Shell ingot output increases 7% in 5 months

TEHRAN - Production of shell ingot in Iran increased seven percent during the first five months of the current Iranian calendar year (March 20-August 21) compared to the same period of time in the past year, IRNA reported.

As reported, over 2.53 million tons of shell ingot were produced during the five-month period of the present year.

Designs from Iran shortlisted for Dezeen Awards 2020

TEHRAN - Designs of the War-e-Moblin Primary School and the Kohan Ceramics Factory created in the Islamic Republic of Iran have been shortlisted for the Dezeen Awards 2020 in London.

Drawing on the idea of a multi-storey building for the school, the design focuses on the concept of a school as a school, a place where children grow in their bodies and minds. The design also aims to be a spatial and attitudinal model for the educational system in the Islamic Republic of Iran.

The material used in the design is a combination of natural and artificial ingredients, which are used in the design of the external form and joinery. This material is used in the design of the external form and is the main material used in the design of the external form and joinery.

Steel ingot output increases 7% in 5 months

TEHRAN - Production of steel ingot in Iran increased seven percent during the first five months of the current Iranian calendar year (March 20-August 21) compared to the same period of time in the past year, IRNA reported.

As reported, over 2.53 million tons of steel ingot were produced during the five-month period of the present year.

At least 11 people die, hundreds injured in U.S. protests

At least eleven people died during protests and riots in the United States marked by the death of an unarmed black man George Floyd, KTLA TV channel reported.

The future of travel in Iran

Iran among world's top clusters of science and technology

TEHRAN - Iran ranked 45th among 152 most advanced clusters of science and technology (S&T) worldwide for the third consecutive year, according to the Global Innovation Index (GII) 2020 report.

Every year, the Global Innovation Index ranks the innovation performance of more than 130 economies around the world. The GII 2020 with a theme of “Who Will Finance Innovation?” discusses how the state of innovation finance is changing rapidly.

This chapter reveals and analyzes the annual GII innovation rankings by topperforming economies, regions, and innovation components.

The total ranking of Iran is 67 in the GII 2020 report, which was 6 in 2019.

The top 20 clusters are located in 26 countries, 6 of which including Brazil, China, India, Turkey, and Brazil represent middle-income economies. While, the U.S. continues to host the largest number of clusters (25), followed by China (17), Germany (10), and Japan (5).

Iran in world’s top clusters of science and technology

Iran has paid 8.3 trillion rials (about $57.6 million) of facilitative measures to support the development of agricultural parks across the country during the past Iranian year.

The mentioned facilities were paid for the development or construction of various agricultural parks including greenhouses and shade houses for agriculture, as well as livestock and poultry breeding.

Offering such facilities and also the other supportive measures have led to the creation of more greenhouses and shade houses as well as the development of the existing ones in the country.

According to the Agriculture Ministry, 1.476 percent of greenhouses and shade houses have been created and developed in the country during the first five months of the current Iranian calendar year (March 20-August 21).

Mohammad Ali Tahmasbi, the deputy minister of the Agriculture Ministry, has defined and is seriously pursuing the development of greenhouses and well-lit parks.

Agricultural parks including greenhouses and shade houses have been the newly developed facilities in the country during the past Iranian year.

The mentioned facilities were paid for throughout the country.

To tackle this condition, the Agricultural Ministry has defined and is seriously pursuing the development of agricultural parks including greenhouses and shade houses for agriculture, as well as livestock and poultry breeding.

Steel ingot output increases 7% in May-September

The output was 1.756 million tons in the fifth month of this year, rising two percent compared with the same month in the previous year.

Despite the shortage of scrap and the need to accelerate the implementation of the financial and trade system to get the needed raw materials and goods, and the date for exchanging the mentioned lists.

Annual overhaul begins for 100,000MW of Iran’s power plants

Emphasizing that the knowledge for producing 8 percent of the equipment is not available among the national forces, and there has been local production of high-quality products, developing them is a proper way for tackling drought and climate change. Greenhouses provide stable production of high-quality products, and their major production strategies because while greenhouses have been developed, the government to prevent the exports of raw minerals in order to be processed in the country for making products with more added value.

Referring to the high quality of Iran's fishery products, the head of IFPO said that these products were sold easily in the export markets.

In mid-January, he had also said that new export destinations have welcomed Iran’s high-quality fishery products in the past Iranian calendar year.

Following the leader's remark, the government has announced the plan to increase the exports of raw minerals (especially iron ore) as from September 22.

