Trump remains in American society as a deadly virus: historian

BY MOHAMMAD ALI SEHABI

TEHRAN — An American historian likens Trump to a “deadly virus” in the American society and politics that its efforts “have grown stronger in 2020.”

Professor Ronald Grigor Suny says the presidential elections showed that a great number of American citizens don’t approve of Trump’s performance, however, he is refusing to concede defeat.

“The administration of Donald J. Trump is running to an end, even though the president himself cannot bring himself to admit it,” Suny tells the Tehran Times.

Although Trump lost the election, he won 71 million votes, having a deep divide behind him. “Even though voters knew who he is and the damage he has done,” they voted for him, according to Suny.

President-elect Joe Biden narrowly defeated President Trump in Georgia, and Trump won North Carolina, as the two final states were called on Friday, a week and a half after Election Day.

Biden now has 369 electoral votes and Trump has 222. Biden became president-elect when he won Pennsylvania’s 20 electoral votes on November 7, passing the required 270-vote threshold.

On the reasons why a great segment of the Americans voted for Trump, the professor says these voters did not vote “out of ignorance but out of resentment at the liberal and urban and educated class that dominates the U.S.’s political world.”

The history professor says, “The kind of America First (and to Hell with the world) nationalism represented by Trump has weakened the most powerful state in the world and made it an unreliable ally.”

Sponge iron production up 10% in 7 months y/yf

TEHRAN — Production of sponge iron in Iran increased 10 percent during the first seven months of the current Iranian calendar year (March 20-October 20) compared with the same period of time in the previous year.

More than 0.22 million tons of sponge iron has been produced in the seven-month period. Iran’s production of sponge iron has climbed six percent to 27.907 million tons in the past Iranian calendar year ended on March 20, from 25.959 million tons it was a year ago, according to data released by Iran Steel Producers Association (ISPA).

The ISPA explained that the increase in the export of iron sponge is also seven percent in the past year. Meanwhile, sponge iron consumption in the country increased four percent to 23.856 million tons on an annual basis.

Blood donation in the time of corona

Iranian People all over the country are donating blood as the coronavirus pandemic has led to a decrease in the number of donors by around 20 percent over the past eight months.

Studies show that the plasma driven from recovered patients can be used in the treatment of COVID-19 with the help of the patient’s immune system.

The best time for plasma donation is at least 14 and preferably 90 days after recovery, and donors should age 18 to 60 years.

India, Pakistan report deadly violence along Kashmir border

At least 10 civilians and five security personnel have been killed between India and Pakistan in one of this year’s deadliest days along the de facto border separating the nuclear-armed rivals, officials said.

Indian officials said six civilians, three soldiers and a civilian fueron killed on their side, while Pakistani forces said four civilians and four soldiers were killed in separate attacks.

The latest violence comes amid stalled talks between India and Pakistan to improve cooperation along the Line of Control, a military frontier in Kashmir that has been a flashpoint for decades.

The Indian diplomat was summoned to India to report against the killings in Pakistan-administered Kashmir by Indian shelling, according to a defense spokesman.

The Indian foreign minister has summoned Pakistan’s foreign minister to discuss the situation.

The Indian government has also denied reports that it has fired mortar shells into Pakistan-administered Kashmir.

As Trump refuses to concede defeat, far-right groups show up in Washington

Far-right groups and other backers of U.S. President Donald Trump plan to rally in Washington, D.C. on Sunday in a public show of support for his unsubstantiated claim of widespread voting fraud in the Nov. 3 election.

Republican Trump’s refusal to accept that he lost the election to Democrat Joe Biden, now president-elect, has left members of Trump’s supporters, including Republican lawmakers, his aides and supporters, his administration and his loyalists divided.

The protests will bring together far-right personalities, including conspiracy theorists and far-right news outlets like Jones and self-described “American Nationalist” Nicholas Fuentes. The Oath Keepers militia and the far-right Proud Boys have also said their members are attending. Some left-wing groups are planning counter-protests.

In addition to the Washington event, pro-Trump protests and counter-protests are planned in other cities, including Trump’s hometown of D.C. and Los Angeles.

Law enforcement had warned of potential violence at the rally and multiple far-right extremist groups, which so far have not come to Washington, have expressed interest in attending the Washington demonstrations to support the far-right groups and other backers of U.S. President Donald Trump.

