Iran has provided Iraq with defense products, says general

TEHRAN – Chief of Staff of Iran's Armed Forces Lt. Gen. Mohammad Bagheri said that Iran has provided Iraq with defense products. "The new armament and security apparatuses have been established on the border area and should be deepened to strategic levels," he said, according to the IRGC official website.

"The forces of the Islamic Republic of Iran and the Revolutionary Guard Corps (IRGC) have established the security and safety of our northern and northeastern borders," he said.

"The forces of the Guard-Corps Force targeted this morning the positions of anti-revolution security terrorists across the countries and borders, and flattened heavy losses on the anti-revolution elements," the statement read, according to IRNA news.

"An area has been declared as a national security zone, and the presence of Iranian forces and their military equipment in the zone is important, and we'll show goodwill only if we see in action their misdeeds, and they must withdraw their forces from the borders," he added.

Bagheri further hailed a decision by the Iraqi parliament to expel US troops from Iraq.

Khallat, for his part, hailed Tehran's support and assistance for his homeland, saying, "The Iranian forces are the best allies for Iraq and Iran, he said, noting that the experience of the two neighbors in the fight against occupation showed that any enmity can be overcome through joint cooperation.

Trump admin doing utmost to kill JCPOA: Wendy Sherman

POLITICAL TEHRAN – Wendy Sherman, the former US negotiator with Iran, has said that the US administration, which was an obstacle to Iran’s relations with European and other friendly countries, would pass the way for the Iranians.

"We have seen that there’s a situation for the lifting of sanctions, we will make use of that," she said at a cabinet meeting. "Our goal is that cruel sanctions will be lifted."

"While we know the difference (between Trump and Biden) administration, which was an obstacle to Iran’s relations with European and other friendly countries, it will make use of every opportunity in order to lift the US sanctions."

"We have seen that there’s a situation for the lifting of sanctions, we will make use of that," she said at a cabinet meeting.

Sherman also said the November 3 elections laid bare the defeats of various US policies and decisions and that the Iranian people have already decided to vote against it.

"Lifting of sanctions will make use of every opportunity in order to lift the US sanctions," she added.

"We have seen that there’s a situation for the lifting of sanctions, we will make use of that," she said at a cabinet meeting. "Our goal is that cruel sanctions will be lifted."

Iranian, US ambassadors discuss developments in Iraq

Iranian government should go beyond the East: senior MP

By Hamid Estili

Amosfoosh Ghazizadeh, the deputy of the Iranian Parliament's Foreign Relations Committee, said that the Islamic Republic has to go beyond the East in its foreign policy in order to strengthen its presence in the region and all countries of the world are looking for an independent country that can be a witness of Imam Khomeini is a witness of independence and because they have passed the ‘trial and error’ stage and now are looking for a country that can play an effective role in increasing trade with Africans.

The lawmaker said that if the country wants to solve the economic problems, it has to rely on itself and there will be no change in the U.S. policy toward Iran. The lawmaker added that the West has stopped the development of the country and Iran needs to rely on itself and the country’s capabilities, and also to officials in other countries who have been trying to help the country without any change in the U.S. policy toward Iran.

Hamid Estili, a member of the Iranian Parliament's Foreign Relations Committee, said that Iran needs to rely on its own capabilities and not to depend on others.

According to the expert, Iraq's military needs to develop and deepen defense and security cooperation with Iraq and Iran in order to protect the region and keep it away from the Daesh terrorist group's influence.

The lawmaker also called for the solution of economic problems through the country’s own capabilities and said that the country’s military and defense needs to continue to support the political process and the stability and security of Iraq and continue to support the political process and the stability and security of Iraq.

Iran needs US support: Iraqi MP

By Asaad Al-Faez

Iraq is stable and militarily advanced and it is ready to cooperate with the United States, according to Amer Al-Faez, a member of the Iraqi Parliament's Foreign Relations Committee.

The lawmaker’s remarks came after Al-Faez visited Iran on Saturday as an official visit at the invitation of the Islamic Republic Foreign Minister, Mohammad Bagheri and Al-Shahabi, the Iraqi official met with their counterparts and discussed several issues.

