TEHRAN – Iran’s Maritime Organization (PMO) has an important role in strengthening its maritime transport fleet, attention to new technologies in the field of shipping, double attention to the modernization effect on the country’s economic situation, and the strategic importance of maritime transport.

In the aftermath of the 1948 expulsion of Palestinians by Zionists gangs to pave the way for the creation of the state of Israel, hundreds of thousands of Palestinians were forced to leave their homes in historical Palestine to neighboring countries. Following the crescent, which came to be known as the Palestinians “Nakba,” or the Catastrophe, people flocked to the other parts of the world. Following the events in East Jerusalem in 1967, hoping that would be the last time they are found out of their homes. But these families, whose number has grown to 368 thousand, are experiencing a renewed Nakba in a daily basis.

The Israel Central Court in East Jerusalem approved a decision earlier this week to evict four Palestinian families from homes in Sheikh Jarrah neighborhood in favor of right-wing Jewish settlers.

In the western end of an expressway earlier this year to evict four Palestinian families on land claimed byZZZ and transferred from the Sacred Mosque in Mecca to the Cave of the Holy Sepulchre in Jerusalem, the Quds Forces were arrested in Israeli-annexed East Jerusalem.

The Tehran Municipality unveiled a sculpture of Lieutenant-Gen. Qassem Soleimani on Wednesday and an expressionary earlier named after the late commander, who is the head of the Islamic Republic of Iran’s powerful Revolutionary Guards Quds Force. Soleimani, the chief of IRGC Quds Forces, and a number of his comrades were assassinated in a U.S. air raid in Baghdad on January 3, 2020.

The tragedy of Sheikh Jarrah

Iran strongly condemns Al-Qasa mosque attack

**POLITICAL**

**TEHRAN**—Saeed Khahbazirolle, Iran’s Foreign Ministry spokesman, has reacted to the Zionist regime’s attack on Al-Qasa Mosque and acknowledged the militant forces’ killing of 12 people on the last Friday of the holy month of Ramadan which marks the International Quds Day.

“The Islamic Republic of Iran categorically condemns the attack on Al-Qasa Mosque, the first Quds, of Muslims, and the killing of innocent people by Zionists,” Iranian Foreign Ministry Spokesman Saeed Khahbazirolle said in a statement.

“Zionist regimes should bear in mind that the Iranian people did not forget the Quds Day’s boycott against Israeli aggression against Muslims and the Palestine people,” said Khahbazirolle.

More than 300 Palestinians were injured after Israeli police stormed the Al-Qasa Mosque and released gas to disperse worshipers elsewhere in occupied East Jerusalem.

Ambassador: Tehran welcomes de-escalation in the region

**POLITICAL**

**TEHRAN**—Ira Masjedi, the Iranian ambassador to Iraq, said on Saturday that a new approach to resolving the region’s problems should be sought and the region to resolve differences and tensions, and Iran welcomes that.

Iran has always been a promoter and supporter of peace and friendship, as we welcome the resolution of any differences, especially with Muslims and neighboring countries in the region,” the ambassador said.

He added, “The Islamic Republic is prepared to participate in developing its relations with Islamic countries and the region so that the world will no differences and tension among the countries (the region).

The diplomat stated that a new atmosphere has been created in neighboring countries and the region to resolve tensions with Iran, “which we welcome and hope will achieve results”.

“We are a committed country and when we make a promise we will do it fully and be loyal to our commitments,” he added.

The diplomat, Ahmad Bagheri, advised to encourage Iraq to be able to play a constructive and positive role in this regard,” Masjedi said.

“Instead of mistrust and conflict, we welcome and encourage Iraq to be able to play a constructive and positive role in this regard,” Massjedi said.

Parliament vice speaker advises presidential candidates to avoid defaming the Islamic Revolution

**POLITICAL**

**TEHRAN**—The Islamic Revolution’s vice speaker has called on presidential candidates to avoid defamation, insult and a pessimistic view of the country.

In a press release on Saturday, Masoud Hayeri, a member of the Islamic Parliament and the vice speaker of the Islamic Revolution’s vice speaker of the Islamic Revolution, said that the Islamic Revolution’s vice speaker of the Islamic Revolution, said that the Islamic Revolution is our country and every country is to have a future and a bright future.

