Iran's oil industry attracts over $10b of investment in 5 months

TEHRAN – Over $1 billion of investment has been made into Iran's oil, gas and petrochemical industries during the first five months of the current Iranian calendar year (March 20-August 28) despite the ongoing of the coronavirus pandemic and the U.S. sanctions.

As reported by IRNA, since the beginning of the current year, which is called the year of surge in production, 22,412,000 bpd of oil and 66,025 bpd of natural gas have been extracted and 1,225,000 bpd of gas condensate has been produced from the country's fields. These figures are calculated by the country's Ministry of Oil.

The Ministry of Oil stated that the extraction of gas condensate from new and expanded fields during the period is the result of increased production of gas from the country's fields.

The Ministry of Oil also stated that the increase in the production of natural gas and gas condensate in the country is due to the reduction of the cost of production and the increase of the quality of the produced gas.

Iran's oil and gas industry is expected to see strong growth in the years to come, as the country is set to become a major player in the global energy market. The country has vast reserves of oil and gas, and is looking to attract foreign investment to help develop its infrastructure and increase its production capacity.

The country's oil and gas industry is also expected to benefit from the recent easing of sanctions imposed by the U.S. on the country, which has limited its ability to invest in the industry and export its products.

The Ministry of Oil also stated that the country is working on developing its petrochemical industry, which is expected to see strong growth in the years to come, as the country is set to become a major player in the global petrochemical market. The country has vast reserves of oil and gas, and is looking to attract foreign investment to help develop its infrastructure and increase its production capacity.

The country's petrochemical industry is also expected to benefit from the recent easing of sanctions imposed by the U.S. on the country, which has limited its ability to invest in the industry and export its products.

Iran unveils new portable radar

**POLITICAL**

TEHRAN — Iran's Air Defense Force on Wednesday unveiled “Kashef-99” radar, a mobile system to detect and track small aircraft and missiles.

Leader of the Iranian Revolution Ayatollah Ali Khamenei said on Monday that Iran owes its security to preparedness and vigilance of the air defense, “The focal point of the discussions was "constructive" and practical steps should be taken in this regard. The EU must continue to respect its commitments under the JCPOA, it said.

**POLITICAL**

TEHRAN — Chinese Ambassador to US said on Wednesday that if the United States reneges on the JCPOA, it “will automatically be re-imposed.”

The tweet. Chinese Ambassador to Tehran Chang Hua also said in a tweet on Wednesday, “It is the common belief that US neglects the international consensus and the main concern of the world community, it will automatically lead to the restoration of the JCPOA sanctions.

**POLITICAL**

TEHRAN — Ambassador to Brazil to Tehran Azeredo Santos has said that his country is opposed to the unilateralism on this issue, and this opposition is demonstrated not only by its actions but also by its tweets.

The EU believes that its normative dimension is an essential element of the JCPOA, and that the EU's opposition to the snapback by getting around the Joint Commission is a similar situation, Niger also followed in footsteps, saying it will maintain the position expressed by the former president of the Security Council.

The Security Council and prevent the misuse of the Security Council last month,” said Rouhani in a statement carried by the presidential website. “We’re starting with this decision... that could lead to the snapback process, a mechanism built into the nuclear deal on May 8, 2018, and thus it has lost all participants' rights envisaged in the deal including the right to trigger the snapback mechanism. In this case, it is essential to maintain that the right to trigger the snapback mechanism is going to be preserved, the mechanism built into the 2015 nuclear deal that allows participants to resume sanctions in case of non-compliance with its terms.

Iran rejects U.S. bid to restore UN sanctions on Iran

**POLITICAL**

TEHRAN — Iran’s ambassador to Ukraine has said that Iran rejects to seek suits to Ukraine which were stopped after the Ukrainian plane crash in early January.

The tweet.

**POLITICAL**

TEHRAN — Iran’s ambassador to Ukraine has said that Iran rejects to seek suits to Ukraine which were stopped after the Ukrainian plane crash in early January.

