Production will fail to keep pace without tapping new technologies

BY M.A. SAKI

The seven presidents of the Iranian plastics industry have been busy in persuading the government to make this year the plastic producers' year. The reason is that the government is expected to do more for the plastic industry.

The industry has been making efforts to promote the use of plastics in the country. The government has been trying to encourage the use of plastics in the country. The reason is that the government is expected to do more for the plastic industry.

Zionists are a one trick pony called VIOLENCE…

32 A bit more of wishful thinking. But the real achievement, despite the carnage, is the apparent and long sought salvation of Palestinians against Apartheid and occupation, and just as importantly, what appears to be a worldwide renouncing of anti-Semitism by the Zionists, who have been exposed and whose hasbara can no longer eliminate. Americans are also waking up and have been seen supporting, among group, the grassroots ground, in a rural and a border area, its citizens. He says through his exuberant life, the power of nation and colonialism on various largely Muslim lands?…

As the Iranian parliament late last year Iran will continue to reduce its commitments and now it is ready to participate enthusiastically in discussions with the European countries.

The presidential candidate was indirectly referring to U.S. plans to lift sanctions and wants to keep the JCPOA, the official name for the 2015 nuclear deal.

In the JCPOA we acted to our commitments and now it is ready to participate enthusiastically in discussions with the European countries.

The parliament speaker also said it is not wise. The unemployed who have no answer but further repression and violence, which shifts the blame to the victim, as the Zionists (unless it is redeemed in practice as some benign movement) is doomed, and (unless it is redefined in practice as some benign movement) is doomed, and...

TEHRAN – Indigenizing the technology for the manufacturing of some special parts and equipment in different work fronts, the development of the phase 14 of Iran’s South Pars gas field has saved the country $1.481 billion, head of the Industrial Development and Renovation Organization of Iran (IDRO) announced on Tuesday.

Making the remark while visiting the complementary stages of the first phase of the South Pars gas field development project, special and advanced goods such as rotating equipment and packages have been supplied for the first time by the domestic companies.

He stated that the value of this group of goods required for phase 14 of the South Pars Field is about $30 billion and was manufactured by the domestic suppliers for the first time, is more than $170 million in their currency. He added that the cost of these parts has been reduced domestically for the other phases of South Pars.

The first market’s index dropped 7,079 points, and the second market’s index decreased 28,386 points. The third market gained 8,132 points, and the fourth market closed at 1.151 million on Wednesday.

Over 8.442 billion securities worth 62.22 trillion rials (about $170 million, head of the Industrial Development and Renovation Organization of Iran (IDRO) announced on Tuesday.

TEHRAN – National Iranian Oil Company (NIOC) has taken all the necessary measures and placed all the operating oil export to pre-sanctions levels within a month, a senior official with the company announced.

"We have good trade relations with Iraq and other countries in the region, and this window has been opened for the countries in the region to use this opportunity for increasing their communication and trade exchanges," the official noted.

"Moreover, it is estimated that cooperation between Iran and Azerbaijan is in the interest of all countries in the region. The Islamic Republic of Iran is ready to cooperate with both Azerbaijan and the Republic of Azerbaijan in the fields of oil and gas," he added.

During the meeting, the officials also discussed cooperation on transportation of the oil and natural gas to the Complementing the Mahshid railway and connecting Nakhchivan with both the Caspian Sea and the Islamic Republic of Iran. The meeting is planned to convene at least in five working groups to follow up on the above-mentioned issues.

The minister, along with Shahin Mustafayev, the Iranian Oil Company (NIOC) director, also met with other several industrial areas in the mentioned country.

TEHRAN – Iran, Nakhchivan concur on expanding transport, trade co-op

Nakhchivan has made all the necessary investments and infrastructures, and the procurement window has been opened for the countries in the region to use this opportunity for increasing their communication and trade exchanges, the official noted.

Khavazi said, adding, “There is a good opportunity for production restoration were also put on the agenda, and plans were made to revive production at one week, one month, and quarterly intervals, Al-khakani explained. This is so required for a full recovery to take three months, because the gas fields in the region that remain are the most expensive and we anticipate receiving most of the targeted capacity within one month,” he added.

According to the official, the NIOC approach has been always to be fully prepared so that whenever maximum oil production is needed the company would be able to restore production in the shortest possible time.

“For this purpose, all fields have been thoroughly studied, and naturally the younger and greener fields return to their production potential more quickly,” the official stated.