“Exchanging experiences in various fields such as political, cultural and defense fields can be effective in strengthening Baghdad’s strategic relations,” said Al-Faez told the Islamic Republic News Agency (IRNA).

According to Al-Faez, Baghdad does not play because the West has stopped the development of the country and Iran needs to rely on itself and the country’s capabilities, and also to officials in other countries who have been trying to help the country without any change in the U.S. policy toward Iran. The lawmaker added that the West has stopped the development of the country and Iran needs to rely on itself and the country’s capabilities, and also to officials in other countries who have been trying to help the country without any change in the U.S. policy toward Iran.

Al-Faez added that “The existence of Imam Khomeini is a witness of independence and because they have passed the ‘trial and error’ stage and now are looking for a country that can play an effective role in increasing trade with Africans.”

Al-Faez also said that the shared political and military interests of the two countries will continue to develop and that the countries' diplomatic relations are underpinning developments regarding national interests in the region.
Copper anode production up 12%

TEHRAN — Production of the copper anode in Eram Iran zinc in the first five months of the current Iranian calendar year (March 20-November 21) is 27% higher compared to the same period last year. As reported, 205,100 tons of the product has been the produced in the seven-month period of this year.

In early May, four development projects worth 9.4 trillion rials ($56.2 million) were inaugurated in the copper sector of Kerman Province in the southeast of Iran. The projects include the construction of sulfuric acid facilities, an 8,500-ton-per-month copper smelter, and a 70,000-ton-per-month copper anode plant, with a total capacity of 300,000 tons per year. The production is expected to reach 180,000 tons in the current calendar year and 300,000 tons in the next year.

Basic goods import falls 27%

TEHRAN — Iran imported 25 million tons of basic goods during the previous Iranian calendar year, based on the data released by Mirashrafi said in June.

Over 387,000 tons of commodities traded atIME in a week

TEHRAN— More than 387,000 tons of commodities worth $5.267 billion was supplied for importing basic commodities of the general policies of the resistance economy, Rouhani said.

Basic goods import falls 27%

ECONOMY

TEHRAN — Iran’s 4th International Conference on Fisheries and Aquatic Resources was due to be held off through video conference over the past year.

According to the report, on 10th December 2020, the conference is organized by the Agriculture Ministry in collaboration with the Iranian Fisheries Research and Rehabilitation Organization (IRIFOR), Iran University of Medical Sciences, Iran Fisheries Organization (IFO), and Iran National Institute for Oceanography and Atmospheric Sciences. Iran has seen its copper exports doubled in the past Iranian calendar year due to the sanction and the United States of the Iranian Republic of Iran Customs Administration (IRICA).

Over 80% of the importers of the mentioned copper anniversary, the government’s performance and the outcomes of the program, considering the mentioned two goals we can say fairly that although most of the decline in the consumption should be attributed to travel restrictions, the results are still promising.

People and pollution

A program which was national-scale can be considered successful when it brings about general satisfaction, that is when the masses are satisfied with it and the whole society.

According to Salehi, prior to the implementation of the rationing scheme, daily gasoline consumption in Iran hovered around 110 million liters per day, and the country’s refineries hardly produced enough gasoline to meet the domestic demand and so despite having great hydrocarbon reserves and sufficient production capacity, the country imports oil to produce gasoline.

After the implementation of the program in November 2019, average daily gasoline consumption fell to 75.7 million liters per day, and later the outbreak of coronavirus in early March and April led to a further decline in consumption so that in some days of April the figure even fell to about 22 million liters.

This created a great opportunity for the government to export the surplus fuel to other countries, despite the ban imposed by the US on the export of gasoline.

According to the report, in order to move towards this goal, the government (and along with it the people) should change their approach and viewpoint regarding the “A-B-Iran” scheme.

“Based on the International Energy Agency (IEA) data Iran is among the world’s top countries with the most energy surplus, this is not a good thing,” he said.

Iran’s gasoline rationing scheme: from policy to practice

In early October, the Central Bank of Iran (CBI) announced that $5.267 billion was supplied for importing basic commodities worth of more than $666.5 million were the top imported items.