To the nuclear deal, tony alavi said that “Iran is ready to support the peaceful and productive uses of nuclear technology. Iran is ready to support the peaceful and productive uses of nuclear technology.

Shahram Mahmoudi might miss Olympic Games

IMMEDIATE TEHRAN – Iran national volleyball team will be without Shahram Mahmoudi for the Olympic Games in Tokyo.

The 32-year-old player has undergone spine surgery and is in the recovery process.

Mahmoudi has not chosen his new team for the upcoming season of the Iranian Super League.

He was a member of Iran national team in the 2016 Olympic Games in Brazil.

Iran national volleyball team have been drawn in Pool A along with Japan, Poland, Italy, the U.S., Russia, Argentina, France and Tunisia.

Iran will start the Tokyo 2020 Olympic campaign, now revised for 2021, with a match against Poland on July 24.

**Iran to meet Uzbekistan on Oct. 8**

IMMEDIATE TEHRAN – Iran national football team will meet Uzbekistan on Oct. 8 in their final match of the 2022 FIFA World Cup Europe Qualifying Round.

The match was originally scheduled for Sept. 7 but FIFA rescheduled the match due to the COVID-19 pandemic and it meant the Defenders, Lekhwiya, and Al Sadd have been upgraded to the FIFA World Cup 2022.

The 2022 World Cup Qualifiers were scheduled this year were postponded to 2021 due to the coronavirus pandemic.

**FIFA World Cup Qatar 2022**

The 18th edition of the World Cup Qualifying group stage and four best runners-up will advance to the AFC Asian Cup 2023 in China.

The 2023 edition of the World Cup Qualifiers will be held in China.

**Persepolis confirm Ehsan Pahlavan signing**

IMMEDIATE TEHRAN – Persepolis football club have signed one more player to bolster their midfield to sign Ehsan Pahlavan, who has most recently played for Tractor.

The 21-year-old midfielder has signed a contract for an undisclosed fee.

Pahlavan made his pro debut for Tractor.

The players arrive at the club less than two weeks before the AFC Championship and Persepolis will host Saudi Arabia’s Al Taawon in their first central match on September 15.

**Bahman Sedai dreams of playing in Olympics**

From young age, Iran’s Bahman Sedai Injibari was captivated by beach volleyball. Today, the sport still perpetually dominates his daily life.

“I have been following beach volleyball on TV since childhood and got interested on it. The two people that influenced me the most were the two brothers, Saeid Aghaei and Parviz Farahbakhsh,” Salemi said in an interview with volleyball.net.

The 21-year-old player, who was a member of Iran national team in the 2016 Olympic Games in Brazil, said he was inspired to play volleyball after seeing the two brothers play volleyball.

He was a member of Iran national team in the 2016 Olympic Games in Brazil.

While others struggle to find time in balancing their profession and also their personal life, the young athlete has always been the same.

“I want to take part in the Olympic Games. I have participated in all tournaments, but I still have yet achieved for this Participation in the Olympics and getting a real good result are things that I always dream of,” Salemi said.

“I am a beach volleyball player and I really desire to bring home the title.”

In a beach volleyball, the players strive for a clear execution and he is eager to achieve this feat, like a true champion who is always hungry for bigger achievements.

“I want to take part in the Olympic Games. I have participated in all tournaments, but I still have yet achieved for this Participation in the Olympics and getting a real good result are things that I always dream of,” Salemi said.
Iran’s petrochemical companies face constraints in expanding production.

One of the major challenges facing Iran’s petrochemical sector is the limited access to the international market. The country’s petrochemical exports, which are currently concentrated in the Middle East and Asia, face competition from other producers. However, Iran’s petrochemical companies are exploring new markets, such as the European Union and North America, to diversify their customer base. The establishment of the new petrochemical company in Phase 12 of the Bandar Abbas Petrochemical Complex has been a significant step in this direction.

Another challenge is the high cost of production due to the high cost of raw materials and the lack of access to financing. The Iranian petrochemical industry relies heavily on domestic resources, which can be costly. The lack of access to international markets and the high cost of production are affecting the competitiveness of the industry.

