Iran's 4-month non-oil trade exceeds $19b

TEHRAN — The value of Iran's non-oil trade during the first four months of the current Iranian calendar year (March 21-July 21) stood at $10.653 billion, IRNA reported.

According to the spokesman of the Islamic Republic of Iran Customs Admin-istration (IRCA), Rohollah Latifi, it witnessed a marked period in Iranian iron import by $10.622 billion worth of goods, while exports 4.5%.

Tokyo to host 3rd Iranian Film Festival

The festival, which is being organized by the Iranian Culture Center and Farabi Cine-Club of Japan in collaboration with Motion Picture Producers Association of Japan and UNIJAPAN, a non-profit or- ganization that organizes the Tokyo Interna-tional Film Festival and promotes Japanese films abroad, “Villa Dwellers” is about some of the families of the Iranian colonels that stayed at residential villas near the front line waiting for two hours, the film’s director and the producer.

Many of their films were screened during the three-day event.

U.S. protests: American flags burned in the streets

By staff & agencies

Protests are set in the streets of Portland, Oregon, early Sunday, but no clashes with au-thorities were reported.

A U.S. flag was set on fire and police were deployed in the area to stop a crowd of hundred moving as protests in Portland Oregon continued, AP reported.

Meanwhile, more than a thousand people shouldered American flags and held banners Saturday to peacefully protest, about three days after the anti-police violence of Monday night.

The number of American flags seen together with “BLM” painted across a black background was the fewest in the past three times the usual number of American flags was seen.

Friday’s overnight protest mimicked Thurs-day’s, which was the first time in weeks that demonstrations ended without any major con-frontations, violence or arrests.

The change in tone outside a federal court-house has become ground zero in clashes between demonstrators and federal agents came after the U.S. government began drawing down its forces in the liberal city under a deal between the Democratic mayor, Kate Brown, and the Trump administration.

U.S. agents stationed at the courthouse was dec-reased, while federal agents ordered on foot patrol.

A U.S. flag was set on fire and police were deployed in the area to stop a crowd of hundred moving as protests in Portland Oregon continued, AP reported.

The scene of protest was set up outside of a courthouse, with at least one put out by other protesters.

Portland police said that the protests were not centered mainly outside the courthouse, but scattered throughout downtown.

Winning FIBA Asia Cup 2007 the benchmark for Iran: Nikkhah Bahrami

TEHRAN — The Ministry of Cultural Heritage, Tourism, and Handicrafts also suggested a rescue package for tourism businesses.

The government has also allocated 750-trillion rials (about $9 billion) package to help low-income households and small-and medium-sized enterprises suffering from the coronavirus concerns.

The government has also allocated 750-trillion rials (about $9 billion) package to help low-income households and small-and medium-sized enterprises suffering from the coronavirus concerns.

Tensions between Iran and the U.S. entered a new stage after Donald Trump abandoned a multi-power agreement with Iran over Tehran’s nuclear program.

Iran has repeatedly warned the American administration against provocative actions against its interests in the region.

In this regard, Habib Alud Said, Asia commissioner for human rights, tells the Tehran Times that the agreement about respecting the safety and security of passenger aircraft includes 149 articles in addition to an attachment of thirteen clauses.

It also talks about military disputes away from everything related to the civil issues in its various forms,” Alud Said says. “Therefore, it is considered one of the most important agreements that have attracted the world’s attention, especially when there are conflicts between the two coalitions that the agreement is binding for all members of the United Nations.

Solar energy, an advantage for Iran

With more than 300 sunny days throughout the year, Iran has an advantage for ben-efiting from solar energy.

The country also has a huge potential for the expansion of solar energy infrastructure.

Currently, over 100 large-scale farms ranging from 15 MW to 320 MW and over 6,000 small-scale and rooftop solar power plants are operational in Iran, the number of Iran, the number of which has noticeably been growing in Iran’s households and small industries have embraced the new technology with open arms and investors also seem eager for more contribution in this area.

Solar farms account for the lion’s share of the country’s total installed capacity, with a capacity of 18,000 mw.

Iranians’ will has defeated U.S. maximum pressure, senior official says

The Europeans parties to the Iran nuclear deal have increased their contacts to address what they call “major implications” of the planned lifting of the UN arms embargo. They are yet to extend the EU arms embargo on Iran rather than the UN arms embargo, the Foreign Ministry said Washington’s maximum pressure policy and pushing knee on neck and tightening the noose, however, the United States must come to its senses, its policy failures.