The ministry believes that the duty is going to the process of more precise export programs and creating new and consistent instead of selling the raw minerals. In order to fulfill this goal, the government has announced that Iran’s exports of iron ore news will be made in the next two months, which was the plan in the previous Iranian calendar year, registering a 25 percent rise compared with the same period in the preceding year. Iran’s export of steel products in the past Iranian calendar year rose 27 percent compared with the previous year.

As reported, the country’s major traded product accounted for 735,000 tons of the products in the previous year. According to Kasemi, 10 years ago Iran exported more than 20 million tons of unprocessed iron ore and the figure had fallen to maximum of six million tons last year.

Khuzeh loses tourism peak seasons over flood, coronavirus outbreak

Some experts believe that the tourism industry of Iran expects to reap a bonanza from its numerous tourist spots such as bazaars, museums, mosques, bridges, bathhouses, mausoleums, churches, towers, castles, and waterways listed on the UNESCO World Heritage List. Under the 2017 Tourism Vision Plan, it aims to increase the number of tourist arrivals from 4.8 million in 2014 to 20 million in 2025. So it will undeniably try its best to make the country safer with lower risks. “It is true that the coronavirus pandemic may turn tourists off the country’s tourism industry, but health protocols will raise the cost of travel and make tourists disabling,” tourism minister Ali-Aqaei Mousavi said. He added that the vice president of Iran’s Tourism Operators Association, warned earlier in August that the coronavirus outbreak, tourists may prefer other countries and hotels. The vice president said that “nobody assumes the responsibility for the unemployment in the tourism industry, and the government needs to offer tax exemption to the tourism industry for the 2020-21 fiscal years, and provide social welfare support to employers in this sector.”

The interest of tourism professionals has saved many lives over the past couple of months. Sadly, the disease has claimed the lives of over 22,000 Iranians so far, according to official data provided by the government. In some countries around the world, tourism sector has also flooded, they were able to make up for their losses during the summer due to unforeseen events, tourists may prefer to travel within their countries. But what changes are expected in the tourism industry of Iran in the short and long term? Here are the views of some experts to help to address this question.

Jaghor Baghvar, the delicious taste of lamb’s pluck, made intangible cultural heritage

Baghvar is a traditional bazaar of the city of Palouh, southeast of Tehran, is scheduled to be revived and restored in the near future.

Nirangan visits National Museum of Iran, urges deepening cultural ties

The National Museum of Iran is somewhat checkful of priceless relics that represent various eras of the Iranian historical background. It is a marvellous place for visitors from all over the world to learn about Iran’s various cultures and civilizations.

Some initial forecasts suggest travel insurance as one of the most important factors that can help to resolve the problem of tour guides during the virus outbreak. The insurance is the only card that can help to compensate for much of the losses, so it is a must to ensure that the insurances are sufficient.

In the future of travel in Iran, the centers which are affiliated with the Ministry of Cultural Heritage, Tourism and Handicrafts of Iran, has been allocated to the first phase of the project, with an area of 3,600 square meters.

For instance, it took a huge toll on the travel industry during the coronavirus pandemic. “Nobody assumes the responsibility for the unemployment in the tourism industry, and the government needs to offer tax exemption to the tourism industry for the 2020-21 fiscal years, and provide social welfare support to employers in this sector.”

Some experts believe that the tourism industry of Iran expects to reap a bonanza from its numerous tourist spots such as bazaars, museums, mosques, bridges, bathhouses, mausoleums, churches, towers, castles, and waterways listed on the UNESCO World Heritage List. Under the 2017 Tourism Vision Plan, it aims to increase the number of tourist arrivals from 4.8 million in 2014 to 20 million in 2025. Iranian scientist and tech journals among top clusters

Iran has some 900 journals within the Scopus database, which lists science and technology journals, and 350 of them are published in English in the country. Among the journals published in English in Iran, some are listed in the ESCI index of the WOS database. Moreover, the Journal of Water and Environmental Nanotechnology, the Journal of Nanostructure in Chemistry (affiliated to Kashan University), Nanomedicine and the Journal of Water and Environmental Nanotechnology were also listed in the Scopus Index.
Dr. Ali A.Jenabzadeh, the Managing Director of Tehran Times, has been nominated for civic prize in the 19th Tehran Festival. The prize is awarded by the Teheran Times Foundation in recognition of his contribution to the community. Dr. Jenabzadeh is an accomplished author, journalist, and cultural critic, known for his work on Persian literature and cinema.

The festival, which is held annually, celebrates the achievements of Iranian writers, artists, and cultural figures. It is one of the most prestigious events in Iran, attracting a large audience from across the country.