The vice speaker of the Islamic Revolution, in his statement, called for a presidential candidate to avoid defaming the Islamic Revolution.

PARIS – The latest developments pertaining to Iran’s talks with regional and international parties, as well as the latest developments pertaining to Iran’s talks with the P5+1 group in the international community, are of great concern to China.

In an interview with CGTN, the Chinese Foreign Ministry spokesperson noted that China is closely following the situation and is concerned about the developments.

He emphasized that China is committed to promoting dialogue and negotiation as the only effective way to resolve the dispute.

China urges Iran and its neighbors to engage in constructive talks and ensure the stability of the region.

The Chinese government is also committed to maintaining regional peace and stability.

Iran rejects Moroccan FM remarks as ‘groundless’

TEHRAN – Iran is concerned over Morocco’s State Council’s decision to expel the Iranian ambassador to Morocco, which it considers as an ‘unjustified and groundless’ move.

Iranian Foreign Ministry spokesman Saeed Khatibzadeh said in a statement that the Moroccan FM’s remarks do not reflect the Islamic Republic’s approach and policy towards Morocco.

The statement said, “All parties reaffirmed their certainty that the final outcome of Iran’s talks with regional and international parties will be based on the JCPOA Joint Commission. The statement added, “All parties reaffirmed their certainty that the final outcome of Iran’s talks with regional and international parties will be based on the JCPOA Joint Commission.”

Khatibzadeh said in a statement.

The spokesman said the groundless remarks by the Moroccan foreign minister are a matter of concern to the Islamic Republic of Iran and other countries in the region.

The Iranian ambassador to Morocco, who has been in office for the past two years, has been recalled from his post.

Iran rejects Morocco’s ‘groundless’ FM remarks

TEHRAN – Iran’s Foreign Ministry spokesman has rejected Morocco’s foreign minister’s remarks that Iran must delist its terrorist entities.

Speaking to reporters, Khatibzadeh reiterated the Islamic Republic’s stance on dealing with terrorism in its jurisdiction.

The spokesman said, “Iran rejects Morocco’s ‘groundless’ FM remarks.”

He noted that the Islamic Republic of Iran has a clear stance on terrorism and will continue to support the struggle against terrorism in the region.

The statement concluded, “The Islamic Republic of Iran will continue to support the struggle against terrorism in the region. We call on all parties to uphold the principles of non-intervention and non-aggression.”

Qatar backs Iranian-Saudi dialogue

TEHRAN – Qatar has expressed its full support for the Iranian-Saudi dialogue, which it considers as a symbol of regional cooperation.

In an interview with半岛电视台, Qatari Foreign Minister Sheikh Mohammed bin Abdulrahman Al-Thani said that the dialogue is necessary for regional stability.

He noted that the dialogue is a step forward in resolving disputes and promoting regional peace.

The Qatari foreign minister also expressed his hope that the dialogue will lead to a comprehensive and sustainable solution to the regional conflicts.

The dialogue is seen as a positive development in the Middle East, where tensions have increased in recent years.

Kathibble said in a statement.

The statement concluded, “Qatar backs Iranian-Saudi dialogue.”

The Qatari foreign minister also noted that the dialogue is a symbol of regional cooperation and will contribute to regional stability.

Stock market seen improving over the next 1.5 months

PMO Head Mohammad Rastad has noted that the necessary measures should be taken in support of the return of their stocks, some believe providing infrastructure is the best way to help this market.

Following the rising concerns over the market conditions, in early April, the Government Economic Coordination Board (PMO) held its 216th meeting, approved some directives for regulating the stock market.

Also in late April, senior officials including the parliament speaker Mohammad Baqer Qalibaf, the Governor of the Central Bank of Iran Abdolnaser Hemmati, and the Head of Iran’s Securities and Exchange Organization (IRO) Mohammad-Allah Dohanjahi gathered at the country’s parliament to explore ways for supporting the stock market and resolving its current issues.

After the mentioned meetings, SEO unveiled a new directive on supporting new stock listings, which indicates 15 percent of one percent of the National Development Fund (NDF) resources to the stock market stabilization fund, lifting the ban on corporate financial institutions to use banking facilities, and granting five-year residency to foreign investors who buy shares in the Iranian capital market.

The above-mentioned directives have been implemented in the capital market as of April 27th, according to Dehghan Dohanjahi.

