Agricultural projects worth $809.5m inaugurated in 3 provinces

Iranian President Hassan Rouhani, on Thursday, inaugurated three major agricultural projects valued at $1.34 trillion rials (about $809.5 million) via video conference in three provinces, IRNA reported.

Among the mentioned projects, namely an irrigation system in southern Hormozgan province, an irrigation system along the sloping lands of west Larestan Province, and a greenhouse complex in the central Yazd Province, were inaugurated as part of the government's programs for the realization of the production in surge momentum. Speaking in the inauguration ceremony, Rouhani said: "We cannot meet the agrarian problems in this country, so we must change the traditional culture and production ways into industrial methods.

The ban has affected millions of Muslim Americans. It has cut them off from their families, friends, and loved ones who are barred from entering the United States. It has also barred people from violence, those hoping to access medical treatment, or pursue their careers.

Let's have a peek into the roots of the ban. Is Trump an ideologue who believes the ban as a necessity for national security and safer America?

Iran, Russia, and China are aiming to reach a long-term diplomatic solution to the nuclear deal. The deal, known as the Joint Comprehensive Plan of Action (JCPOA), was signed in 2015 by Iran, China, Russia, and the United States. The deal aimed to prevent Iran from developing nuclear weapons and to lift sanctions on Iran in exchange for restrictions on its nuclear program.

Iran Air Force extends range of Sidewinder air-to-air missiles to 12 miles

The Iran Air Force has extended the range of its Sidewinder air-to-air missiles to 12 miles, according to a report by Press TV. The report states that the extension is in response to the United States' efforts to tighten sanctions on Iran.

Iran-China co-op shows failures of U.S. maximum pressure: ex-Pakistan army chief

According to the Post article, Trump’s “maximum pressure” campaign has failed in several ways, including the recent attacks on the Venezuelan oil industry, which the Washington Post attributed to “demonstrating U.S. impotence” as Iran gains more attention.

Pakistan students in Iran hold virtual session on Kashmir

The event was organized by the Pakistan Students Association in Iran, which has been advocating for the right to self-determination for Kashmiris for decades. The event aimed to raise awareness about the issue and to highlight the continued occupation of Kashmir by India.

Ukraine says decoding of downed UIA Boeing is successful

The Ukrainian government has announced that the decoding of the downed UIA Boeing 737-800 plane in Iran has been successful. The plane was carrying 176 passengers and crew when it crashed on January 8, 2020, and there were no survivors.

Political developments in the Middle East

The Middle East continues to be a region of political tension and conflict. The U.S. withdrawal from the Iran nuclear deal in 2018 has had far-reaching implications, including the reimposition of sanctions on Iran.

The United Arab Emirates has announced that it will not recognize Israel, following the United States’ recognition of Jerusalem as the capital of Israel. This decision comes amidst ongoing tensions in the region, including the Israeli-Palestinian conflict.

The U.S. has imposed sanctions on Iran and has threatened to further tighten the sanctions if Iran does not comply with the terms of the JCPOA. The Islamic Republic has vowed to continue to support the people of Yemen and to resist U.S. aggression.

In the latest developments, the U.S. has imposed additional sanctions on Iran, targeting its nuclear and missile programs. These sanctions were imposed in response to Iran’s alleged non-compliance with the terms of the JCPOA.

The Iranian government has responded by calling for a diplomatic solution to the tensions in the region. Iran has also called for the lifting of all economic sanctions against it.

The situation in the Middle East remains complex, with multiple stakeholders involved. The region is facing economic challenges, including the impact of the coronavirus pandemic on oil prices.

Parallel developments in the region include the ongoing conflict in Yemen, where the Saudi-led coalition is fighting against Houthi rebels. The conflict has led to widespread suffering and displacement.

The United Nations has called for a political solution to the conflict, emphasizing the need for a ceasefire and the protection of civilians.

Political developments in the region continue to evolve, with changes in U.S. policy and the range of stakeholders involved. The region remains a key area of strategic significance, with implications for global security and stability.

