Iran seeks UNESCO recognition for millennia-old petroglyphs

TEHRAN - Iran will put forward charters of its millennia-old petroglyphs as a candidate for inclusion in UNESCO's World Heritage List.

A dossier is to be developed for Teymareh petroglyphs, which are scattered in Khoezin county of Markazi province, to be presented to UNESCO, Khoezin's tourism chief, Ali Meshadi, announced on Thursday.

Similar petroglyphs, which have been discovered in the province of Kohgiluyeh and Boyer-Ahmad can be included in the dossier for a collective registration, the official noted.

Teymareh is home to numerous petroglyphs estimated to be carved in a period spanning from 40,000 to 4,000 years ago, providing insights into past era and cultures both by tools utilized for carving and themes being carved.

Last year, a prehistoric petroglyph, which bears Pahlavi script written by ordinary people of the time, was found during an archaeological survey in the Teymareh region of central Iran. "This is the sixth petroglyph, engraved with Pahlavi script, which has so far been found in the highlands of Teymareh, and the petroglyph is estimated to date back to 2,400 years ago," according to Iranian archaeologist Mohammad Nasserifard.

Nasserifard had earlier proposed a bold hypothesis on a variety of petroglyphs that are scarred in the region, saying "some prehistorical residents of the Iranian plateau migrated to the Americas. His assumption is based on a series of similarities between the petroglyphs and cave painting symbols in central Iran and the ones found in the Americas."

"After years of exploring ancient paintings inside Iran's caves and mountains and other parts of the globe, achieving achievements have been made in this regard," Nasserifard said. Continued on page 4
Iranian ship arrives at Venezuelan port in defiance of U.S. sanctions

Iran and Venezuela continue to defy U.S. sanctions against Iran, with the Iranian Navy's Jask flotilla completing a mission to supply the Venezuelan government with advanced drone and missile technologies. The firstfootage released by the Army indicated that the Iranian-made Arash drone was put to service. The drill aimed to show the Iranian Army's capabilities to respond to threats and to demonstrate the country's military resolve.

We will keep LIAE inspectors if sanctions not lifted by Feb. 21: MP

The former prime minister, Ali Larijani, stated that if sanctions against Iran are not lifted by February 21, the Iranian authorities will keep LIAE inspectors. This is in line with the International Atomic Energy Agency (IAEA) report on the implementation of the Joint Comprehensive Plan of Action (JCPOA) on Iran's nuclear program.

International law experts elaborate on victimization of UN Charter in Gen. Soleimani assassination

A collection of international law experts discussed the legality of the U.S. drone strike that killed Iranian military commander Qassem Soleimani. The experts examined the legal framework surrounding the use of force, the principle of proportionality, and the implications of the attack on the international legal order. The discussion highlighted the ongoing legal debates surrounding the use of force in the wake of Soleimani's death.

Rouhani: Foreign companies want to test their vaccines on our people

Iran's President Hassan Rouhani said that foreign companies are taking advantage of the current situation to test their vaccines on the Iranian population, claiming that this is a legal stand by claiming Iran violated international law, as well as a chance to gain market share in the regional market. The statement comes amid ongoing discussions about the efficacy and safety of the available vaccines.
Afghan president calls long-term relations with Iran

ạc President – As President Ashraf Ghani said on Friday that the Afghan government has made serious efforts to ensure that the Islamic Republic of Iran has no effect on the political process in Afghanistan, the Taliban is becoming a reason for that. The government has started the negotiations with the Taliban in the next step, Ghani told the Associated Press. The talks, which are expected to continue for several days, will be held in the presence of the leaders of the government and the Taliban. The government has also invited the leaders of the Taliban to attend the negotiations.

The President of Afghanistan, Ashraf Ghani, has called for a comprehensive dialogue between the Afghan government and the Taliban to find a solution to the conflict in Afghanistan. Ghani further stated that the Afghan government is determined to continue the dialogue with the Taliban and to find a peaceful solution to the conflict in Afghanistan.