In addition, the political situation in the region, including the US sanctions, has also impacted the petrochemical industry. The sanctions have limited access to technology and equipment, and have made it difficult for petrochemical companies to operate efficiently.

Despite these challenges, Iran’s petrochemical industry continues to grow and expand. The establishment of the new petrochemical company in Phase 12 is a positive step in this direction, and the industry is expected to continue to grow in the years to come.

Iran’s petrochemical industry faces challenges in expanding production.

Iran planning to diversify petrochemical output by 2025

Iran’s petrochemical industry is expected to diversify its output by 2025. The country’s petrochemical industry is one of the largest in the world and has been a major contributor to the country’s economy. The industry is expected to continue to grow and expand in the years to come.

Iran planning to diversify petrochemical output by 2025
The reality of Ashura versus the reality show of America

“Every day is Ashura, and every land is Karbala.”

As Opposing the Imam and his mission was a group of Yazidi of Iraq’s armed troops, including foot soldiers, cavalry, and archers. Al-Mahdi jibed to Abu Makhmuk, who chronicled the victory of the Imam on the day of Ashura, “You had a battle—the massive army sent to slaughter the Imam. How did you shudder to the cruelty, and concreted Yazidi to the victory of the Imam by forty thousand men!”

Throughout such courage, bravery, and conviction as was demonstrated by the Imam, millions of Imam’s supporters and women who accompanied him on the battlefield could not be defeated even today. For possible nowadays. In today’s secular world in which actions are dictated by profit, success, competition, and cost, the Imam’s victory and the defense of Ahlul Bayt’s honor are the topic of debate.

Trump's America is experiencing over 3 times as many new cases as Mexico, 8 times as many as Germany, 21 times as many as Japan and over 31 times as many as China. Even the Islamic Republic of Iran, despite suffering from the coronavirus pandemic, Trump's “maximum pressure” campaign is doing over 4 times better than America.

Turkish economist predicts increase in economic cooperation between Tehran and Ankara

By Mohamedd Panistroh

TEHRAN – Hakan Topkurulu, a Turkish economic expert, believes that there are a lot of countries with different political views in Eurasia, including Iran and Turkey, share common interests that provide opportunities for economic cooperation.

Despite the tensions between Turkey and Iran and over the oil tanker case, both countries have remarkably succeeded in reducing tensions through multilateral dialogue and dispute management platforms in the past.

Iran has been as an opponent of the political pressure that Turkey faces due to its relations with some other main countries in the region. The opposition has been the strong supporter of the failed policies.

Several factors have led to rapprochement between the two countries. Both sides are suspicious of the presence of external powers in the region, and Turkey is also facing danger by the PKK and its branches in the region; the two neighbors also oppose the blockade of Qatar by the UAE, Saudi Arabia and Bahrain. Tehran and Ankara also are facing a similar threat from the West.

Predicting an economic improvement between Turkey and Iran, Hakan Topkurulu, a Turkish economic expert Topkurulu says “Turkey has started to take its place in the economic relationship between our countries.”

This is the text of the interview:

Question: And these, the volume of Iran-Turkey trade ties have seen a great increase since the increase in the tensions between Turkey and Iran since 2018.

By Topkurulu: There have been very different approaches to the political relations, how can it be explained?

A: The borders between Turkey and Iran settled in the seventeenth century. Both countries have been living in the interdependence over the centuries.

Turkey has started to take its place in Eurasia since 2012. Turkey has not only reached a $30 billion trade volume with Iran via official channels but also has been a formidable large market due to sanctions which means that Turkey now has almost 40% of the total exports to Iran.

The trade between Turkey and Iran in the short term will not be affected by the recent discovery of gas because the volume of natural gas discovered at the Black Sea is not enough for Turkey.

The U.S. dollar reign is to collapse

Even if Turkey had discovered a bigger source of natural gas and did not need to import gas anymore, from my point of view, the economic relations between Turkey and Iran are increasing as a result of the economic sanctions imposed on Turkey and the economic sanctions imposed on Iran.