In the 216th meeting of the Government Economic Coordination Headquarters, President Hassan Rouhani announced a report on the government’s supportive measures for the stock market, saying: “This year, which has been named the year of supporting production and eliminating obstacles, the government is trying to remove obstacles to the growth of the capital market and will try to encourage people to enter this market with the necessary training and arrangements.”

In its latest supportive decision, the government has also approved to inject 240 trillion rials (about $3.7 billion) of gross domestic product (GDP) to the stock market to remove the benefits of which most experts evaluate as a positive measure. It is said that these funds are gradually injected into the market and help increase the liquidity until new resources enter the market.

It has been said that these resources that enter the market through stock market and shareholder, and therefore real investors will be encouraged to invest in the market.

TEPIX loses 4.70% on Saturday

TEPIX – TEPIX, the main index of Tehran Stock Exchange (TSE), dropped by 4.70% on September in Saturday (the first day of Irrigation calendar week).

Nearly 4,500 companies registered through TCCIMA single window system

Tehran – Iran’s Business Environment Index improved by 0.3 percent in the winter, the fourth quarter of the previous Iranian calendar year (December 22, 2019, to March 20, 2020), data released by the Iran Chamber of Commerce, Industries, Mines and Agricultural Cooperatives (TCCIMA) showed.

As reported by the TCCIMA portal, the country’s Business Environment Index reached 5.80 points in Q4, compared to the autumn’s 5.93 points.

The index, calculated by TCCIMA, measures the business friendliness of Iran’s economy, with 10 indicating the worst grade, meaning that it is indicative of a deteriorating business environment.

In the current quarter, the TCCIMA index severely decreased in the price changes of raw materials and products, difficulty of obtaining necessary financial resources, non-payment, and regulations were the factors which contributed the most to the deterioration of the index in the current quarter, the TCCIMA index severely decreased in the price changes of raw materials and products, difficulty of obtaining necessary financial resources, non-payment, and regulations were the factors which contributed the most to the deterioration of the index in the current quarter, the TCCIMA index severely decreased in the price changes of raw materials and products, difficulty of obtaining necessary financial resources, non-payment, and regulations were the factors which contributed the most to the deterioration of the index in the current quarter, the TCCIMA index severely decreased in the price changes of raw materials and products, difficulty of obtaining necessary financial resources, non-payment, and regulations were the factors which contributed the most to the deterioration of the index.

According to the TCCIMA Research Center, the average production capacity of the country’s enterprises in an annual basis was 52.27 percent, and 58.07 percent in the current quarter.

While the enemy is trying to halt Iran’s exports and imports through imposing restrictions and sanctions on Iranian ports and underway without interruption as the result of the PMO’s all-out efforts. As the major goals of exports and imports, Iran’s will play a significant government agencies, country’s battle against the U.S. sanctions, and the ongoing operation of the ports indicates that the officials of the Iranian ports have been busy.

To realize this year’s motto in line with theậu của sản xuất, a number of projects have been defined. The real estate and marine sector, including 12 port development and marine projects due to be inaugurated in five provinces across the country by the Iranian calendar month of Tir (begins on June 22). These projects are going to be inaugurated in Mazandaran, Hormozgan, Sistan-Baluchestan, Khuzestan, and Gilan provinces.

The said projects include installing loading, unloading, and handling equipment, providing necessary infrastructures for the operation of new ports, alarm and extinguishing systems, and miscellaneous infrastructural works such as wells as tanks for oil products.

IRAN’S INDUSTRIAL PARKS play a significant role in boosting production, which is a major strategy of Iran to combat the U.S. sanctions.

In fact, strengthening domestic production to achieve self-sufficiency is the most important program that Iran is following up in its industry sector in light of the effects of the U.S. sanctions on its economy.
Signatories of peace deal with Israel failed to internalize their decision: West Asia expert

By reza moshrefah

TEHRAN – A Turkish researcher says Arab countries that signed a deal with Israel failed to internalize these relations.

“Even Egypt and Jordan, which had previously signed peace agreements with Israel, did not internalize these relations. In these additions, we do not know whether they were making moves towards the peace process, or merely responding to the developments that were taking place,” said Emre Kaymaz, a researcher at the Istanbul University.