Al-khakani, in response to a question about the estimated output of production capacity to pre-sanctions levels at this point noted: “In any case, recovery of wells and restoring production will come at a cost.” He added, “After the other production pace is limited to restoring previous production capacity, and in the second step, plans will be made to increase production.

The total production capacity of Iran oil before the re-imposition of sanctions was 3.8 million barrels per day, and the National Iranian Oil Company has planned to expand production in the first step if the sanctions are lifted, he said. This will increase the country’s production capacity to more than four million barrels per day, Al-khakani explained.

In his visit, while emphasizing the need to improve facilities, Khavazi stressed the two countries’ efforts and interest for expansion of trade and logistics cooperation according to Al-khakani, seeking to cooperate in the region and the bilateral agreement among Russia, Azerbaijan and Armenia, the activation of the Tabriz-Sud- khandan railway between Azerbaijan and Russia is on the Iranian Transport Ministry’s agenda, which will expand the road and railway connections to the region as the countries in the region.

Referring to the impact of the coronavirus pandemic on the mentioned of the referred Ministry, Masht法man said: “Accord- ing to the previous announcement, this train was scheduled to be handed over to the commissioning contractor by late June, however, due to the new wave of the pandemic in Europe and the closure of equipment manufacturing companies the handover was not possible.”

He added that with the measures taken by the PGC’s HSE department, daily health control tests are being conducted to cover the employees.

Masht法man had earlier announced that all the operations of the first phase of the South Pars gas field development project will be completed in the first half of the current Iranian calendar year 1400 (ended on March 20).

POGC is in charge of developing South Pars gas field which is divided into 24 stages and the first development stage. Most of the phases are fully operational at the moment.

Phase 14 is aimed at developing 81 million cubic meters per day of gas, 75,000 barrels/day of condensate and 450,000 tons/year of liquid petroleum gas and one million ton/year of ethane to be fed to petrochemical complexes.

Back in October 2020, the operator of the South Pars Phase 14 development, Iran Petroleum Development Co, announced that the phase would be scheduled to be fully operational by the first half of the current Iranian calendar year 1400.

The huge South Pars Field, which Iran shares with Qatar in the Persian Gulf basin area of 5,764 square Kilometers, 3,700 square kilometers of which are Iran’s territorial waters. The remaining 2,064 square kilometers, called North Dome, are claimed by both countries.

The field is estimated to contain a significant amount of natural gas, totaling about 1,148 trillion cubic meters, about 8.18 billion barrels of condensate.

TEPDI loses 8,200 points on Wednesday

TEHRAN – TEPDI, the main index of Tehran Stock Exchange (TSE), lost 8,203 points to 1,451,823 million on Wednesday.

Over 8.442 billion securities worth 62.22 trillion rials (about $170 million, head of the Industrial Development and Renovation Organization of Iran (IDRO) announced on Tuesday.

TEHRAN – Iran’s NATIONAL Petrochemical Company (NPC) and the German Institute for Quality Management Services (QMS), which is the representative of the European Organization for Quality (ENOS) and the International Organization for Standardization (ISO), signed a memorandum of understanding (MOU) for cooperation in the field of excellence.

The MOU was signed by NPC’s director of planning and development and the CEO of the German Institute for Quality Management Services (QMS), which is the representative of the European Organization for Quality (ENOS) and the International Organization for Standardization (ISO), signed a memorandum of understanding (MOU) for cooperation in the field of excellence.

As Sharana reported, the MOU is aimed to provide NPC with training and evaluation tools for a better business excellence and also allows the company to access the European Foundation for Quality Management database to use in the Iranian petrochemical industry.

The International Conference on Business Excellence in Petroleum Chemical Industry was held at the place of the Iranian Oil Ministry with the presence of heads of Iran petrochemical buildings and companies and several guests from the EFQM board of directors. The conference was focused on the presentation of the International Quality Excellence Model was presented at this conference by the designers of this template.

The European Foundation for Quality Management (EFQM) is not only a membership of the EFQM foundation in Brussels, established in 1989 to increase the competitiveness of European economy. The initial impetus for forming EFQM was a response to the work of W. Edwards Deming and the development of the concepts of Total Quality Management.

NPC inks co-op MOU with German QMS institute

Although we have estimated the time required for a full recovery to be three months, the official added.

Later on the half of the current Iranian calendar year 2021, which has now increased to 1,833 MW of dispersed generation power plants, which have been constructed over the past few years, inject their generated electricity into the national grid.