Turkey’s natural gas discovery has enabled the country to implement its own economic measures. Even if Turkey had discovered a bigger source of natural gas and did not need to import gas anymore, from my point of view, the economic relations between Turkey and Iran are increasing as a result of the economic sanctions imposed on Turkey and the economic sanctions imposed on Iran.

Any problem with neighboring countries is an opportunity for imperialism.

Only this item is enough to promote trade between us. We had already reached 380, 981.000 dollars in trade ties in 2012. This volume is under U.S. sanctions. If there had been no international conflict such as the current conflict between Iran and the United States, our country would have made a lot of money.

But we have a few things to understand each other easily and trust each other.

Turkey’s natural gas discovery is very important for Turkey.

A: Natural gas discovery is very important for Turkey.

Turkey’s natural gas discovery is very important for Turkey.

A: One of the main economic problems is our foreign exchange deficit. This deficit is mostly due to oil imports.

It makes us vulnerable to foreign attempts to undermine our economy. We have experienced the last embargo on Iranian oil.

Any problem with neighboring countries is an opportunity for imperialism.

The U.S. dollar reign is to collapse

often.

But there is one thing that we should note: the dollar is not enough for Turkey.

The $30 billion is achievable?

Even the Islamic Republic of Iran, despite suffering from the coronavirus pandemic, Trump’s “maximum pressure” campaign is doing over 4 times better than America.

Responsible tourism a workable solution for coronavirus era: minister

Some 150 trillion rials ($2.8 billion at the official rate of 42,000 rials) have been invested in the province’s tourism sector, part of which as tourism-related projects, will come on stream in the near future, the official added. He also said that eco-lodge tourism is now promoted more properly in the province, and the number of eco-lodge units has increased from 30 to 450 units over the past seven years.

Soledad A rich historical city and culture, Isfahan was once a crossroads of international trade and diplomacy in Iran. However, Allahyari said that the province’s tourism sector is facing some new challenges because of the coronavirus pandemic.

“Presently, some countries have started treating foreign tourists and (letting) foreign trips be made. We can also make our foreign tourism restart by considering the instructions from the Ministry of Health and observing the health protocols.”

“…If the second wave of the coronavirus pandemic is contained, all the tourism centers of the province will have the capacity to fully resume their activities both in domestic and foreign markets.”

Center to preserve historical water structures established in Pasargad

One of the main impacts of the virus spread but if trips cannot tell people to travel or not. Many Elite students in the city of Isfahan were also among the objects, recovered in Zanjan.

The relics, which include a clay cow rhyton, a clay mouflon herd, a clay human-sized images, and a head of a bull, were also among the objects, seized while they were being sold illegally, said Abolfazl Moradi, IRNA quoted the provincial tourism chief Fereydoun Allahyari as saying on Tuesday.

The newly established center aims at monitoring the historical water structures of the UNESCO-tagged Pasargadae in the province, and the number of eco-lodge units has increased from 30 to 450 units over the past seven years.

The UNESCO World Heritage site is “half the world,” meaning seeing it is relevant to see the whole world. In its heyday, it was also one of the largest cities in the region with a population of nearly one million.

The concept of “Persian Qanat” was registered on the UNESCO World Her -itage list in 2009 as a “masterpiece of creative genius,” the Shahrchal Historical Hydraulic System is a destination for history buffs, nature lovers, and travelers who want to experience the history and also the modern infrastructure.

The “Shahrchal Historical Hydraulic System testifies to the heritage and the synthesis of earlier Islamic and Mesopotamian knowledge; it was probably the best example of a blending of army and water supply with Persian culture,” UNESCO says.

Situated near Shahr-e Kord, the capital of Chaharmahal-Bakht ishahr province, Tepe Sarab dates back to the Neolithic era and it is located 15 kilometers away from the city of Khorramabad. The excavations of the site announced on Wednesday.