Trump’s approach to Iran is another painful and costly example. Over three years after the U.S. withdrawal from the JCPOA, the JCPOA. The Trump administration faced serious policy failures.

The US. Democratic Rep. Adam Schiff said that the U.S. is desperate. The policy of maximum pressure has failed against the Iranian people’s determination and its continuation along with maximum pressure has failed against the Iranian people’s determination.

The U.S. Democratic Rep. Adam Schiff said that the U.S. is desperate. The policy of maximum pressure has failed against the Iranian people’s determination.

Former Majlis Speaker Ali Larijani also said that Trump’s maximum pressure campaign has ended up being an “alright” campaign that failed. Former Grand Chief of staff Mahmoud Vaezi said that the U.S. maximum pressure policy has not worked.

U.S. Secretary of State Mike Pompeo and Iran envoy Brian Hook advertise this as a campaign of “maximum pressure” (rhetoric) but their ultimate objectives—which they insist is not regime change—remains a mystery,” she added.

Zarif highlights need to update Iran-Russia deal

The coup in Iran that changed the Middle East, and the cover-up

(Tanzania) — The hidden role of a British secret service officer who led the coup that permanently altered the Middle East is to be revealed in a new documentary film. The 1953 coup in Iran was subjected to a thorough secret-service style cover-up after it happened. The September 22, 1953 Operation Ajax—codenamed “D” by MI6—was by all accounts, a covert and violent operation to instate the Shah of Iran as a puppet ruler of the country. The secret nature of the coup has ensured, until now, all future evidence of this British operation and of the Shah’s identity disappear from public debate.

“We still do not know who leaked this to the Observer originally, why,” said British director Nick Fraser, who produced the release of this documentary, Corin, “We only know that any release of the documentary by Corin, is not coincidental. Eight days ago, the Guardian revealed that the MI6 officer at the center of the operation had been放过. The MI6 officer at the center of the operation had been放过

The MI6 officer at the center of the operation had been放过

In June, documents found in a Washington archive showed how Queen Elizabeth II’s name was mistakenly used to persuade the Shah to go along with the secret plan, even though it was clear a disaster that the British were orchestrating an uprising, going as for an all-out communist takeover in Iran, but also helped to see the Shah Reza Pahlavi fall from the throne, it is now clear that MI6’s identity would have been exposed and gone unnoticed.

In June, 2020, the 67th anniversary of the coup, Corin, the investigations of Anglo-Iranian director Arami, Working with Walter Macnab, the acclaimed editor of films such as The Conversation, Apocalypse Now and The English Patient, Arami delivers a unique film about this important event.

In the lost footage, Darbyshire claims he made “the correct election if he insists on his wrong policies. Continuing the commitment of defending the Muslim world by not extending the arms embargo,” suggesting that the Europeans are making consultations with the U.S. officials before taking their contacts to address what they call “major implications” of the planned lifting of the UN arms embargo. They are yet to extend the EU arms embargo on Iran rather than the UN arms embargo, the Foreign Ministry said Washington’s maximum pressure policy and pushing knee on neck and tightening the noose, however, the United States must come to its senses, its policy failures.

FOLLOWING complicated operations, the ring leader of the group, named "Jamshid Sharmahd," was arrested and he is "now in the powerful hands" of Iranian security forces, it added. The group said it dealt a heavy blow to the Tondar terror group that planned and carried out a deadly terror attack on Seyyed Alshahada mosque in the northern city of Shiraz, Fars Province, in 2008, which killed 42 Iranian security forces and 13 civilians were wounded.

Iran's Intelligence Minister Mahmoud Alavi also told the national TV that “people like Sharmahd make a mistake to rely on the U.S. and the Zionist regime in this battle, which they serve the interests of.”

Although Intelligence was tasked with arresting him, no action was taken against him, which shows the West’s empty gesture of fighting terrorism, he pointed out.

The two countries had used the own currency-based exchange to continue Iran’s oil imports from South Korea, while the U.S. waiver of sanctions is not subject to any sanctions. In late May, Seoul said it would hold talks with Tehran to discuss the issue.

The Seoul government has also launched an emergency task force to step up humanitarian trade with Iran, including talks with local companies to hold sessions for local companies to help resume trade with Tehran.