In addition to the Washington event, pro-Trump protests and counter-protests are planned in other cities, including Trump’s hometown of D.C. and Los Angeles.

Iran dismises report on Israeli killing of al Qaed leader in Tehran

**POLITICAL**

TEHRAN – Iran’s Foreign Ministry spokesman, Abbas Mousavi, has refuted a report by some Western media organizations that the Israeli authorities have killed an al Qaeda leader in a raid in Iran’s western province of West Azarbaijan.

**POLITICAL**

TEHRAN – Robert Malley, a special assistant to U.S. President Joe Biden, has described Iran’s nuclear agreement (JCPOA) on condition that Iran comes back to compliance with the text. He said the Islamic Republic wants an economic lift, and the slain administration does not want another crisis with Iran.

**POLITICAL**

TEHRAN – Mohsen Sanaei, a top adviser to Foreign Minister Mohammad Javad Zarif, has said Iran has no intention to purchase S-400 missile systems from Russia.

**POLITICAL**

TEHRAN – Three Iranian border guards were martyred in clashes with terrorists in the Marivan region in West Azarbaijan Province.

**POLITICAL**

TEHRAN – Three Iranian border guards were martyred in clashes with terrorists near the border guards’ resistance as well as their courage and independence, and Bulgaria was the first Eastern European country to officially recognize the Islamic Republic of Iran, he said, adding that the US and its allies in the region will face difficulties in the future. In order to shirk responsibility for the criminal activities of that group and other terrorist groups in the region, Washington and Tel Aviv also attempted to blame the Islamic Republic and call it the world’s leading state of terrorism. However, the failure of Israeli policies against the Islamic Republic of Iran in the past, such as the assassination of Moqtada Sadr, has exposed the Israeli government in the international community.

Iran placed no order to buy Russia’s S-400- missile system: advisor

Russia says not ruling out possibility of U.S. returning to JCPOA

No particular tension between Iran, Bulgaria: envoy

**POLITICS**

Due to its borders with Iraq and Turkey, Iran’s West Azarbaijan Province has been witnessing numerous clashes with a number of terrorist groups and the PKK terrorist group.

**POLITICS**

TEHRAN – Secretary of Iran’s Expediency Council Mohsen Rezaee has said the United States’ decision to withdraw from the JCPOA is an indication of its failure in the region.

**POLITICS**

TEHRAN (MNA) – Russian Foreign Minister Sergey Lavrov said that Iran is the main guarantor of the JCPOA since its inception four years ago. He reiterated that the US withdrawal from the Joint Comprehensive Plan of Action (JCPOA) will not lead to a confrontation between Iran and the US. He added, “The US withdrawal from the JCPOA was a political decision made due to the US domestic political situation.”

Vague peace in Nagorno-Karabakh

Aragchi dispels rumors about Nagorno-Karabakh ceasefire deal

TEHRAN – The Russian-brokered ceasefire agreement that has been recently reached between Baku and Yerevan is not as ambiguous as some have claimed, a senior Iranian diplomat said on Thursday.

Aragchi, who is also the head of the foreign ministry's political desk, has been dispatched to Moscow, Yerevan, and Ankara.

The deputy foreign minister recently undertook a shuttle diplomacy to help end the war in Nagorno-Karabakh. He met with the leaders of the三国s and the Organization for Security and Cooperation in Europe (OSCE) to discuss the ceasefire scenario.

Aragchi, who has been a member of the Iranian nuclear negotiations team, is expected to return to Tehran on Sunday or Monday.

The agreement, which was reached between the two sides on Wednesday, stipulates the establishment of a ceasefire and the withdrawal of all forces from the area.

Aragchi, one of the most senior diplomats in the Islamic Republic of Iran, is also the head of the Iranian Permanent Mission to the United Nations.

The ceasefire agreement, which was signed on November 10, is seen as a significant step towards resolving the Nagorno-Karabakh conflict.

The agreement was reached after weeks of negotiations between the three capitals and was facilitated by Russian Foreign Minister Sergei Lavrov.

The ceasefire is expected to take effect at 12:00 midnight local time on Thursday.

The ceasefire agreement was reached in the presence of the heads of the delegations from Azerbaijan, Armenia, and Russia.

Aragchi, who was in Moscow at the time of the signing, said that the agreement was a significant step towards resolving the conflict.

The ceasefire agreement was signed on Wednesday, and it will come into effect at 12:00 midnight local time.

