental groups say the decision could help protect the nation’s largest carbon market.

The decision marks the latest in a string of battles between the federal government and the state over a multitude of issues, including the environment and immigration. The two sides have split many of the past two years in particular fighting over California’s efforts to reduce greenhouse gas emissions.

The federal government argued that the alliance under which California trades credits is an international agreement that must be upheld. California has shown no “concrete evidence that the President’s power to speak and bargain effectively on foreign affairs has been weakened,” Judge Shubb wrote.

The judge said the state law complied with international law.

“California’s Government has defined this clear constitutional structure,” federal officials argued in court papers. “They have positioned the State in open opposition to the federal policy of the United States on greenhouse gas emissions.”
Saudi King Salman, 84, admitted to hospital

Saudi Arabia's 84-year-old ruler, King Salman bin Abdulaziz, has been admitted to hospital in Jiddah, suffering from an infection of the gall bladder, state news agency SPA said Monday.

The king, who ruled the world's largest oil exporter and claimed by some to be the world's richest man for many years, was admitted to hospital on Sunday night.

King Salman, the custodian of Islam's holiest sites, spent more time in hospital at the Al-Tauouf building in Jiddah from June 2012 before becoming king. He also served as governor of Riyadh province for almost four decades.

The de facto ruler, who is popular among many young Saudis, has won praise for his role in focusing social restrictions in the ultra-conservative kingdom, giving more power to women and pledging to diversify the economy.

To the king's supporters, this being at home and abroad was a welcome change after decades of stagnation, stagnation and stifling.

The kingdom, which says that it must diversify its economy in the kingdom in the face of the steady growth and the daunting debt the kingdom faces, orders the state to spend billions of dollars in government-related endeavors to attract investment.

However, the king's political opponents, who are further to the right of the political spectrum, have been arrested in recent years.

The king's positions, which have been criticized by some as having put the kingdom at odds with regional and international leaders, have been a byproduct of U.S. political infighting and aimed at reducing the U.S. military presence in the kingdom, which has been a source of tension in the region.

In the midst of this, the kingdom has also been facing a growing number of protests over the kingdom's policies and the lack of political freedom in the country, leading to a growing number of arrests and detentions.

The U.S. has been a key ally of the kingdom, providing significant support to the kingdom in its efforts to maintain its position as a regional power.

Saudi King Salman admitted to hospital.

U.S. protests: Troops ‘kidnap’ protesters into unmarked cars

Trump not ready to commit to election results if he loses

Donald Trump is refusing to publicly commit to accepting the results of the upcoming White House election, raising a fresh threat he made weeks before the election that he would refuse to accept the results of an election he loses.

According to The Associated Press, citing an unnamed source, that top-secret meeting took place Friday, Nov. 20, shortly before news media reported that the election had been decided.

The meeting took place at the White House and was attended by several high-ranking officials, including White House staff, members of the President's campaign, and members of the military.

The meeting was reportedly held to discuss the possibility of the President refusing to accept the election results, and how to handle any potential legal challenges.

However, the meeting was held in the context of a growing backlash against the President's claims of fraud in the election, and the growing possibility of a transition of power.

The meeting was reportedly attended by the President's chief of staff, Mark Meadows, as well as members of the President's legal team.

The meeting was held in the context of a growing backlash against the President's claims of fraud in the election, and the growing possibility of a transition of power.

The President's refusal to publicly commit to accepting the results of the election is a departure from his previous statements, in which he has repeatedly said that he would accept the results of the election.

Iran enjoys a golden generation: Afshin Ghotbi

In an exclusive interview with IRRAN, former national football coach Afshin Ghotbi underlined that his players can make Iran once again a strong force in Asian football.

Ghotbi: After the historic promotion on November 2, 2019, we diligently created a strategy to prepare the selection to be able to compete in the Chinese Super League. Our budget in one of the lowest in the world, if the not the lowest, so we have had to be pragmatic, offensive in our decision.

Corona virus created a global pandemic and our generation is never experienced, so there has been a sense of vulnerability because we have to be prepared in preparing the team.

COVID-19 has shut down the sports, however the many countries have started their competitions since last month. For those coaches who has worked in many countries, cannot even think to play by being closed the doors since many years. We have to be prepared without fans.

-I am the soul of the game. They provide the sight and sounds inspiring musing inspirations from the players and teams. The players will have to find dynamic ideas and ways to express their emotions to create a spectacle worth watching for fans on television or online.

We have a rare opportunity during this pandemic to be a symbol of hope for our people, of development, of possibility, to get 90 minutes away from all the challenges people are facing in their lives. As Bin Yezid's assistant, you helped South Korea to beat star-studded France in the World Cup. A year later, you were appointed as Perspolis coach and inspired them to win the league title after six years. You made a great job since Perspolis had suffered six point deduction at that time. Just tell us about the last match against Sepahan, where Perspolis won the title in the dying moments of the match.

This day will be remembered by all Perspolis and football fans forever. The award received, the trophy, the celebration, was a momentous day for the eventual victor. But the way we triumphed on this day in May 2018 is the most important. Against all odds, heart of a lion, courage, passion, team work, human spirit, and God's favor was needed.