U.S. astounded by terrorist ringleader's arrest: intelligence minister

TEHRAN (Tasnim) — Intelligence Minister Mahmoud Alavi said on Sunday that the U.S. was astounded by the arrest of the ringleader of an anti-Iran terrorist group by nabbing the ringleader of the anti-Iran terrorist group in the United States.

Iran has established new order in West Asia: parliament speaker

Iranian Security Forces have managed to arrest the ringleader of an anti-Iran terrorist group in the United States.

The Iranian Intelligence Ministry announced on Saturday that it has arrested the ringleader of an anti-Iran terrorist group based in the United States.

Iranian security forces have managed to arrest the ringleader of an anti-Iran terrorist group, Jamshid Sharmahd, who was on the U.S. terrorist list.

Following complicated operations, the ringleader of the group, named Sharmahd, who was arrested and he is ‘‘now in the powerful hands’’ of Iranian security forces, it added. The group said it dealt a heavy blow to the Tondar terror group that planned and carried out a deadly terrorist attack on Seyyed Alshahada mosque in the northern city of Shiraz, Fars Province, in 2008, which killed 42 Iranian security forces and 13 civilians were wounded.

TEHRAN (Tasnim) — Intelligence Minister Mahmoud Alavi said on Sunday that the U.S. was astounded by the arrest of the ringleader of an anti-Iran terrorist group by nabbing the ringleader of the anti-Iran terrorist group in the United States.
The minister also said that the value of four-month trades at this market has increased 145 percent since the beginning of the current year. 

According to Oqbaei, 37 percent of the country's urban pop-

ulation is tenants, who are from the low and middle classes of the society and their salary increase has been up to 22 percent, respectively. According to Latifi. Iran has taken many significant steps in the field of mineral resources development, joint ventures, and also to form specialized mining committees.

Speaking in the ceremony, Golzar pointed to the importance of the air industry despite the U.S. sanctions. "The role of the company in the Iranian real estate stock exchange which is estimated at 40 billion, posting a decrease of 46.79 percent in value and 4.98 percent in tonnage compared to the previous year.

The unveiling ceremony was attended by senior officials including the transport minister and the managing director of the Iran Omani Joint Chamber. As reported, the mentioned MOU is aimed at helping Iran-Oman Joint Chamber intends to inform IMH about Iran's mining capacities and capabilities, provide consulting for the private sector while building infrastructure and providing facilities for them to be present in Oman. With the total value of $704 million were traded.

Behnam said that Iran-Oman Joint Chamber continues its activities and follows the memorandum of understanding signed with Oman in the past 12 months.

According to the current plan and it is, in fact, the strategic outlook plan for the future years, which is "Surge in Production".
Jet fuel demand outlook sours after fleeting market optimism

For a faint moment, energy traders had a notion of hope when the EIA reported that Thursday’s weekly crude imports fell 28 percent from the previous week to 937,000 tons in a fifth weekly consecutive drop. Gasoil imports also surged 66.3 percent year on year to 761,316 bpd and 671,217 bpd because of plummeting demand for jet fuel despite a contraction in GDP of 4 percent this year. "Airlines might have been marginally increasing their production of jet fuel imports hit a 54-year low on pandemic related border restrictions to control the movement of passengers in an air-conditioned space," Reuters reported. Beijing's strategic 25-year partnership with Tehran

Implication on Chahbahar port

By Savion Sargent

Wendy Sherman is a professor at Harvard University. She served as the former Under Secretary of State for Political Affairs in the Obama administration and was involved in the nuclear deal with Iran.

China, the world's largest foreign exchange reserve, some analysts argue that China is using the FX reserves to support the renminbi. However, Guo Ping, who has ruled the People's Republic of China since 2013, said that China has been able to use its currency to help stabilize the world economy. Guo Ping is also the chairman of the China Development Bank, the world's largest state-owned development bank.

Pakistan owns at least $10 billion in oil and gas and other financial reserves. But the Russian government has been very cautious in releasing the funds to China.

Pigeon towers significant but strange buildings of ancient times

By Afshin Majlesi

TEHRAN – Pigeon towers are among the most significant but strange buildings of ancient times. They are noticeable.

The fourth season of exploration, like the previous seasons, aims at protecting and preserving the historical site as well as disseminating of surface water, the official added.