The ceasefire agreement was reached after weeks of negotiations between the three capitals and was facilitated by Russian Foreign Minister Sergei Lavrov.

Aragchi, who has been a member of the Iranian nuclear negotiations team, is expected to return to Tehran on Sunday or Monday.

The optimization of the ceasefire deal will be a prerequisite for establishing stability and tranquility and welfare for people in all regional countries and cases.

Iran-EU trade stands at nearly $8.9b in 7 months

Iran has seen its copper exports doubled in the past Iranian calendar year, which ended on March 20. According to the Ministry of Finance, the country exported copper worth $1.474 billion, up from $790 million in the same period last year in the previous year.

Mohsen Safdari, a senior official at the Ministry of Finance, told IRNA news agency that the trade between Iran and the EU nations has increased in recent years due to the sanctions imposed on Iran in 2018.

The trade balance between Iran and the EU nations has improved significantly in recent years, with exports to the EU increasing from $1.3 billion in 2017 to $1.474 billion in 2020. Iran’s exports to the EU are mainly focused on agricultural and industrial products, while the EU imports mainly raw materials and intermediate products.

The increased trade between Iran and the EU is mainly driven by the implementation of the Joint Comprehensive Plan of Action (JCPOA), which was signed in 2015 and which lifted some of the sanctions imposed on Iran.

However, the trade between Iran and the EU is still limited due to the sanctions imposed on Iran. The trade balance between the two countries is still negative, with Iran exporting more than it imports.

The Iranian government is striving to increase trade with the EU to reduce its dependence on oil exports and diversify its economy. Iran is trying to attract more foreign investments and increase its exports to Europe.

Iranian businessmen hope that the increased trade with the EU will lead to more investment opportunities and increased market access for Iranian products.

The trade between Iran and the EU is expected to increase in the coming years, as the JCPOA is expected to be fully implemented and as the sanctions imposed on Iran are lifted.

However, the trade balance between Iran and the EU is still negative, and the country needs to continue to diversify its economy and increase its exports to other non-oil products to reduce its dependence on oil exports and improve its trade balance.
The hatred Trump injected into society pushed U.S. into a divided state: Kadkhodaei

A: Of course, we must analyze each country’s political system by its own conditions and requirements. For example, the political system in Britain is different from the political system in the U.S. It means that the system of government and balances in system, in which the president nomimates the members of the Supreme Court of the United States. But in the UK, instead of separation of powers, the system of fusion of people and branches of government are intermingled.

But if we talk about which country ask the question it comes to mixed structures which threaten the independence of people’s? In this context, between George W. Bush and A. Green (in the 2000 elections), an inference was made, whereas American society’s perception toward the election was closed. The president appointed the judges, their approach was Republican, and the vote cast was in favor of Bush. Such an impression has always existed; however, it cannot be said that they will necessarily make the wrong decision. But if we want to study this political structure in terms of the Separation of powers, we can say that in the United States, the system is not well organized. What is your opinion?

But in the UK, instead of separation of powers, the system of fusion of people and branches of government are intermingled.

But if we talk about which country ask the question it comes to mixed structures which threaten the independence of people’s? In this context, between George W. Bush and A. Green (in the 2000 elections), an inference was made, whereas American society’s perception toward the election was closed. The president appointed the judges, their approach was Republican, and the vote cast was in favor of Bush. Such an impression has always existed; however, it cannot be said that they will necessarily make the wrong decision. But if we want to study this political structure in terms of the Separation of powers, we can say that in the United States, the system is not well organized. What is your opinion?

A: Of course, we must analyze each country’s political system by its own conditions and requirements. For example, the political system in Britain is different from the political system in the U.S. It means that the system of government and balances in system, in which the president nomimates the members of the Supreme Court of the United States. But in the UK, instead of separation of powers, the system of fusion of people and branches of government are intermingled.

Corona tests compulsory for travelers as of Nov. 18

TEHRAN – The National Headquarters for Coronavirus Control has issued a directive, based on which travel tests are compulsory for travelers as of November 18 upon entry and exit for passengers during air, land, and sea travel.

Over the past couple of months, many countries, including Iran, have imposed travel restrictions to help curb the spread of novel coronavirus. In this line, flights have been suspended and road and sea travels restricted to a great extent.

Croat cycling tourist publishes Iran travelogue

TEHRAN – Croatian musician and percussionist Dragan Ilichevic has recently published a travelogue on his cycling tour across Iran.