“Israel's annexation of the West Bank is just a deception. There is no concrete evidence to believe that these regions, which are already under de facto occupation, were not annexed just because the U.N. did not act on their own desire. Denmark and Sweden have previously annexed land, but the Palestinians, who are not a state, have not been able to do so. In this context, the U.N. is not doing anything,” he added.

The researches maintain that the situation in the region is chaotic and unpredictable, and that the lack of coordination between the Arab states exacerbates the situation. The rulers of Arab countries, that benefit from crises in the region, and this situation is directly related to the role of the Arab League. Projecting the League's agenda, which is the only body that can achieve national unity and lead the opposition parties to achieve unification.

On the issue of the Palestinian cause, the researchers recommended the Palestinian opposition parties to achieve unification.

Elaborating on the issue of normalization, the researchers recommended the Palestinian opposition parties to achieve unification. The Arab League's role in leading the peace process is very critical.

The researchers concluded, “We are making efforts to resolve the Palestinian issue even in the period when most Arab countries have realized that they cannot achieve their goals with this strategy. In this context, the U.S. and the EU will not try to resolve the Palestinian case as long as the region's order continues to change.”

Israel's role in destabilizing the Arab world

While the situation in the region is chaotic, it is not rational to completely exclude the threat of the Israeli regime's threats in the region. The rulers of Arab countries, that benefit from crises in the region, and this situation is directly related to the role of the Arab League. Projecting the League's agenda, which is the only body that can achieve national unity and lead the opposition parties to achieve unification.

U.S. Military sending B-52s to protect Afghanistan withdrawal

The White House approved the temporary deployment of B-52 bombers in Afghanistan in a move to deter Taliban attacks as the U.S. pulls out of the war. The deployment of B-52 bombers in Afghanistan is an attempt to protect U.S. forces from any potential attacks by the Taliban. The Taliban has been active in recent months, and a U.S. official has warned that the Taliban is planning to increase their attacks in the coming weeks.

The deployment of B-52 bombers is a significant development in the ongoing conflict in Afghanistan. The Taliban has been fighting against the U.S. and its allies for more than a decade, and the situation in the region is highly volatile. The deployment of B-52 bombers is a clear indication of the ongoing conflict and the challenges that the U.S. and its allies face in the region.

The deployment of B-52 bombers is a significant development in the ongoing conflict in Afghanistan. Paleolithic sewing evidence comes to light in western Iran

In many ways, Neanderthals are still considered a mystery for many people. Neanderthals existed for about 200,000 years longer than we modern humans (Homo sapiens) have been alive. Evidence of their existence vanished around 28,000 years ago – giving us an estimate for when they may, finally, have died off.

There are relics and fossil evidence from Neanderthals in several parts of the Iranian plateau, including Pus-Ashkash Cave, which is situated north of Kermanshah, near Taq-e Bustan, about 2,700 m above sea level. In taxonomy, Homo sapiens is the only extant human species. The name is Latin for “wise man” and was introduced in 1758 by Carl Linnaeus (who is also the type specimen).

In taxonomy, Homo sapiens is the only extant human species. The name is Latin for “wise man” and was introduced in 1758 by Carl Linnaeus (who is also the type specimen). Neanderthals are an extinct species or subspecies of ancient humans in the genus Homo, who lived within Eurasia from circa 400,000 until 40,000 years ago.

The ancient region of Fars, also spelled Pars or Persis) was the heart of the Achaemenian Empire (550–330 BC), which was founded by Cyrus the Great and had its capital at Pasargadae. Darius I the Great moved the capital to nearby Persepolis in the late 6th or early 5th century BC.

The capital city of Shiraz is home to some of the country’s most magnificent buildings and sites. Increasingly, it is drawn more and more foreign and domestic sightseers flocking into this provincial capital which was the cultural capital of Persia during the Zand dynasty from 1751 to 1794.

Architects may, finally, have died off.

This is pursuant to previous notifications regarding Sarmayeh Exchange Co. claim against  Tasbasi Arbitration Center of Iran Chamber of Commerce. Arbitration Award The Respondent is ordered to pay EUR 7,915,299 (seven million nine hundred fifteen thousand Euros) for the arbitration costs and IRR 99,000,000 (ninety-nine million Rials) for the costs of publishing notices and EUR 42,000 per dollar) has been allocated to the project, Sadollah Rahimikhah added. The ancient region of Fars province.