It was written in the stars, and forever it will be a source of inspiration for everyone who witnessed and experienced this season.

You were chosen as Iran national team coach in 2009 but went with nothing with the team. Under your stewardship, Iran lost to South Korea in the 2010 World Cup. What did we learn from that experience? world cup match.

The situation of winning nothing is quite harsh. Success is defined and measured differently at different times, and history is more a reflection of people's opinion rather than the facts. There were extraordinary political, social, economical and human conditions in that period between April of 2009 and January 2010. Sometimes are better explained. As my enduring love for my country and national team will never allow me to speak negatively.

You returned to Iran after many years of absence. What did you learn during your time away? Why did you leave to join the team Jan shahinjouan, was it important for you to play for an exceptional decision?

I truly enjoyed my short time at France, we have a clear reason for my departure. Please allow me to request respect for football club and fans and not discuss internal matters and events.

And last question. Iran have a difficult path to advance to the 2022 World Cup for a third time in the period. The 'Persian Lions' will have to win their four remaining matches. Do you think Draght Shahr can make it happen?

- I am not familiar with Mr. Draght Shahr's work, so I cannot inform about his ability. But we are enjoying the availability of a golden generation in Iranian football. We have great players and the Iranian players are given the proper foundations. We have to show the world that they can compete with the best. Later in time, I belive Iran will qualify for 2022 World Cup.

Milad Elabdour happy to be back in the game

The prestigious Ballon d’Or, awarded by France Football magazine, is cancelled this year due to the coronavirus pandemic, the organizers confirmed Monday.

There will be no edition in 2020, because it turns out, after thoughtful consideration, that all the conditions are not met,” said Pascal Ferré, the editor of France Football.

The Ballon d’Or has been given out every year since Stanley Matthews won the first one in 1956. Lionel Messi has won it a record six times – one more than the first one in 1956. Lionel Messi has not met,” said Pascal Ferré, the editor of France Football.

They have announced that they would produce artworks to showcase cartoonists and writers who launched the Moshahnoar movement, in other series including “Black Summer” by Matthew Alboust from Australia, “Arctic Heroes – Where the world is melting” by Christina de Rivas from Spain, “Arctic Heroes – Where the world is melting” by Christina de Rivas from Spain, “The movies have been produced at Iran’s Institute for Persian audiobook of Osamu Dazai’s “Setting Sun” released for Oskar Barnack Award

A scene from Iranian director Majidi’s “Muhammad, the Messenger of God”. “Muhammad, the Messenger of God” was Iran’s submission to the best foreign language film category at the 88th Academy Awards.

Renowned international craftsmen and artists such as编辑 Robert Perpignani, special effects director Scott E. Anderson, makeup designer Gianetto de Rossi and Indian composer A. R. Rahman collaborated with Majidi in the production.

Vocalist Salar Aqili to do online duet with pianist wife Harir Shariatzadeh

Vocalist Salar Aqili and his pianist wife Harir Shariatzadeh will be presenting an online duet on Friday evening.

He had called the collaboration with Parastui and Jamshidi to keep the spirits of people battling with the disease. I know some may have suffered and as soon as you are wealthy, you go toward poverty.

There are no winners or failures, only people who have to take a position.

In “Just 6.5”, the city is brimming with drug addicts, murderers and as soon as you are wealthy, you go toward poverty.

Salar Aqili and his pianist wife Harir Shariatzadeh have chosen to stay home during the lockdown since there are no visitors, buyers, or dealers. Their director of the Dhi Gallery in the central Iranian city of Isfahan had said she had shut down the gallery for one year and plans to hold only online exhibits. It is not good in a condition that those days with the rapid spread of coronavirus and other diseases, the government has not supported them during the hard days of the pandemic coronavirus. They expect the government to purchase artworks or extend loans to them so that they can continue their activities, in addition to what they believe the art will fare irreparable losses.

Iran’s Ministry of Culture and Islamic Guidance canceled all art, cultural and cinematic events across the country in February in an effort to prevent the spread of the coronavirus pandemic. However, gallery owners prefer to continue the lock-down since there are no visitors, buyers, or dealers.

She asked the government to support the cultural owners through loans or else they will be forced to take a cottage in the countryside. For the first time in the award’s 40-year run, the ceremony to present both winners in the official competition and the Newcomers category will be held in Wetzlar on September 25. One winner will be selected from among the winners at the Ernst Leitz Museum and Leica Galerie network worldwide. The ceremony will be held online in a bid to minimize the impact of the pandemic.

She is planning to promote the exhibits on the pages of several active artists and gallery owners have big problems.

Anil Deshmukh wrote a letter to the Ministry of Electronics and Information Technology to lift the ban on Iranian movie “Najibeh” directed by Mostafa Gandomkar and “The Expansion of Tehran satellite towns, which is a very important project, will be announced later. The current government has been responsible for the occupation of Japan by American forces and art aficionados also visit the exhibits by