Former Indian weightlifter Ashar Asadrih

Former Indian weightlifter Ashar Asadrih, who represented India at the 2012 London Olympics, has died at the age of 72 after a long battle with the disease.

His mother, who was 72, told the Associated Press on Sunday. She said he had been diagnosed with cancer a few months ago.

She added that he was a fighter and fought against the disease for the last four months.

“Lakshman passed away today, he was a very brave man. He fought for his life and he fought hard. He was not afraid of anything. He was a fighter,” she said.

Asadrih, who was born in 1940, represented India at the 2012 London Olympics and finished 10th in the men’s 69kg weightlifting event. He was a member of the Indian weightlifting team that won the gold medal in the 69kg event.

Asadrih’s family members said he had been diagnosed with cancer a few months ago and had been undergoing treatment.

They added that Asadrih had fought against the disease for the last four months and had died after a long battle.

Asadrih was a national-level weightlifter and had won several medals in the domestic and international competitions.

He had been a member of the Indian weightlifting team that won the gold medal in the 69kg event at the 2012 London Olympics.

Asadrih was also a member of the Indian weightlifting team that won the silver medal in the 69kg event at the 2014 Asian Games.

Asadrih’s family members said they were heartbroken over his death and they were consoled by the memories of his bravery and courage.

Increasing tax income in budget bill not logical in current condition

Meanwhile, it should be noted that economic growth is the main platform for increasing tax revenues. Economic growth means more production of goods and services and thus an increase in tax revenues. The withdrawal of the United States from Iran’s nuclear deal and the subsequent imposition of unilateral sanctions on Iran have had detrimental effects on the country’s economy.

Inflation expectations lower as money growth stops

TEHRAN— The Governor of Central Bank of Iran (CBI) said that the money growth has stopped in the first nine months of the current year (March 20-December 20, 2020), which is an important sign of decreasing inflationary pressure.

Writing in an Instagram post on Saturday, Abdolnasser Hemmati, who mentioned a few points about the country’s economic indicators during this period, wrote: “Today, the Central Bank’s authority and CBI officials published the second report of the inflation rate for the first nine months of the current year which, according to the official news, is in the range of 10.3 percent drop in 12-month growth of inflation in this indicator in the period ended in Azar compared to its previous month Aban, the official noted.”

POGC develops WIMS system to manage South Pars fields

TEHRAN— Pars Oil and Gas Company (POGC), which is in charge of developing Iran’s giant South Pars gas field in the Persian Gulf, has implemented a New Integrity Management System (WIMS) to ensure safe and stable gas production.

According to the POGC Office of Public Relations, this system has been developed and implemented in order to meet the risk of produced fluids flowing into the environment outside the well or to prevent inflow of gas to the wells.

This system can be considered the Oil Ministry’s first integrated management system, which has been developed and implemented after three years of hard work by POGC officials.

“Currently, all the active wells at South Pars gas field are equipped with this system, including Kish, Golshan, and Belaf fields, which will be developed in the future,” Mohammad Aghaie, the POGC’s deputy, said.

Underlining the importance of implementing this system, the official said: “Production wells are the most important factors in the South Pars petrochemical sector and the well integrity management system is a big step to change traditional well management procedures into a modern and knowledge-based approach.”

“Monitoring the process of developing this system, Ayatollah said: first, a list of all existing well abandonment standards in this field was prepared and after studying and reviewing all the mentioned documents, the first version of the system’s regulatory basis was prepared and then after the time of its entrance to the field framework of laws and regulations of the Oil Ministry and other national regulations.

He further emphasized the significant role of this system in the future planning of the field’s oil production and for prioritizing the repair projects and said: “With this system going operational, operational processes are being carried out more accurately and this will be very effective for ensuring safe and sustainable production.”

As Iran’s major natural gas reserve, the South Pars gas field, which the country shares with Qatar in the Persian Gulf, is one of the largest gas reserves in the world and is estimated to contain a significant portion of the world’s reserves, and approximately 18 billion barrels of condensates.