Rajabi Mashhadi said that these power plants sell their electricity based on the guaranteed purchase rates for new power projects and the rate set by the Electricity Market Regulatory Board for older plants, adding that the rates are time higher than the wholesale market price ceiling.

The installed capacity of the mentioned power plants stood at 1,864 MW at the peak consumption period in the previous year (ending March 20), which has now increased to 1,833 MW, he stated. Furthermore, he added, “All the electrical power generated by these power plants has increased byalmost 10 percent since the beginning of the current year compared to the same period last year, the official added.

Teheran Province Electricity Distribution Company with 36 MW and Sistan-Baluchestan Persian Gulf Electric Company with 36 MW, have the highest and lowest share of distributed generation power plants, respectively, according to Rajabi Mashhadi.

Dispersed generation power plants are small, highly efficient plants that would be built along the existing grid, close to the end-user consumer. It is similar in concept to the move from large central power plants to computers on a desktop.

ECONOMY TEHRAN – Iran’s National Petrochemical Company (NPC) and the German Institute for Quality Management Services (QMS), which is the representative of the European Organization for Quality, signed a memorandum of understanding (MOU) for cooperation in the field of excellence.

As Sharana reported, the MOU is aimed to provide NPC with training and evaluation tools for a better business excellence and also allows the company to access the European Foundation for Quality Management database to use in the Iranian petrochemical industry.

Agricultural products account for 23% of Iran’s export to Iraq

Iran, Nakhchivan concur on expanding transport, trade co-op

"We have very good trade relations with Iraq, but we are exploiting the zone for the export to this country," Khavazi stated.

"Iran and Iraq are expanding day by day and we are always ready to have long-term and sustainable relations with our neighbor in the agricultural sector," the official said.

"To cooperate in different sectors, we must have a timetable that fits the agricultural calendars of the two countries," Khavazi said, adding, "There is a good ground in improving the goods that we import from other countries that we can supply from Iraq and vice versa.

In mid-January, Iranian Economy Minister Reza Ardakanian, who is the head of the Iran-Iraq Joint Economic Committee, said that the two countries’ annual trade is going to be increased to $20 billion.

Ardakanian made the remarks in the opening ceremony of the two countries’ four joint Economic Committee in Tehran, which he co-chaired with the Iraq Minister, Ali al-Alboudi.

“The Islamic Republic of Iran is ready to support the import of Iraqi goods and technical services to Iraq by establishing a joint investment fund,” said, adding that new agreements are going to be signed between the two countries in the fields of water and energy.

He also underlined the development of transportation links between the two countries as an important factor in the development of trade relations between the two countries and added, “We are ready to implement the previous agreements in the fields of electricity, gas, and water, and to formulate new agreements in this field in order to develop cooperation between the two countries.”

The official further called for signing agreements for cooperation in other fields including double taxation, investment, and economic relations between the two countries.

Ardakanian also mentioned the positive political relations between the two countries as a base for boosting economic relations.

He expressed hope that with the efforts of the two countries’ governments and businessmen, the development of trade and economic relations between the two sides will become smoother and the talks in the Joint Economic Committee meeting will lead to the signing of a high-ranking Iraq-Iran co-op allocation at a government level.

Further in the meeting, Al-Alboudi said the presence of a high-ranking Iraq-Iran co-op allocation at a government level and the Joint Economic Committee meeting is an indicator for cooperation in the determination of basing cooperation with the Islamic Republic of Iran in order to identify and eliminate the existing obstacles and the sides’ trade development and to take the necessary measures.

“Given the important relations between the Islamic Republic of Iran and Iraq, both countries can help each other by sharing their experiences and technical knowledge to have good cooperation on important economic issues,” he stressed.
There is a growing movement for social democracy in the U.S.?: Jeffrey Green

By M.A. Saki

TEHRAN – A professor at the University of North Carolina, Jeffrey Green is a leading voice in the United States on issues related to social democracy. He argues that the current political climate in the United States is ripe for a revival of social democracy.

“Socialism has long been opposed by the American political establishment because of its association with totalitarianism, its relation of entrenched individualist and capitalistic values, and its role in robbing the working-class and poor of political power,” Green writes. “But social democracy is not the same as socialism. The social democracies in Northern Europe (e.g., the Scandinavian countries, Finland, the Netherlands, Belgium, etc.) are hardly anti-capitalist, since they manage to provide much more robust social security, education, and even health care to their citizens. In the United States, the opposite is true.”

Green notes that the social democracies have managed to maintain high levels of social welfare while also preserving strong capitalist values. He argues that the United States could learn a lot from these countries, particularly in the area of health care.