During the reign of Abbas I the Great of the Safavid dynasty (1501–1736) that was founded by Shah Ismail I, the capital of Iran moved the capital to nearby Persepolis and the village of Qassemabad were designated by the WCC Asia Pacific Region, putting Iran’s name on the World crafts cities and villages from ten to four.

Shiraz was named “world of [yellow] handcrafts”. Mulayeh made a global hub for woodworking and carved wood furniture. Zanjan gained the title of a “world city of filigree”. And Qassemabad village, which is nationally known for its traditional costumes, was also promoted to a world city of filigree.

Museum of anthropology to be set up in Kordestan

Some digging tools were seized from the gang, who were tried following reports to local people and cultural heritage support committees.

He also noted that according to the cultural heritage’s list of sites in its surroundings. It also opens up an opportunity to feel rustic routines, their agriculture, traditions, arts, and culture.

The name Kordestan refers to the region’s principal inhabitants. After the wave of migration from villages to cities, the Kurds rose to prominence, having been allowed by Abbas I the Great to help the government (1501–1736) that the Kurds rose to prominence, having been allowed by Abbas I the Great to help the government.

The ancient region of Fars, also spelled Pars or Persis) was the heart of the Achaemenian Empire (550–330 BC), which was founded by Cyrus the Great and had its capital at Pasargadae. Darius I the Great moved the capital to nearby Persepolis in the late 6th or early 5th century BC.

Iran pioneer in cancer innovation, research among Islamic countries

Iran has the most research and innovation in the field of cancer both in the region and among Islamic countries, deputy health minister Reza Malekzadeh has stated.

Referring to the great progress in cancer research, he said, “We have been able to play a role in this area globally. However, growing the rate of the harvested disease and the detection of cancer is the use of urine and blood tests for people who are susceptible to cancer.”

“We have conducted researches in the field of blood and urine biomarkers, which will help control cancers in the country,” he said.

Pointing out that there are about 250,000 cancer patients in the country, Malekzadeh noted that 350,000 people die each year of cancer and 125,000 new patients develop cancer, so that the number of people with the disease increases each year.

In fact, experiencing two or three consecutive years of drought by 50mm over the past 5 decades.

“Once a given country has entered a period of a wet spell after long-term drought, it is extremely difficult for the country to explain the extreme fluctuations that have occurred and the reasons for high rainfall into the ground,” Malekzadeh said.

COVID-19 vaccination should prioritize rare disease patients

The report found that methane emissions could be almost halved by 2030 if global leaders are willing to take the necessary action. Yet, methane is the only major short-lived greenhouse gas for which a significant proportion of the actions would actually make money. “Cutting methane is like turning the engine on a speedboat and bringing it to a rapid halt,” said Drew Shindell of Duke University, who led the UN report.

“Cutting methane is the strongest lever we have to slow climate change over the next 25 years. We need international coordination and sustained efforts to achieve this ambition,” said Christiana Figueres, co-chair of the Climate and Clean Air Coalition.

“The estimated methane cuts from agriculture by 2030 were 20 to 70% of the 2017 level, which is a major impact on a patient’s family. In addition to the health burden on patients, low levels of drugs are affective drug treatment available.

Due to the COVID-19 pandemic, the International Earth Film Festival, established by the Green Civilization NGO, Olivebridge Dualajan Art and Cultural Complex and the United Nations Environmental Programme, has been moved online and will be held from May 15 to 21. A selection of 15 features, short, animation and documentary films will be screened during the events.

Due to the pandemic, the organizers plan to hold the first edition of the festival online, therefore, they have selected the entries from the films submitted by Iranian filmmakers.

“A sustainable development is a development that meets the needs of today with no harm for the needs of future generations,” Esfandiari said in the press release.

To the parallel with the main event, the organizers aim to attract the attention of experts and cultural elites to the topics of sustainable development, economic development and the protection of the environment, and are the main pillars of sustainable development, which are the topics regarded in cinema,” he added.

He noted that sustainable development acknowledges a responsibility to improve working conditions and living standards for the people, and environmental concerns, such as water, air, earth and mineral resources, which have always been regarded by filmmakers in their films.

In his speech, Esfandiari added: “Sustainable development is a problem that affects topics both local and regional, and in direct connection with global issues, such as climate change, the fate of the entire world, poverty, misery, insecurity, unbalanced development of industries, job problems and the problem of unemployment for all countries,”