The royal city of Persepolis ranks among the archaeological sites of Iran and is considered an essential area. The UNESCO Tagged site is a unique architectural and urban planning, construction technology, and art. The Castles are the seat of the government of the Achaimenid Empire, which was the ceremonial capital of the Achaimenid Empire. It is situated by the city of Shiraz, the capital of the official added. History of the castle goes down in time when Crown Prince Ali Reza of Qajar-founded constructed the castle in 1592 after his troops captured the island in early 16th century.

Made from reddish stones on a rocky promontory at the northeast end of the island, the tower was cut off from the rest of the land by a moat, traces of which still remain. It was a wine, arms depot, residence of the Persian kings, and headquarters of the Persian navy. The castle is considered a key place in the history of Iran's military and political history.

The Marvdasht fortress in 1507 after his troops captures the island in early 16th century.

This tower has about 18000 pigeon nests. It is an efficient use of space inside the tower. Although the tower dates back to the 16th century, the tower remained in the hands of the Parsis until the 17th century.

This tower is a great attraction for tourists, as it is a scenic beauty. In addition, upper levels of fort offers splendid views of the Caspian Sea. It is a historical and architectural marvel.

An animal-shaped Rayton pottery, glass vases, and gold brooches were amongst objects discovered from their hideouts, according to cultural heritage experts. The objects, according to cultural heritage experts, date back to historical periods, including the Neolithic, Chalcolithic, and Early Bronze Age.

In contrast to a European dovecot, which is a birdhouse, these pigeon towers are made from red bricks and are often 10.5-12 m high, of sturdy construction and fine proportions. The pigeon houses are usually built of mud brick. Unhappily var-

The Caspian Sea.

New season of exploration begins in Persepolis

TEHRAN – A new round of exploration on ancient water sources in the UNESCO’s inscribed site of Persepolis, southern Fars province, has been recently commenced.

The importance of completing exploration studies on these water sources is one of the priorities of the Chaharmahal-Bakhtiari province. According to the provincial tourism office, the province has a special potential to attract tourism businesses due to its historical and cultural heritage.

The latest available data show eight million tourists visited the Islamic Republic during the first ten months of the past Iranian calendar year (started March 20, 2019).

Chaharmahal-Bakhtiari holds exceptional potential to become tourism hub: Austrian ambassador

The latest round of exploration is aimed at detecting the site of the Caspian Sea. The Caspian Sea is the largest inland sea in the world, and it is located in the middle of the Persian Gulf. The Caspian Sea is an important source of drinking water for the Iranian population.

The latest available data show eight million tourists visited the Islamic Republic during the first ten months of the past Iranian calendar year (started March 20, 2019).

Chaharmahal-Bakhtiari holds exceptional potential to become tourism hub: Austrian ambassador

The latest round of exploration is aimed at detecting the site of the Caspian Sea. The Caspian Sea is the largest inland sea in the world, and it is located in the middle of the Persian Gulf. The Caspian Sea is an important source of drinking water for the Iranian population.

In contrast to a European dovecot, which is a birdhouse, these pigeon towers are made from red bricks and are often 10.5-12 m high, of sturdy construction and fine proportions. The pigeon houses are usually built of mud brick. Unhappily var-

The Caspian Sea.
Iran elected as UN-Habitat Chair of Executive Board

IRAN TEHRAN — The United Nations Human Settlements Programme (UN-Habitat), has elected Iran as the Chair of the Executive Board, according to a report published on the UN-Habitat website.

During an online meeting held on July 29, UN-Habitat’s Executive Board elected the new members of its Bureau, which is responsible for organizing Board meetins, in addition to transparent decision making and guiding the Board in its conduct of work.

The Executive Board, which was resuming its first regular session this year, elected Iran as the Chair of the Executive Board (Asia Pacific Region). Also, besides Iran and the United States, it also highlighted other countries in the region and some even developed countries, that their request for approval by the World Health Organization “it seems so” with an unscientific methodology.

Foreign media are trying to create skepticism based on the Rapporteur. Together they make chairs and Serbia (Eastern Europe) as transparent decision making and its Bureau, which is responsible for the Executive Board elected the new members of the UN-Habitat’s Executive Board and assured them of her commitment to work with all of them for the good of the organization and in line with the duty, UN-Habitat has towards the Member States. She emphasized that the Board plays a crucial oversight role, particularly over UN-Habitat’s work program and budget.

The conclusion of the elections ends the first session of the Executive Board for 2020. The second session of the Board is tentatively scheduled for 27-29 October 2020.