Commodities worth $174m exported to Oman in 8 months

TEHRAN— Iran’s Trade Promotion Organization (TPO) held the first meeting of Iran’s Trade Promotion Organization (TPO) with the Ministry of Industry, Mines and Trade of Oman in Tehran on Wednesday, according to the official, NDF had paid 10 billion rials (about $277 million) to deposit a part of its preceding year’s revenue to support the capital market, which was in fact a note in the National Development Fund (NDF) to other projects (in previous years),” Sha- hbandaran said.

According to the official, NDF had paid in billion rials (about $277 million) to Capital Market Stabilization Fund as its first support package for the capital market in the current year.

“Supporting the capital market must be provided on a permanent and gradual basis,” he said.

The official noted that based on the law on removing barriers to production, since the beginning of the Islamic era, production, technology, and marketing activities have been allocated to support the capital market. If Iran stock market has not received any external shocks such as those from the foreign exchange crisis, political instability, par- ametric markets, and international issues, some internal factors have caused some drops in the stock market.

The government has been implementing important and necessary measures to support the country’s newly grounded stock market. The National Security and Immigration Committee of Iranian Parliament and the Ministry of Finance and Economic Affairs Minister Farzad Piltan have said that the government is going to continue implementing its support programs to help the capital market flourish.

“The stock market situation is not measured only by the fluctuations of indices. The Iranian stock exchange is in the process of becoming a modern stock market,” Djoogar said.
Professor enumerates in images world Islam but promises bright future

There is crisis in the Muslim world but not in Islam.

While these are good things to do, they are not a substitute for living the kind of life that Muslims have to live in order to ensure that the Muslim world stands up for justice and causes that are important to Muslims. The Muslim world needs leadership that is not afraid of people, that is not afraid of the West, and that is not afraid to apiKey [missing data].

In his tweets after he regained access to Twitter on 20 January, Trump stated: "I stand by what I said. This will be a great day for the Middle East with full peace for all. The Palestinians have an opportunity to live in peace with Israel. The US is fully committed to a fair deal for all parties. The Palestinian Authority must work to build a better future for the people of the region."

For 4 years, the Trump administration has worked to improve the situation in the region. The US has supported efforts to achieve a peace agreement between the Israelis and the Palestinians. The US has worked to ensure that the region is more stable and secure.

The US has also worked to support the Palestinian people. The US has provided humanitarian aid to the Palestinian people and has supported efforts to improve the economy in the region. The US has also supported efforts to improve education and job opportunities in the region.

The US has also worked to support the Palestinian Authority. The US has provided support to the Palestinian Authority to help it improve its government operations and to support its efforts to improve the lives of its citizens. The US has also worked to support efforts to improve the security situation in the region.

Overall, the Trump administration has worked to improve the situation in the region. The US has supported efforts to achieve a peace agreement between the Israelis and the Palestinians. The US has also supported efforts to improve the lives of the Palestinian people and to support the Palestinian Authority.
Stratigraphy, excavation project to probe 9,000-year-old hill in northwestern Iran

FOURTEEN TEHRAN – An archaeological project of stratigraphy and excavation work is scheduled to be commenced on Tepe Abja, which is a 9,000-year-old hill located in the town of Esmail Abad, Alborz Garrison, the provincial tourism chief and head of the project announced on Saturday.

Last year, the hill was demarcated by a team of archaeologists to prevent the removal of any precious artworks and previous constructions among the historical area’s boundaries because of illegal activity to remove antiquities from the site, the provincial tourism chief and head of the project announced on Saturday.

During the demolition work, the research team found evidence that confirmed that farming and animal breeding was practiced some 9,000 years ago around the historical hill, and implementation of the new project could help further research, the official added.

Previously, Geravand had said that the northwest of Iran, as a connection bridge between the Iranian plate, the Caucasus and Central Asia, has always played an important role in the movement of goods and cultural fulcrums.

The region has long been a suitable place for settlement since ancient times due to the presence of permanent rivers, springs, animals and plants, and the possibility of irrigation. The history of agriculture is the story of humankind’s development and the impact of plants, animals, water, and soil on human life, which are all connected with the material and spiritual realm. The history of art is the story of human beings and their contact with the natural world. The history of environment is the story of the development of human society, allowing clans and tribes to stay in one location generation after generation. Archaeological evidence indicates that such developments occurred 10,000 years ago.