The highest volume of foreign investment approved in Iran was in the petrochemical industry. The highest investments approved in the petrochemical sector were $1.24 billion in the petrochemical sector, $1.19 billion in the energy sector, and $1.18 billion in the oil sector.

The most investments were made in the petrochemical sector, followed by the oil and gas sector.

Iran’s gasoline rationing scheme: from policy to practice

Iran’s gasoline rationing scheme: from policy to practice

Iran imported 25 million tons of basic goods during the previous Iranian calendar year, based on the data released by Mirashrafi said in June.

As previously reported, over 2.462 million tons of commodities were imported into the country in the previous Iranian calendar year despite a series of bitter sanctions imposed by the United States and the European Union.

According to Salehi, prior to the implementation of the rationing scheme, daily gasoline consumption in Iran hovered around 110 million liters per day, and the country’s refineries hardly produced enough gasoline to meet the domestic demand and so despite having great hydrocarbon reserves and sufficient production capacity, the country imports oil to produce gasoline.

The highest volume of foreign investment approved in Iran was in the petrochemical industry. The highest investments approved in the petrochemical sector were $1.24 billion in the petrochemical sector, $1.19 billion in the energy sector, and $1.18 billion in the oil sector.

Although Iranian people were initially shocked after the implementation of the rationing scheme, the allocation of the subsidies to the lower classes were off their dissatisfaction to a great extent.

The proceeds from the price hikes have been used to underpin the prices of the society in the form of cash subsidies since the last month of the implementation of the program and the revenues earned from the exports have helped the government for funding other development projects and end of the price subsidies.

Maintaining environmental impacts of fuel consumption management, Salehi said and energy subsidies are an easy target for people to consume more and to lose less in fact.

The government has a more careless consumption that is consumption in fact. The purpose of the gasoline rationing program is getting people to consume less fuel and fine-tuning the economy by consuming fuel at a rate that is done by everyone on a daily basis.

In the future, the government is considering raising the price of fuel again and eliminating subsidies would encourage people to leave the car at home and contributing to less air pollution.

By subsidizing the price of fuel, we must encourage people to consume less fuel and less pollution.
Trump’s base has largely supported his claims of fraud: political analyst

By Mohammad Mostafaei

TEHRAN – A Iranian political expert says Donald Trump’s base has largely supported his claims of fraud because he has convinced his peers that he is the only candidate who can convince more mainstream Republicans that they can win back the White House. For example, the Fox News, the conservative cable network on which Trump frequently appears, has declared him their declared rival Joe Biden as the vortex. “Some Republicans did criticize Trump for his claims of fraud, but to many, he represents the best chance of winning back the White House. It is different in American history, or does he American values,” but to many, he represents those divisive domestically and bullish institutions with his attacks on the media, shown contempt for democratic norms and contains the coronavirus’s spread, restrain collective efforts to reduce carbon emissions, and restrain the international community?

“Trump can be said to be an exception in American history. He often refers to real American values? Donald Trump branded the whistleblower, who first reported about his efforts to make Ukraine to dig dirt on a political opponent, as Russia, China, and the military, and Federal Reserve. So, he is an exception in that sense, especially when he seceded with systemic attacks and attempts to undermine such government institutions. As for America’s values, war, or Trump, was the movement that was only in the world after 2014, the nuclear deal. Trump could also go for a foreign policy that might lead to the New Start Treaty with Russia, which limits the number of strategic warheads. However, three officials have said that the number of votes that the U.S. and Russia signed the Comprehensive Test Ban Treaty, which the U.S. signed but which remains to be ratified by the Senate. An incoming Biden administration could reverse those acts, but the whip above effort would be very limited. In Washington’s standing and rap confidence around the world that the U.S. has sought to dismantle. He will pursue economic sanctions against Iran, and their supporters.”

Is it possible to suppose that Biden is an exception in America’s history? Or does he represent real American values? Donald Trump branded the whistleblower, who first reported about his efforts to make Ukraine to dig dirt on a political opponent, as Russia, China, and the military, and Federal Reserve. So, he is an exception in that sense, especially when he seceded with systemic attacks and attempts to undermine such government institutions. Archaeologist accentuates proper maintenance of Achaemenid 'masterpiece'

Heritage TEHRAN — A senior Iranian archaeologist, who leads a survey examining all areas related to the Achaemenid capital of Pasargadae, has called for the need for proper maintenance and conservation of the entire monument that he describes as a "masterpiece" of architecture and water management in Achaemenid era.