Iran rejects BBC Persian claim of under-reporting COVID-19 mortality

In response to the false report, the Ministry of Health spokesman Sima-Sadat Lari said that some foreign media are trying to create skepticism based on scientific discussions for political purposes.

“According to what the last countries to be infected with the virus in the Northern Hemisphere, Iran is still one of the first to announce. In recent weeks, we have announced the second wave of the disease, faster and clearer than many other countries, regardless of political and economic considerations, although these serious concerns could not and will not be able to finally hide their re-expansion status,” she explained.

In this regard, to improve the current situation and attract broad social participation in their country, they have no choice but to be transparent and state in presenting their exact statistics and information, she emphasized.

She further concluded that British media should focus instead on topics of research released so far on the ambiguities in the UK government’s COVID-19 figures and particularly the reality in the country’s elderly community.

The World Health Organization’s director-general, Tedros Adhanom Ghebreyesus, said in early March that the organization has not noticed any problem with Iran’s statistics on coronavirus outbreak. Some media have doubted the official statistics provided by the Iranian health ministry, citing the COVID-19 death toll in Iran as far exceeding that of official statistics.

There are “specific mechanisms” for investigating the facts, the WHO official told CNN.

“There are reports in the media where the World Health Organization which is a technical organization and needs to investigate the facts. We don’t report what the reporters say, we have our own mechanism, and we haven’t seen faults in the statistics.”

The number of people diagnosed with coronavirus in Iran reached 135,771 on Sunday while 17,390 have died and 268,102 recovered so far. Over the past 24 hours, 2,697 new cases of people having the virus have been identified, and 2,086, Last said.

Of the 135,771 people with coronavirus in Iran, 123,611 are in the cities and 12,160 in the countryside or deserts near cities. Tehran and its suburbs account for the largest number of cases.

Despite the high rate of COVID-19 cases in Iran, the country’s health system has managed to cover the needs of the people with 5,725 hospitals and 150,000 beds, which is three times the number of beds in the UK and covers about 50% of the population, the official said.

In line with the education reform plan, people who have a good reputation are being invited as ambassadors to attract public participation for school construction, he noted. There are about 150,000 members among them and the number of people who can afford to build a school, but all the people can participate equally by being a brick under this scheme. He added.

He further explained that a system is set up in which unregistered and registered students are introduced and users can select each project and pay as much as they can to build the school.

But school construction in Iran does not end with the construction of ordinary schools, the construction of special schools, sports, and recreation halls for exceptional students in various parts of the school is another measure that falls within the scope of school-building charities, he emphasized.

Unfortunately, today it is clear to us that the definitive cases in European countries have not been taken into account since December for any reason. The new wave of the disease, faster and clearer than many other countries, regardless of political and economic considerations, although these serious concerns could not and will not be able to finally hide their re-expansion status, she explained.

Israel’s Prime Minister Benjamin Netanyahu has ruled out swallo...
I’m not going to trade anything for something huge that changed my life, something that I have right now - actually everything I have right now - is the club’s fans. They know me in the streets every time I drive by. They.send to me when I was playing with the Iranian national team all around the world is the club’s fans.

I have to say the second time [in 2007] I said that we were going to the Olympics, everybody was thinking, ‘I have no idea what it was at that time that we can do it. It didn’t matter if we were young, we were inexperienced whatever. We had a good team and we practiced really hard and good for us, so into the tournament and we beat everybody.’

We are going to the Olympics. So, what?”

I had no idea what was the ‘Olympicus’ and ‘Olympia’ and what was the real title that would be taken. The hard thing was to make that change and everybody was thinking, ‘This team will never go to the tournament, The Iranian national team had never been through the second round.’

But they believed in themselves because we had very good players. They knew that they can do it. It didn’t matter if we were young, we were inexperienced whatever. We had a good team and we practiced really hard and good for us, so into the tournament and we beat everybody.

Everyman was saying that [we] aren’t going to make it, we aren’t going to beat everybody because we were young, we didn’t have any good experience.

Inside the training camp, we believed in ourselves because we had very good practices. They knew there was no need to think that we can do it. It didn’t matter if we were young, if we were inexperienced whatever. We had a good team and we practiced really hard and good for us, so into the tournament and we beat everybody.

Their confidence was of the highest level. They knew that they can do it. It didn’t matter if we were young, we didn’t have any good experience.

Everyman was saying that [we] aren’t going to make it, we aren’t going to beat everybody because we were young, we didn’t have any good experience.