Khosravi border between Iran, Iraq, reopens

ECONOMY TEHRAN—Khosravi border crossing between Iran and Iraq was reopened on Thursday after several months of closing due to the coronavirus pandemic, the spokesman of Islamic Republic of Iran Customs Administration (IRICA) announced.

Babak Razzaghi, a member of the Branch of the Head of Custom Administration, said the Khosravi border crossing was reopened following the announcement from the Iraqi side.

On July 1, the official said, “Iran has been already announced, the reopening of the border crossing.”

The Iranian government has agreed to reopen the border crossing after several months of closing due to the coronavirus pandemic, the official underscored.

“Trade from the mentioned crossing border crossing between Iran and Iraq will return to normal and will continue to increase,” he added.

Head of Iran’s Border Crossing Authority, Qasem Atabaki, announced on July 6 that the country’s Prime Minister, Hassan Rouhani, had agreed to reopen the trade border crossing between Iran and Iraq.

“According to this decision, 250 shipments will enter Iran through the Shalamcheh border gate in the next two days and a week after the Shalamcheh border gate and the border crossing for Iraq.”

Qasem Atabaki, the head of the Iraqi Border Crossing Authority also confirmed that “the exchange of goods is allowed and the entry of passengers through the border crossings for any reason is prevented.”

In mid-May, the Iranian Border Crossing Authority closed border crossings with Iraq and its neighbors to prevent the coronavirus outbreak.

Trade co-op discussed between Iranian, Italian businessmen

ECONOMY TEHRAN—The think tank European House in Tehran has co-ordinated an online event, aimed at discussing avenues for trade co-operation between European businessmen and Iranian counterparts.

“Although the U.S. renewed sanctions against Iran remain in force, numerous European businessmen have continued their ties with the Iranian private sector in trade and investment activities, wishing that Iranian companies continue to be a reference point for their Iranian counterparts.”

Khosravi also acknowledged the special role Iran and Italy play in the region and stressed the need for close ties between these two countries to the Iranian side.

While appreciating the commitment and hospitality shown by the Iranian side, he pointed out the deep political and cultural ties as well as the significant number of Iranian companies and Italian businesses’ strong relationships in Iran and Iraq for their joint expectations of enhancing their cooperation.

The representative of the European Commission’s Chamber of Commerce, Massimo Khassani, encouraged participation to be on Iran's village in Yazd is established in an area of 15,000 square meters, he said. He described it as a local initiative and a local support.

Oil revenues for the world’s largest oil exporters, Saudi Arabia, continued to tumble in May as the spread of the virus, its oil price war with Russia, with the income from oil exports plunged to a nine-year low, according to new data from Saudi Arabia’s General Authority for Statistics.

Saudi Arabia’s total exports plunged in May 2020 compared to April, according to the Saudi General Authority for Statistics (GSA). The value of oil exports was the main drag on overall Saudi merchandise exports in May, which amounted to 388.3 billion Saudi riyals, or $103.3 billion, with the combined oil income falling 65.8% year-on-year to $10.2 billion, the General Authority for Statistics said.

The share of oil exports in total oil exports declined from 78.6 percent in May 2019 to 63.4 percent in May 2020, as the Kingdom made good on its promise to flood the market with its oil to drive down prices. The oil produced this month is equivalent to nearly 4.205 million tons of products, according to the Director of Pars Petrochemical Company (PGOC).

The tracker defines clean conditional policies as those that “are stated to support the transition away from fossil fuels, but unspecified about the implementation of appropriate environmental safeguards. Examples include: large hydro-power; rail public transport and electric vehicles (i.e. cars, buses, scooters, buses etc) using multiple energy type.”

This means that G20 members are spending— and planning to spend— on the electrification of transport or on houng renewable energy capacity to produce the power required for this electrification drive.

On the other hand, the 19 countries and the European Union that make G20 plan to invest only 12% of their fossil fuel money on unconditional oil and gas—for example in the production and consumption of oil and gas—without any climate targets or additional pollution reduction requirements,” as the tracker puts it.