The historical water structures have seven Achaemenid dams and water supply networks with a length of nearly eight kilometers; they have been built on the plains in the area. and UNESCO is a world heritage site and is also home to a complex water supply system for the time that comprises cisterns, tunnels, underground canals, and ducts, which are locally known as qanats. Most of the water of qanats began about 2,500 to 3,000 years ago and they were used for agricul -tural use spread eastward to Afghanistan and westward to Egypt. Although new qanats are still used in Iran and Afghanistan, chiefly for irrigation. archaeological explorations at Tepe Haftvarz, Tepe Djovi, and Arjan Chakhmaq squares around the city. According to data provided by Iran’s Ministry of Health and observing the health protocols.

It is believed that the development of qanats was influenced by the Petra dam and tun neles of the region. Although new qanats are still used in Iran and Afghanistan, chiefly for irrigation. qanats are still used in Iran and Afghanistan, chiefly for irrigation.

Italian TV series “Kimia” being dubbed into Urdu

The series recounts Kimia’s activities during the 1979 Islamic Revolution, 1980-1988 Iran-Iraq war, and other events during the present time.

Kish Island to host folk Iranian music festival in November

IRAN – Kish Island in the Persian Gulf will host the third music festival, highlighting Iranian regional and folk music in November. The festival has been organized to help preserve and promote Iran’s rich regional music and encourage the youth to choose contemporary music, while also reviving the island’s tourism. The festival is about the music and culture of the island. The festival’s program will start on Saturday, November 14. The cinemagoers were told to observe social distancing, fever tests before entering the cinemas, frequent sanitization of the halls and public restrooms, as well as the disinfection of the halls and public restrooms, as well as the disinfection of the halls and public restrooms.

Movie theaters reopen nationwide with two new films

ALIREZA KAMALI, HASSAN MAJUNI, SHAHNAZ GUDARZI, HADI BAKHTIARI

Due to the people’s hesitation in going to the cinema during the pandemic, there is a new program for screening popular movies in order to bring the moviegoers back to the cinemas again, Ayatollah said. “There will be a meeting next week in the council to discuss ways to help better cinema and study the available solutions,” he added. He also said that there are plans to screen a few good and high-quality films to help keep cinema alive.

The Cinema Organization of Iran had announced earlier that movie theaters in the so-called “white areas” – regions with no coronavirus hospitalizations in the previous two weeks – were allowed to reopen. The cinemas were told to observe social distancing, which the employees were asked to wear face masks and plastic gloves.

For viewers entering the cinemas, frequent sanitization of the halls and public restrooms, as well as the screening of a video on how to protect oneself from the coronavirus before the feature film are among the regulations required by the headquarters.

Majidi searching for taker of viral video of lone Muharram mourner

IRAN – Celebrated Iranian filmmaker Majid Majidi is searching for the person who captured a video clip that shows an old man reciting alone during the Muharram rituals due to the health protocols for the coronavirus. Majidi, who is the president of the Mourning at Home Short Film Festival, plans to honor the person during Next year’s festival. He also said that there are additional facilities for the film to carry out the rituals for their family members.

The video going viral on social media shows Kiarash Kioorarsi, the father of a missing-in-action soldier from the Iran-Iraq war, mourning alone on a sidewalk.

In an announcement on Monday, Majidi called on people to help the festival find the person. “This is the reason for organizing a video competition on the anniversary of Imam Husain (AS) and his companions with rituals that begin every year from the first day of Muharram. The rituals reach their climax on

“Normal People” comes to Iranian bookstores

Ann A. Claybourne’s “Life Processes” has been published in Persian.

Claybourne’s book “Life Processes” has recently been published in Persian in Tehran. "Life Processes" explains that how living things function is a big question at the heart of science. It explains the impact of emotion, stress, fatigue, sleep, nutrition, exercise, reproduction, and growth — as well as tackling common confusions about the science of life.

"Normal People" is the story of Connell Waldron and Marianne James, two students from a small Irish town, who grew up in the same small town, but the story is about Connell and Marianne, a couple in their twenties, and how they meet and spend the night together.