He also notes that social democracy is often conflated with socialism in the United States, which he says is a mistake. Social democracy is a system that seeks to address the needs of its citizens while also preserving capitalist values. Socialism, on the other hand, is a system that seeks to eliminate capitalism altogether.

Green argues that the United States is in need of a social democratic system to address its many problems. He notes that the United States has one of the highest levels of income inequality in the world, and that many Americans are struggling to make ends meet. He also notes that the United States has one of the lowest levels of social safety nets in the world, with many Americans只能 survive on poverty assistance.

Green’s book, “The Battle for Social Democracy,” is a call to action for Americans to support social democracy. He argues that the United States is in a period of extreme polarization, and that social democracy is a way to bring people together and address the many problems facing the country.

Green notes that social democracy is not a perfect system, but that it is a better system than capitalism. He argues that social democracy is a system that seeks to address the needs of its citizens while also preserving capitalist values. Socialism, on the other hand, is a system that seeks to eliminate capitalism altogether.

Green’s book is a call to action for Americans to support social democracy. He argues that the United States is in a period of extreme polarization, and that social democracy is a way to bring people together and address the many problems facing the country.

He also notes that the United States has one of the lowest levels of social safety nets in the world, with many Americans只能 survive on poverty assistance.

Green’s book, “The Battle for Social Democracy,” is a call to action for Americans to support social democracy. He argues that the United States is in a period of extreme polarization, and that social democracy is a way to bring people together and address the many problems facing the country.

Green notes that social democracy is not a perfect system, but that it is a better system than capitalism. He argues that social democracy is a system that seeks to address the needs of its citizens while also preserving capitalist values. Socialism, on the other hand, is a system that seeks to eliminate capitalism altogether.

Green’s book is a call to action for Americans to support social democracy. He argues that the United States is in a period of extreme polarization, and that social democracy is a way to bring people together and address the many problems facing the country.

There is a growing movement for social democracy in the U.S.?: Jeffrey Green

By M.A. Saki

TEHRAN – A professor at the University of North Carolina, Jeffrey Green is a leading voice in the United States on issues related to social democracy. He argues that the current political climate in the United States is ripe for a revival of social democracy.

“Socialism has long been opposed by the American political establishment because of its association with totalitarianism, its relation of entrenched individualist and capitalistic values, and its role in robbing the working-class and poor of political power,” Green writes. “But social democracy is not the same as socialism. The social democracies in Northern Europe (e.g., the Scandinavian countries, Finland, the Netherlands, Belgium, etc.) are hardly anti-capitalist, since they manage to provide much more robust social security, education, and even health care to their citizens. In the United States, the opposite is true.”

Green notes that the social democracies have managed to maintain high levels of social welfare while also preserving strong capitalist values. He argues that the United States could learn a lot from these countries, particularly in the area of health care.

He also notes that social democracy is often conflated with socialism in the United States, which he says is a mistake. Social democracy is a system that seeks to address the needs of its citizens while also preserving capitalist values. Socialism, on the other hand, is a system that seeks to eliminate capitalism altogether.

Green argues that the United States is in need of a social democratic system to address its many problems. He notes that the United States has one of the highest levels of income inequality in the world, and that many Americans are struggling to make ends meet. He also notes that the United States has one of the lowest levels of social safety nets in the world, with many Americans只能 survive on poverty assistance.

Green’s book, “The Battle for Social Democracy,” is a call to action for Americans to support social democracy. He argues that the United States is in a period of extreme polarization, and that social democracy is a way to bring people together and address the many problems facing the country.

Green notes that social democracy is not a perfect system, but that it is a better system than capitalism. Iranian, Russian museums ink MOU to boost partnership

The signing of the agreement, which emphasizes a waiver of visas for tourist groups, was due to the good relations between the two countries as well as the interest of Russians in visiting Iran as well as the existing capacity in the country for cultural and tourism history, he noted during the signing ceremony.

He also expressed hope that the signing of the joint action plan, as well as the process of increasing vaccination and overcoming the coronavirus would result in a growth of tourism between Iran and Russia.

In 2017, Iranian President Hassan Rouhani and his Russian counterpart Vladimir Putin linked a visa-free agreement for tourist groups.

A joint technical committee has been developing an action plan for the previously agreed visa-free travel arrangements since then, to put the agreement into effect.

In a joint statement Iran and Russia have agreed to visa-free travel for up to 15 days.

Boston. Modern scholars have suggested that Anahita was the goddess of fertility and abundance and she was associated with the arts, agriculture, and crafts.