This doesn’t look too well in the case of the climate change narrative but, of course, there are marked differences in spending priorities among G20 countries. The European Union is among the best passing the summer peak consumption period in 2020.

According to the official, production of 2,000 megawatts of new power plants, up to 1,000 MW of productive capacity of existing power plants, with full capacity into the power grid and connection to the network. The expenditures have been among the activities carried out by the energy ministry.

Earlier this month, Iran’s Power Ministry’s Oil and Gas Power Projects Management Company, known as TAVANIR, announced that it was working on electricity consumption in the country round the clock. The peak consumption rate has been about 204 billion kilowatts, registering the highest power consumption so far in the history of Iran’s electricity industry. The official said that 14 provinces were in the red zone of peak electricity consumption and TAVANIR might be forced to cut some output.

“if consumers cooperate [and manage their consumption], we will get through the current weather crisis with Macbeth, otherwise we will have to impose some restrictions,” Rajabi said told IRNA on July 18.
Modern Stadium of Martyrs of Khuzestan Football Club (KSC)
If Salman dies tribal hostilities will mushroom in Saudi Arabia, says ex-advisor to Saudi finance minister
“MBS is making changes in every corner of the Kingdom”

TEHRAN - Professor Hossein Askari, an expert on Saudi Arabia who also teaches at the George Washington University, believes that “Sheikh Salman’s passing will not have a significant impact on Saudi Arabia’s foreign policy.”

Askari tells the Tehran Times that if the presumptive Democratic presidential nominee Joe Biden wins the election, “he will be undoing Trump’s most egregious foreign policy decisions that have made the US a pariah of the world.”

If Biden wins, MBS will face a lot of international ramifications. Askari has predicted that “If MBS becomes king, there will be a change in the policies of the US.”

He added that “The US is not the only country that is interested in the succession of the Al-Saud family. Agreement on succession is the way for his rise to power. Is the path to power paved with prisoners and torture. He paved the way for his rise to power. Is the path to power paved with prisoners and punishment? He paved the way for his rise to power. Beyond Iran’s tourist attractions: the people and places to visit in Iran

By Dhashima Rezvani

(Read 8/3)

The carpet, the smell of cumin, the beautiful patterns of traditional tiles, the carpet is a destination for the carpet lovers. The carpet is made from wool, silk, or cotton, and the design is made from thousands of knots that are tied by hand. The carpet is not only used for decoration but also for insulation. The carpet is a symbol of Iran's culture and has been woven for centuries. In the past, the carpet was used as a currency, and it was also used as a way to show off the wealth of a family. The carpet is a symbol of hospitality and is used to welcome guests. The carpet is a symbol of strength and endurance, and it is also a symbol of the diversity of Iran's culture.

Irans documenting inscriptions in Persepolis Naqsh-e Rostam

TOU R E M • TEHRAN – A documentary project has been commenced on the inscriptions in Persepolis and Naqsh-e Rostam by the National Library in Tehran.

TOU R E M • TEHRAN – The restoration project aims to repair and strengthen the masonry elements that have been damaged by natural disasters, including earthquakes and drought, and the decoration of the garden around it during theトンル and the carpet before and after the restoration. The site is maintained by the Iranian Cultural Heritage Organization.

development of aquaculture in drought-affected areas on agenda

The province of Gilan, Mazandaran, Golestan, Khorasan and Khorasan Razavi are among the provinces that are struggling with water scarcity.

Iran plans building desalination plants along Persian Gulf, Sea of Oman

The volume of plastic entering the ocean annually could nearly triple in the next 30 years, making it more than four times the weight of all known species on the planet's waters than fish, according to a new analysis.

The study found that this volume could double annually to reach 150 million tonnes each year by 2050. Since plastic does not degrade, it would amount to a total of 900 million tonnes in the ocean by 2050. The study was published in the Environmental Science & Technology

Large corporations have offered to alter their packaging in the last five years, but their actions are no solution to droughts, and desalination projects are too costly and too slow.

fish farming along with agriculture is one of the methods that can be used to reduce plastic use, and fish farming is increasing because of the expected rise in the demand for fish.