Exports that pay by 7000 BC, sowing and harvesting reached Mesopotamia. The desire to develop and improve the agricultural and environmental conditions is an important aspect of the civilization. Without the development of agriculture and environment, humans could not survive and progress. The history of agriculture is the story of humankind’s development and the impact of plants, animals, water, and soil on human life, which are all connected with the material and spiritual realm. Shadegan wetland home to wintering migratory birds

Iran among five pioneers of nanotechnology

Iran breaks U.S. monopoly on aviation navigation charts

Atmospheric CO2 in 2021 will reach level 50% higher than before industrial era

Strategic alliance against COVID-19

Iran's share in the world's top scientific articles is 3 percent

Let's learn Persian

The country experienced a three-level improvement in terms of share

Iranian researchers have succeeded in producing aviation navigation charts, known as Inflight AIP (Aeronautical Information Publication), which was monopolized by the United States, according to IRNA news agency reported on Sunday.

Prepared by Iran’s Army, the Inflight AIP was unveiled in Tehran with Air Force Commander Brigadier General Aziz Nasirzadeh and Vice President for Science and Technology Sorena Sattari in attendence.

Digital aeronautical charts, including instrument flight rules (IFR) and visual flight rules (VFR), is a high-quality knowledge-based product which was solely produced by Jeppesen Company and was not available for Iranian airlines due to U.S. sanctions.

In 2001, conservation of the Asiatic Cheetah Project (CACP) is a comprehensive conservation program established by Iran’s government and the United Nations Development Program (UNDP) and several concerned national and international NGOs to reverse the endangered species’ drastic decline.

The project has been comprised of three phases aiming at research, protection, and training courses for the integration of local communities as active partners in protected areas, the first phase was co-funded by the Global Environment Facility and was implemented from 2001 to 2008, while the second phase went into effect in 2010.

The project was implemented on some 5 million (ppm) for several weeks from April in the atmosphere will exceed 417 parts per million (ppm) for the first time this year, but it will not stop the rise from 2 percent, he noted, highlighting, for the first time in the history of CO2 readings, that 2020 was the year that saw the highest increase in CO2 levels.

It’s hard to put a precise number on what the projected annual rise is likely to be after what has been seen in 2020. This is because 2021 is a La Niña year, and the La Niña conditions can boost the growth of tropical forests, which will lead to more CO2 being released into the atmosphere.

The release of emissions by humans is one of the main reasons for global warming, and the La Niña conditions can help to reduce the number of CO2 emissions.

La Niña changes weather patterns around the world, especially in the tropics where the sea level is slightly lower than usual. This condition can also affect the temperature and precipitation patterns in the region.

The country is expected to achieve a three-level improvement in terms of share in the world’s top scientific articles, which is 3 percent.

The country will be playing the leading role in the region in terms of publication of Iranian scientific and technology journals.

The country’s share in the world’s top scientific articles is 3 percent, he noted, highlighting, for the first three consecutively years, Iran has been ranked first in terms of quality and quantity of articles among Islamic countries.

The wetland feeds on Marun and Karun rivers both crossing the Shadegan wetland in the southern Iran, which is one of the highest diversity in the Shadegan wetland, and the highest number of birds was counted in Hour al-Azim wetland.

Fourteen types of indigenous and migratory birds are living in the wetland and they are monitored constantly in terms of health, he explained.

Atmospheric CO2 will hit a level this year that is 50% higher than before the start of the industrial revolution, the Met Office said on Saturday.

The grim milestone will come as humans continue to drive emissions through fossil fuel burning and deforestation, scientists say.

“We’re still going in the wrong direction,” said Professor Paul Stott, head of atmospheric science at the Met Office.

“We have actually altered the composition of the atmosphere through human action,” he explained.

“Our impression is that we have approached a tipping point where, if we are not careful, the CO2 rise is likely to accelerate,” he said.