According to Perrone his embassy is highly responsible for developing an action plan for the previously agreed visa-free travel arrangements since then, to put the agreement into effect.

Temple of Anahita in western Iran undergoes restoration

The Anahita Temple is the name of one of two ar
ditional garden of Falahat

Anahita, also known as Anahita, and Anahit, was an ancient Iranian goddess of royalty, water, and fertility; she is particularly associated with the sea.

Possibly of Mesopotamian origin, her cult was made prominent by Artemis II Mnemon, and statues and temples were set up in her honor throughout the Persian empire.

A common cult of the peoples of the empire at that time, it persisted in Asia Minor long afterward.

In the Avesta she is called Ruta Anahita ("Damp, Strong, Untainted"); this seems to be an amalgam of two originally separate deities, according to Britannica.

In Greece, Anahita was identified with Athena and Artemis. She is also represented in Darabgird and Taq-e Bostan. Modern scholars have suggested that Anahita was also identified as water temples. However, not every aquat

Kashan is a historical city near Isfahan in the central part of Iran. Its history dates back to over ten thousand years ago, and it is home to some of the most beautiful buildings featuring Islamic architecture.

Many travelersOpt to pass Kashan on their journeys between Tehran, Isfahan, Shiraz, and Yazd, because this delightful oasis city on the edge of the Dasht-e Kavir, is one of Iran’s most alluring destinations.

Kashan is described as an oasis of architectural wonders, an atmospheric-covered bazaar, and a UNESCO-recognized garden, but it also offers some of central Iran’s best traditional hotels.

The ancient land embraces hundreds of historical sites such as ba-

Diagnostic tests conducted 21,065,451

Doses of vaccine injected 4,987,963

SOCIETY

The new representative of the WHO met Foreign Minister Mohammad Javad Zarif on Tuesday to present his credentials at the beginning of his mission in Iran, IRNA reported. Prior to his appointment as the country’s representative, he was the head of the World Health Organization’s Eastern Mediterranean Regional Office from June 1, 2018 to March 31, 2021.

Hussain was educated in the University of Pennsylvania, Pakistan and the University of Leeds. He holds a Master and Doctorate in Public Health. Since 2017, he has been a member of various national and international organizations including UNHCR, UNICEF and the WHO country office.

He has vast experience in health promotion policy development, multisectoral programs, education and Convention in the Rights of Persons with Disabilities.

Fakhra vaccine begins second human trial

The vaccine of people with underlying diseases will be completed by late July, and the whole population will be vaccinated by late November.

To vaccinate people with underlying diseases, about 24,45 million doses of vaccine is required, while so far, 360,000 doses of foreign and domestic vaccines have been provided.

He expressed hope to start vaccination of the whole population by the end of the summer (September 23), noting that the country’s need of vaccine administration, vaccinating 85 million people in 24 hours, the entire population can receive the vaccine within three to four months.

Homegrown vaccines

COVID-19 vaccine is being developed by the Razi Vaccine and Serum Research Institute (Razi Cov Pars) and the vaccine trial was administered among the population in early August, which started the clinical trial on February 27, entered the second phase of the human trial on Friday.

"Devi-19", the fourth domestic vaccine produced by Ovast Pharmaceutical Company is also undergoing human trials, which will also be available in early September.

A Persian painting created by Kamalad-din Abd-Allah in 1858 for the history of Kerman and its Landlords in Persian painting, but it was above all the far-reaching influence of Islamic mysticism and Sufism that raised the popularity of Joseph (AS) as a subject in manuscript illustrations.

The story of Joseph has been used as a model in different periods of Islamic history. The book translated by Hassan Rezai-Sadr presents the story of Joseph’s life in a vivid and captivating manner. The book is an accurate and detailed account of Joseph’s life, highlighting his characters, soldiers and civilians who played a significant role in maintaining the world’s enduring presence of the United States and its allies in the Middle East. The story is enriched with real-life events and quotes from the Islamic texts of the day, which gives readers a better understanding of Joseph’s life and times.

Joseph’s birthplace, Egypt, is a key feature in the book, which highlights the historical and cultural significance of the region. The story of Joseph also emphasizes the importance of education and the role of learning in society.

In summary, the book is an invaluable resource for readers interested in understanding the life and times of one of the most famous figures in Islamic history. It provides a comprehensive overview of Joseph’s life, highlighting the events that shaped his character and his influence on society. The book is an excellent addition to any collection interested in the history of Islam and the role of education in society.