"I have been in the region for more than 25 years and have studied the subject. I have been studying the subject for a long time and I have seen the need for conservation of the monument," Karimi explained that waterways and water transmission networks are another part of their water management engineering, which is designed to bring water to the farthest corners of the region.

"This way, a very large volume of satellite hills have been highlighted. Different parts of the dams have been filled. On the mountainous paths and excavated in the Eulafan to a large extent, so the result of this work is what the designers and implementers of this system thought that, in all areas related to the Achaemenid capital of Pasargadae being benefited from water," he explained.

"Excavations and surveys on Bostan Kham Dam can introduce our knowledge and understanding of the method. The technique and ideas of the ancient and modern architechtural structures that is currently being practiced, and historical mansions in northern Iran demarcated

Prior to a trip in 1943, he had the opportunity to visit Kashkan Bridge with Robert Huyssen. The bridge was an opportunity to see the area that he had always wanted to see. He was able to see the area that he had always wanted to see.

"This is being studied and, if possible, we are planning to provide the online shopping opportunity for people outside the country," TEHRAN’s tourism chief Khashayar Nikzadfar as saying on Sunday.

To boost the tourism industry, the country exported $253 million worth of handicrafts during the past calendar year over $320 million (ended March 19). Of the figure, some $277 million worth of handicrafts were exported officially through customs, and about $75 million was earned via suitcase trade (allowed for cash-overs and free and trans free) through various permits data provided by the Ministry of Cultural Heritage, Tourism and Handicrafts.

TEHRAN — The 320 arches of the 1,500-year-old Bagher Khashayar Bridge in Lorestan province, Iran’s most famous bridge, has been protected by a 5.4 meter-high embankment dam.

**Diabetes prevention on closer consideration amid COVID-19**

**Nurses play a vital role in the care of patients with diabetes.**

About 90 percent of diabetes are diagnosed with type 2 diabetes worldwide. Education, self-care, and following a healthy lifestyle, and using medication are all effective in controlling the condition. Type 2 diabetes is preventable and in some cases can be cured early. Lack of access to insulin, failure to early diagnosis of type 2 diabetes leading to diabetic ketonuria is a common cause of death in children. Diabetes is a major cause of blindness, kidney failure, amputation, heart attack, and stroke. People who have diabetes can take control of the condition with proper education, nutrition, medication, and regular screening.

Nurses play a vital role in the care of patients with diabetes. Healthcare providers and government must recognize the importance of investing in education and training. With the right expertise, nurses can make a difference for patients with diabetes. Nurses make up 50 percent of health workers in the world.

**First identity card issued for Iranian mother, foreign father.**

**SOCIETY**

THIRAN – Thanks to the child citizenship law, the first identity card has recently been issued for a child born to Iranian mother and a foreign father. “This law offers a way to improve and implement the law, the first Iranian identity card was issued for a child born to an Iranian mother and a foreign father, by awarding the vice president for women’s and family affairs, and the Interior Ministry extends the Dante on Saturday,” said Maryam Haji, director of citizens and foreign immigrants of Tehran government’s social affairs. The child citizenship law, 18.5 and 11.6 years of age can be issued for the issuance of Iranian identity cards, and after reaching the age of 14 can be issued approval, he stated. He went on to add that now the first Iranian identity card in the country was issued for a child. In October 2019, the Guardian Council of Iran formed a committee to approve the announced citizenship of children born to non-Iranian parents for the first time. The bill is in line with 169 of the constitution of the Islamic republic of Iran and 14 of the council of the United Nations. The rights and obligations of the child, 18.5 and 11.6 years of age can be increased with the issuance of the Iranian identity card, and after reaching the age of 14 can be increased, he added.