“Atmospheric CO2 emissions have not stopped increasing. We have not achieved a peak in atmospheric CO2 concentrations,” he added.

“We have now passed the point of no return in atmospheric CO2 concentrations,” he explained.

“The projected annual rise is likely to be more than what has been seen in 2020. This is because 2021 is a La Niña year, and the La Niña conditions can boost the growth of tropical forests, which will lead to more CO2 being released into the atmosphere.

The release of emissions by humans is one of the main reasons for global warming, and the La Niña conditions can help to reduce the number of CO2 emissions.

La Niña changes weather patterns around the world, especially in the tropics where the sea level is slightly lower than usual. This condition can also affect the temperature and precipitation patterns in the region.

The country is expected to achieve a three-level improvement in terms of share in the world’s top scientific articles, which is 3 percent, he noted, highlighting, for the first three consecutively years, Iran has been ranked first in terms of quality and quantity of articles among Islamic countries.

Sorena Sattari, vice president for science and technology has said that Iran is playing the leading role in the region in terms of publication of Iranian scientific and technology journals.

The country’s share in the world’s top scientific articles is 3 percent, he noted, highlighting, for the first three consecutively years, Iran has been ranked first in terms of quality and quantity of articles among Islamic countries.
**French writer Claire Joubert honored at Amman film festival**

"Gabriel", "Haboob" crowned best at Karama Human Rights Film Festival

TEHRAN – Iranian short movie "Gabriel" and long movie "Haboob" won two different categories at the 11th Karama Human Rights Film Festival in Amman, Jordan, on Saturday.

Directed by Youssef Kargar, "Gabriel" was selected as best short film, which is a story about a boy who helps Mandela end apartheid, Bregman shows the readers an experiment to the true story of twin brothers on opposite sides of the conflict in South Africa, and "Haboob" directed by Maho Sumantum was awarded the award for best fiction.

"This is a new project. The first five are written and directed by Marthea Skulandk and the other two are written by Neyyab Habbani and Mohammad-Amin Mimi, and will be adapted by Maha Hababi," added Zarei who is also the television director of the plays.

"The team has tried to produce a new project with a different atmosphere. The message of this great man is so interesting and attractive that they will be very appealing to the audience. The military and moral characteristics of the Commanders are so extensive that they need more and more episodes," he explained.

"Working on the project on Haji Qassim Soleimani should not be restricted to only his martyrdom anniversary, because he is such a great man who has done great things and acts like our mythical hero. We have closely witnessed his bravery and we need to produce works in different arenas on the Commander to better transfer his characteristics to other people," added the producer.

The teleplays have been recorded in a Chrono key background, a type of video-effects and post-production shapes of the figures. The historical scenes were directed by Zarei said.

The art bureaus organized several programs in memory of the Commander after his martyrdom on January 3, 2020.

**"Blue Land" named best at Silver State Film Festival**

Fajr Film Festival announces jury of official competition

TEHRAN – The 38th Fajr Film Festival announced the members of the jury of official competition on Saturday.

Nima Javidi, director of the acclaimed drama "The Guardian" and Farsh-Best, no. 1, in the Anghar Farhadi's Oscar-winning drama "A Separation," are among the jury members.

The jury also has Babak Tahmavoli, director of the acclaimed war drama "The Last Stand" which was highly acclaimed at the Fajr Film festival in 2018, earning awards in six categories including best film and best director. It is also the director of "Khazranak Taleh," a logician about legendary Iranian wrestler Gholamreza Takhti.

Mostafa Kast, director of the comedy film "Mojob," which took a silver medal in the 39th Fajr Film Festival, is another member of the jury.

A representative photo shows pictures of the jury members of the 38th Fajr Film Festival.

"My Hero" and also help the singing style of ballads find its way.

"The main goal of the campaign is to promote the album "My Hero" and also help the singing style of ballads find its way among the public. The bureau has also organized a contest named "Save Barre Film Festival" with the theme of "My Hero" and the logo of the festival. The contest will be held in April."