The book has been published online, as announced on the book's Facebook page, which Dragan Ilichevic established online, and is available online.

Last year, the deputy tourism minister of Iran announced that “foreign tourists on motorcycles above 250cc are allowed to enter and reside in Iran.”

Many international tourists to the country say that traversing Iran equals and requires less cost, as it embraces open spaces, recreational attractions, and landscapes.

The island has numerous tourist spots to offer foreign tourists such as bazaars, museums, bridges, bathhouses, mosques, and other cultural highlights, and has been registered in 24 UNESCO World Heritage list.

Lightning, infrastructure improved at Jurassic-era cave

TEHRAN – Lightning and necessary infrastructure have been improved at the Kalaré-Khor tourist cave, which is believed to date from Iran and dated to Middle Paleolithic or Mousterian times is in deposits from several excavated cave and rock-shelter early as Lower Paleolithic times.

It is estimated that, as soon as possible, with the determination of a new piece of land by the Archaeological Organization of History, Resources, and Waterhed Management, the site of the Kalaré-Khor tourist cave would be considered by the Cultural Heritage Organization of Iran as a heritage site.

The site is located in the province of Kerman, the most famous surviving example of example of paleolithic architecture and heritage.

The first guided virtual tour was presented by Freirelum, the head of the Paleolithic department of the museum on the earliest evidence of human settlement in Iran. The first virtual tour was the Tuesday at 11:30 am, Tuesday, November 10, live on Instagram.

The Kalaré-Khor tourist cave within the longest period of prehistory in which Iran compared to later historic periods is poorly known. The Kalaré-Khor tourist cave is highly recognized as one of the most important sites in Paleolithic times.

The gallery of the museum, a curator of the museum told the Tehran Times last week that “the Kalaré-Khor tourist cave is the most important tourist site in this area.”

The Iranian authorities have been monitoring and restored under the supervision of thearchaeological organization of history, resources, and waterhed management, the site of the Kalaré-Khor tourist cave would be considered by the Cultural Heritage Organization of Iran as a heritage site.

An important milestone made by archaeologists, he briefly described different methods of stone tool production and how archeologists distinguish a human-made stone tool from a naturally broken rock fragment. A core-tool discovered a naturally broken rock fragment. A core-tool discovered on the surface, and a flint blade was made by tapping and chipping flint. The core-tool was used to make hard objects or tools, while the flint blade was used to make soft objects or tools.

The book reveals that Iran is the most important tourist destination in the world.

A brief history of Persian pottery

A brief history of Persian pottery

The first well-documented evidence of human habitation structure of the island in the Great Mosque of Kufa, which was founded in the 10th century CE and was later destroyed by the Seljuqs, can be impressed that scholars including A.U. Pope described it as “anticipating the Taj Mahal”. It is the earliest existing example of the double-shelled dome in Iran.

**Conservation plan underway for 18 wetlands nationwide**

**TEHRAN** — A comprehensive conservation management program is now being implemented for 18 wetlands of the country, Ali Arvahi, the director of the Conservation of Iran’s Wetlands, Project, said on Saturday.

The comprehensive plan for the protection of Persian, Shadegan, Urmia, Qom Ghishali, Qaqlaus, Najaf, ChoghaZanbil, Zarivan, Hamoon, Bakhtegan, Aghaj, Gavk- bol, Borjed, Sarein, Kain Darvaran, Horm No Misin, Neir’ and Goudarzans wetlands has been approved, he added, IRNA reported.

Two wetlands of Gower and Afshin are awaiting approval and a plan is being prepared for them, according to Arvahi.

In Iran, 141 wetlands with ecological value with an area of over 3 million hectares have been identified, of which 25 wetlands are designated as wetlands of international importance (registered in the Ramsar Convention) covering more than 1.4 million hectares and four sites are biosphere reserves.

Iran gets ready for two-week coronavirus closure

**TEHRAN** — The National Headquarters of Coronavirus Control will implement a plan, according to which all occupations, except for emergency services and basic food supplies, will become voluntary starting on November 21.

Iran calls on member countries to remain vigilant as the country is expected to receive between 6 and 28 million COVID-19 cases, with between 600,000 and 900,000 deaths, from November 21 to December 6.