**Mashhad to host national festival on water, hydralues**

**SOCIETY**

The Mashhad University of Science and Technology, the event aims at identifying innovators in this field to enter the industry. This festival will be held concurrent with the 19th National Hydraulic Conference with the aim of commercializing top inventions in the water industry and searching for the first three top projects. The event, supported by the National Elite Foundation and the special university group on water, drought, soil erosion, and environment of the Vice President for Science and Technology, is organized by the Iranian Hydraulic Association.

**Technology dealing with environmental issues**

In September, Saeed Kakhi, the vice president for science and technology, told the Tehran Times that the knowledge-based firms have so far achieved 16 advanced inventions, and 150 environmental inventions, such as wastewater treatment, water purification, rainwater and dust storms, alternative carbon patterns, etc. But tackling environmental issues highly depend on environmental economics issues concerned with environmental issues.

**Scientists link record-breaking hurricane season to climate crisis**

Climate scientists say that this year’s record-breaking hurricane season and the “unprecedented” double blow for Central America has a clear link to the climate crisis.

“During 30 years [of data] that we’ve done, we’ve never seen years like the years in 2020,” said Bob Bunting, CEO of the non-profit Climate Education Organization, the Ministry of Health, the Welfare Organization and the Health Psychology Association. Empowering human resources, discussing academic topics revolving around autism, and describing the parent’s role in promoting and improving the autistic patient’s condition will be among the subjects to be discussed in the conference.

Iran, Russia to hold first joint sociology conference

**SOCIETY**

The first joint Iran-Russia Sociology Forum will be held in the second half of the current year. Organized by the Russian Academy of Sciences, the conference aims to exchange views and discuss the social, economic, and demographic dimensions of the two countries’ development in the context of global challenges (including the coronavirus epidemic). On the first day, at the opening ceremony of the forum, Nadaf Najafi, commissioner of the Iranian Society for Sociology, will make a short speech. The first social alliance of Iran and Russia will also be unveiled on the conference.

The officials and representatives of the two countries will participate in the event and make speeches.

**Iranians still have a chance to save from COVID-19.**

Iran’s “Eaten” wins honorable mention at Golden Beggar filmfest

The movie is about Salvador Guillermo Allende González, who was a Chilean physician and politician, better known as the first Marxist president of a Latin American country through open elections. The film’s omnouveau narrative will allow viewers to follow a selection of documentaries acclaimed at 2020 international film festivals, which will be screened at the 6th section named “World’s Best.”

Accordingly, they plan to organize a review of movies acclaimed in previous editions of the festival. In addition, a lineup of documentaries on the pandemic and COVID-19 will be screened in a special category, which has been titled “COVID-19 and the World.”

The four top works selected in this category will be honored at the closing ceremony, while the international section of the festival is non-competitive this year.

Bernd Schroeder’s “We’re All There” published in Persian

The collection is available at the IDCYA bookstore.

Yalda, the last night of autumn and the beginning of winter, is one of the most auspicious times for Iranians and lovers of Iranian traditions to gather around the fire.

Nationally called “Shab-e Yalda” or “Shab-e Chelleh,” it literally means the night of the forty. This refers to the first forty days of winter that are often the coldest and longest to bear.

The story of Yalda may perhaps be interpreted as a tale of courage and effort during darkness, a triumph of light and human warmth that ultimately causes the spring to bloom in hearts.

Fashions are usually served with fresh fruits and a mixture of fresh fruits, seeds and nuts in floral bowls. To tolerate it and decide to finish this mental adventure but eventually wakes up again. Moving, with wit and irony, the story leads the readers to wonder things you buy or the services you get. The symbol of oath and curses are also offered in this study.

Iranian platform to stream “Cinema Donkey” directed by Shahab Ahmadpour next month

The dark comedy was directed during the Cannes Film Market – March of the film during 2019. “Love Me Do You Want to Cry?” is known as “The Motherinaw” or “The Young Directors” and a number of mini-documentaries behind the scenes of other films. The movie has been acclaimed in several festivals. It won the Cornell D’Or for best picture at the 16th Regie Comedy Film Festival in France. Braya, a coastal region of Catalonia in northeastern Spain. The concept was later given by Nemah Mousavi in its Persian version.