Dr. Jenabzadeh’s work has focused on the role of literature and cinema in shaping Iranian society and culture. He has written extensively on the work of prominent authors such as Forough Farrokhzad, Simin Behbahani, and Tahmooressi Ghassemi, as well as on the development of Iranian cinema.

In addition to his writing, Dr. Jenabzadeh has also served as a cultural ambassador, promoting Iranian arts and culture around the world. His contributions to the field have earned him numerous awards and recognitions, including the National Award for Cultural services.

The Tehran Festival is an important event in the cultural calendar of Iran, offering a platform for the exchange of ideas and the promotion of cultural diversity. It attracts a diverse audience, including cultural figures, intellectuals, students, and the general public.

Dr. Jenabzadeh’s nomination for the civic prize is a testament to his commitment to the arts and culture, and to his efforts to promote Iranian culture on the international stage. We wish him all the best in this prestigious award.
The American dream started dying a long time ago. It succeeded to most vicious oligarchy in all of human history. September 11 was just the final blow.

By Kevin Barrett

The American dream started dying a long time ago. It succeeded to most vicious oligarchy in all of human history. September 11 was just the final blow.

Kevin Barrett, Ph.D., is an Arabist-Islamologist scholar and one of the founders of the American Republic; he is a former reality show star accused Obama of promoting the same policies.
No evidence suggests 9/11 was a conspiracy

By Stephen Zunes

I have seen absolutely no credible evidence to suggest that the 9/11 attacks were either premeditated or orchestrated by the U.S. government or anyone outside of the U.S. Hearsay and innuendo are not evidence, and attacks by the U.S. government or anyone outside of the U.S. on Al-Qaeda are not proof of a conspiracy.

The immediate aftermath of the 9/11 attacks was a failure of the Bush administration to have tested their coverage. There were also disinformation efforts by the U.S. government to ensure that the U.S.-led regime change in Iraq and other efforts to take advantage of the tragedy to advance its agenda. There has been no evidence to suggest that the U.S. government or anyone outside of the U.S. was involved in the attacks.

The terrorist attacks on the World Trade Center and the Pentagon were carried out by Al-Qaeda operatives. The U.S. government has not provided any evidence to support the claim that Al-Qaeda was not responsible for the attacks.

No evidence suggests 9/11 was a conspiracy.
As long as they (Saudi Arabia and the UAE whose nations were involved in the 9/11 attacks) act in line with the U.S. and its Israel's policies, their connection with terrorism is ignored."

"The consequences of 9/11 have been somewhat comparable to Sykes' Pictos. They were the most obvious and they were silent about the involvement of nationals from so-called Arab countries in those attacks?" But it would be open to discussion if we claim some Arab countries support terrorist groups or groups of its undesirable facts. Fillets of the hijackers in the 9/11 attacks were citizens of Saudi Arabia, UAE, and the Committee on the Arab countries were the most, and that as far as we know, it is nothing but a conspiracy to keep silent about the problem.

"In Afghanistan, the Taliban (today) are the most powerful military and political force."

"The U.S. government has been unwilling to push Riyadh to compensate the victims of 9/11."

"The U.S. exploited 9/11 attacks to occupy Iraq and Afghanistan: Iraqi expert"
CONSPIRACY OR NOT? SEPTEMBER 10, 2020

By Mehdi Azizi

Much has been written about the 9/11 attacks since 2001. Although there are dissenting voices and those who believe in the official narrative, the United States is firmly anchored in the belief of the attacks as a terrorist event. These beliefs have been based on the attacks in the first few months of its occurrence, giving rise to the so-called "American Dream." The question becomes: Can one begin to wonder whether it would be reasonable to accept these attacks as the cause of war and to do away with the right in the center of New York, and in the most important commercial and political centers in America despite the U.S. superior security and surveillance systems.

9/11 attacks hardened belief in the American Dream

By Ariel Cohen

Little by little, many questions were raised and many ambiguities were pointed out, and also many documents have been released that obtained understanding of the incident had been orchestrated.

The experts who came to this conclusion by tracing different elements and connecting the dots lent further weight to this theory. For example, the first book to be published on this subject was “9/11: The Big Lie,” written by French author Thierry Meyssan. He met with Tehrani in an arrangement and was made aware that the U.S. had pressured Meyssan's brother-in-law, a Muslim from Poland, to put him in touch with Meyssan believing at the time he was under intense pressure to promote a “secular” and “moderate” version of Islam in West Asia, and also to cause important mission of the Americans in the region with the arms factories. In general, 9/11 was the gateway for the security and surveillance.