The plan is prepared, through which, an eco-friendly approach to plastics, Mr Opsomer said. The organisation recommended that the reduction of plastic use be linked to the government's commitment to protect the environment and its implementation will start in the next fiscal year (March 2023-March 2024) and will take years to be completed.

The most urgent problem that must be solved in Anzali Wetland is the invasive species of common water hyacinth, which is a dangerous invasive plant that grows rapidly in the wetland and in our way to combat the physical removal of the plant, this invasive species spreads water evaporation 13 times and poisons the environment and creates competition for survival among native species. The plan is prepared, through which, eco-friendly approach with two important features will be implemented, including cross-sectoral cooperation that involves all stakeholders in the wetland.

Development of aquaculture in drought-affected areas on agenda

The major source of water loss in the wetland is caused by the invasive species of common water hyacinth, which is now our only way to counteract is the physical removal of the plant, this invasive species speeds up water evaporation 13 times, depletes water, and is now our only way to counteract is the physical removal of the plant, this invasive species speeds up water evaporation 13 times.

Ocean plastic could triple by 2040 and outnumber fish by 2050, study says

The volume of plastic entering the ocean annually could nearly triple in the next 30 years, making it more than four times the weight of all known species on the planet's waters than fish, according to a new analysis. The study found that this volume could double annually to reach 150 million tonnes each year by 2050. Since plastic does not degrade, it would amount to a total of 900 million tonnes in the ocean by 2050. The study was published in the Environmental Science & Technology.

Large corporations have offered to alter their packaging in the last five years, but their actions are no solution to droughts, and desalination projects are too costly and too slow.

Rights groups urge Bahrain to stop execution of protesters

U.S. protests: Chicago on edge over Trump's federal police forces

China orders closure of U.S. consulate in Chengdu

Inside the America

China has ordered the United States to close its consulate in the Chinese city of Chengdu, flirting with an escalating diplomatic spat as it seeks to punish Washington for blocking a bid to join the UN Human Rights Council.

The Chinese foreign ministry said on Friday that the American consulate in the southwest city of Chengdu is “no longer needed”.

The move is seen as the latest tit-for-tat response between the world’s two biggest economies. On Tuesday, the U.S. government ordered China to close its mission in Houston, Texas.

China has ordered the United States to close the consulate in Chengdu, a key US diplomatic post. The move comes after Washington ordered the Chinese consulate in Houston to close.

The Manama regime, in return, has ignored the calls and is pressing ahead with its heavy-handed crackdown on dissent and suppression of human rights campaigners and political dissidents.

**IPL 2020-21**

**to start in early October: official**

Tokyo 2020 must be 'simple and safe', says IOC’s Coates

Frank Lampard has said he regrets swearing in the direction of Chelsea’s fans at the weekend. Speaking in a news conference ahead of Sunday’s Premier League game against Burnley, the 42-year-old said: “I used, I do regret that. These things get replayed a lot on social media and TV. It’s disappointing that they do happen.”

He added: “But I’ve moved on from it. I’ve got a lot of good things to look forward to in the next few weeks.”

Lampard also said that he had been reassured by the Premier League that the game would go ahead as planned.

**Do Graham Potter’s latest comments signal the end for Alireza Jahanbakhsh at Brighton?**

One of the few direct transfer decisions for Brighton and Hove Albion this summer is the future of Iranian winger Alireza Jahanbakhsh. It was first reported that the striker was set for a move to Germany last month, with Leverkusen and Leipzig said to be interested in the 26-year-old. However, following his poor form for Brighton last season, it is thought the club might be willing to listen to offers for him.

Jahanbakhsh has scored 34 goals from 79 appearances at his previous club AZ Alkmaar and reports from Holland suggest Ajax want to bring the Iranian to the Eredivisie as a replacement for their departing striker, Hakim Ziyech.

In 2017/18 he was the leading goal scorer in the Dutch top flight with 21 goals and finished joint third with 12 assists. Jahanbakhsh is the first Asian player to score a goal in the Eredivisie and is the first Asian player to score a goal in the Eredivisie.
Iran’s Graphic Design Week pays tribute to Morteza Momayez

**TEHRAN** – Iran’s Graphic Design Week plans to pay tribute to Morteza Momayez, who is considered to be the father of modern graphic arts in Iran.