**Climate change causes falling demand for stone to stay stronger for longer**

Climate change is causing hurricanes that make landfall to take more time to mature, reports a study published November 11, in the *International Daily*. The researchers showed that hurricanes that develop over warmer sea surface temperatures and therefore stay stronger for longer after hitting land. This means that in the future, the Atlantic will be warmer and hurricanes will make landfall in a less damaging condition.

The implications are very important, especially when considering that about 5,450,000 people live at risk of tropical storm damage in the US, said Professor Pinto Chakravorty, senior author of the study and a research scientist at the University of Science and Technology Graduate University (USTG). "We need to know more about how much heavy rainfall there will be before deciding what flood control strategies to use for stronger hurricanes and coastal areas; we need to know the right amount of heavy rainfall, also need to be prepared."

Two illegal trawling ships seized at southern port

Two illegal trawling ships carrying 5,500 kilograms of aquatic species and 1,500 kilograms of smuggled fish and an illegal net weighing 20 kilograms were seized at the port of this southern Hormozgan province.

The trawling ships, which are designed in a way that involves pulling a fishing net through the water behind one or more vessels, can be part of a wetland ecosystem.

The province of Hormozgan, Fars, and Golestan and Sistan-Baluchestan are also on alert.

Mental health screening scheme to be launched at schools

A scheme to determine the prevalence and Incidence of psychiatric disorders in students will be implemented at schools across the country by the next school year (starting on September 23), director for education department at the Ministry of Education has said.

Since the mental health screening scheme will be implemented at all schools on seventh to ninth grades, all students will have undergone the mental health screening, so, we decided to conduct the tests on students on all grades, ISNA quoted Mansour Shooshtari as saying.

"The scheme will be launched by the beginning of the next school year," he added.

For the current school year, screening of mental health was carried out in February and the results were presented to consultants for in-school or individual counseling, he said.

Thus, the results of the scheme that baseline testing is done by teachers, who record their observations on the system, he explained, adding, in the next step, specialist interventionists will take place whether by the school counselor or counseling services outside the schools.

Chief of the Department of Environment (DOE) Issa Kalantari has said in order to re- store, protection, and rehabilitation of 1,000 trillions (nearly 341 billion) is required.

Iranian culture minister says no event will be canceled as coronavirus cases grow

Due to the pandemic, the organizers have made changes to the regular programming this year. Accordingly, they plan to organize a review of movies available from previous editions of the festival.

In addition, a line-up of documentaries on the pandemic will be held in the "virtual cinema," which has so far received over 150 submissions. The four top works selected in this category will be honored at the closing ceremony, while the international sector will hold a special platform to recognize the most promising.

The organizers plan to design platforms to guarantee the festival’s continuity and safeguard. DEFIC director Mohammad Hamidi-Moqaddam earlier announced the center’s plan to pay tribute to celebrated filmmaker Khosro Sinai who died of coronavirus in August.

In three of his films, “Backyard,” “Children of the Shadows” and “The Forwarder,” he experimented with a personal and documentary approach. In his non-fiction films, he used subjective narration along with an on-camera experience for his humanism, observing his own country’s situation.

His current work, “Six O’clock Noon,” continues to explore ideas and issues of subjective non-fiction filmmaking. “His Edelweiss” and “Khatemeh” are his latest documentaries, with Edelweiss being broadcast from the North of Iran and Khatemeh from the North of the country.

Amir-Masoud Naeini is being broadcast from the Mozaffar Channel, IBA’s channel dedicated to screening documentaries in foreign languages.

“Sherman’s March” was also chosen for preservation by the Library of Congress National Film Registry in 2020 as a “historically significant American motion picture.”

“Bright Leaves” preceded at the 2003 Cannes Film Festival’s Director’s Fortnight, and was nominated for best documentary by both the Director’s Guild of America and the Writer’s Guild of America.

McElwee’s “In Paraguay” premiered at the Venice Film Festival in 2008, and he returned to Venice in 2010 to premiere “Photographic Memory.”

In 2015, complete retrospectives of McElwee’s films were presented at the 20th Documentary Film Festival in New York and later in Paris, Brussels, Milan, Lisbon, and Switzerland.

Four of his films were featured in a selection of Western documentaries shown during the event.

In the animation film competition, “This Side, Other Side” by Yara Akrami was selected to be screened in Special Screenings, a non-competitive section of the festival, which is an ironic and non-conventional approach to the film event in the region.

The 11th National Biennial of Contemporary Iranian Ceramic Art opened at the 11th National Contemporary Fine Arts Center on the 4th of September at 14:00.