The festival plans to organize a poster exhibition named “Morteza Momayez: Art as Profession”, whose organizers announced on Thursday.

As the main organizer of the Graphic Design Week, the Iranian Graphic Designers Institute, the institute will distribute the exhibition every year on April 27, which has been designated World Design Day.

In the exhibition, “The Design of Momayez” (E-O-D), the institute will seek to bring to a new generation of designers his work and the professional values that he has built over his lifetime.

Twenty-five posters that have been selected to be showcased in the official section of the festival, Momayez had celebrated in 2001, at the age of 70.

The theme “Be Professional” is a reflection of the designer’s role, not only in designing, but also in setting up responsibilities towards humanity, the planet and culture, in addition to its statement for World Design Day 2020.

**TEHRAN** – Iranian writer and director Mohammad Tusi has been married to Mexican actress Denise Shakiel and has merged plays by Tennessee Williams and Persian playwright Mohammad Heidari Nuri in an exhibition of artworks in various media.

“Talk to Me” features Heidari Nuri’s current on display located at 42 East Mina Blvd., Naji runs until August 12 at the gallery located at No. 71, Khoddami St. off Mirdamad Blvd.

An exhibition of artworks in various media was presented by the 7th Vanak Square, The exhibit was located at 608 Shariati St., off Mirdamad Blvd.

Rasulbakhsh learned music from his father when he was about 10. He added.

“Shakeh has been living in Shiraz and was a graduate of dramatic arts from the Ministry of Culture and Islamic Guidance. She said that he wanted to complete and have a new role on the board of directors of the victory of the Islamic Revolution last year; however, he was not outstanding due to a lack of sufficient information.

He added that he had wanted to first be about how Shakiel was because he was not only a theatrical figure, but also was known as one of the champions of the early days of the revolution. "They are in 2018 when I decided to hold a memorial ceremony for the martyr, which very few people had been invited to, complex, he added.

"Talk to Me" tells the story of a writer who loses his divine love, which is his wife, due to some of his worldly issues. "The love, which is his wife, due to some of his worldly issues. "I staged this play to show my love of theater; I don’t like seeing theaters empty of people," he noted and added that "I will be producing more and more experiments in the future, which have been running since July 15.

**TEHRAN** – Iranian Baluchi qaychak virtuoso Rasulbakhsh Zangshahi died at 79

Zangshahi was a virtuoso of the Sistan-Baluchestan, where the qaychak is mostly used.

The melody had received an honorary doctorate after his performance in a music festival in France, and he believed to be one of the best musicians of Baluchest in Baluchi epic music.

"I have no project for production and involvement in a team in the production where there is no bright light and no opportunity to be low cost.

We are not in a good condition socially, and the spread of coronavirus has halted many artistic jobs. There is a large pause and people are not aware of their future, therefore, one cannot predict what will happen in the coming month."

"That is why launching a new film production and involving a team in the production where there is no bright light and no opportunity to be low cost.

We are not in a good condition socially, and the spread of coronavirus has halted many artistic jobs. There is a large pause and people are not aware of their future, therefore, one cannot predict what will happen in the coming month."

He performed with other great masters of Baluchest such as Molla Jan Mohammad, Shaheed Nosrat and Zangshahi.

Rasulbakhsh earned music from his father when he was only 14. His father and master Dormohammad played the qaychak in the development of his knowledge of music.

The Sistan-Baluchestan Department of Culture and Islamic Guidance in collaboration with a local organization in the province has recently released an album of his performances.

Zangshahi was honored with a Lifetime achievement award at the 35th Fair Music Festival. He said that he seems every new and then and that new important event occurs in the history of mankind where some can pass through safely and others suffer in the low cost.

An exhibition of artworks in various media was presented by the 7th Vanak Square, The exhibit was located at 608 Shariati St., off Mirdamad Blvd.
