**TEHRAN** – With the Iranian New Year rolling around in a few days, the Tehran Times builds on its nascent tradition of introducing Man of the Year at the end of the current Iranian calendar year, which ends on March 20, 2022.

The Tehran Times’s 1400 Man of the Year is Seyed Hassan Nasrallah, the Secretary-General of the Lebanese Hezbollah. This year’s choice may seem a little bit unusual considering the relatively calm situation of Lebanon over the last 12 months. But beneath this apparent serenity lies the important leadership style Nasrallah exhibited in steering the resistance movement and Lebanon in general through multi-faceted crises.

Over the last 12 months, a new government was successfully formed in Lebanon with the active participation of the resistance factions. Perhaps, government formation was the biggest political event in Lebanon in 2021. It broke a year-long deadlock that was about to end up in chaos and disorder in the Mediterranean country. But with the leadership of Nasrallah, Lebanese factions successfully managed to agree on another consensual government at a time when the country was facing dire malaises on every level.

**Zubekistan welcomes Iran’s experience in biotech, AI**

TEHRAN – Uzbekistan is eager to use Iran’s experience to meet its technological needs in the fields of biotech, agriculture, artificial intelligence, and drought management, Minister of Innovative Development of Zubekistan, Abdukhakim Abdurahmonov, has said.

He made the remarks in a meeting with the Iranian vice president for science and technology, Soureni Sattari, in Tehran on Tuesday.

Abdurahmonov expressed interest in using Iran’s experience in creating technology and innovation ecosystems, especially in areas such as agriculture, biotechnology, artificial intelligence and etc.

“With the help of Iran, we want to provide an ecosystem of innovation and technology for the job creation and employment of youth. Defining joint technology projects between the two countries will help achieve this goal and put us on the path to development,” he further noted.

**Ali Sadr Cave open to public during Noruz**

TEHRAN – Ali Sadr water cave in the west-central province of Hamedan will be open during Noruz (Iranian new year holidays, starting March 20) after almost two years of closure due to coronavirus.

“Due to the outbreak of the coronavirus, Ali Sadr Cave has been closed for two years, however, it will reopen to tourists and Noruz trippers next week,” Hamedan Governor Alireza Qasemi-Farzad has said on Wednesday.

Visitors who have received the second dose of the COVID vaccine are allowed to explore the cave, as long as they follow strict health protocols and social distancing rules, ISNA quoted Qasemi-Farzad as saying.

Creating jobs, wealth, and added value through tourism is one of the province’s main priorities, the official added.

**JoEC inks deal with foreign firm to develop 2nd phase of SP oil layer**

TEHRAN – JoFarsan Offshore Engineering and Construction Company (JoEC) has inked a deal with a renowned foreign company to cooperate in implementing the second phase of the South Pars Oil Layer’s development project, Shana reported.

The $500-million deal, prepared based on the Oi Ministry’s new model of upstream contracts, was signed on Tuesday in a ceremony attended by senior officials including Oi Minister Javad Oji and Head of National Iranian Oi Company (NIOC) Mostafa Kheyateh-Mehr.

The Oil Ministry has not revealed any details about the foreign contractor.

Under the framework of the development contract, which has been finalized for a 20-year period, the contractor is obliged to provide all the necessary financial resources to implement the project, including direct capital costs, indirect costs, and operating costs.

Based on the deal, the project description includes upgrading and modifying the existing processing vessel and platform, overhauling existing wells, digging new wells including production and water injection and assessment wells, construction of oil discharge and loading system, and strengthening the existing water injection system.

During the implementation of this contract, while updating the reservoir models using new data analysis, new wells will be drilled using horizontal drilling technology and also, a new unloading and loading system will replace the existing one.

**End of dream, return of history**

By Sarah Khan

Russian military assault on Ukraine is debilitating blow to American-led Liberal Leage and final nail in the coffin of End of History delusions. Western security analysts are now warning that what led to this preventable catastrophe?

Blinded by oriental stereotypes, Putin is being condemned for his “expansionist designs’’ and macho politics. In its bloodthirsty eagerness to portray Russia as devil empire, U.S. Republican senator Lindsey Graham even openly suggested an assassination of Russian president. The latest comments, coming from Brussel, who was involved in assassinating Roman emperor Julius Caesar. Mark B Smith in The Russia Anxiety explains this contempt by stating that Russia Anxiety is a cycle, and disregarding any form of aggression is what led to this preventable catastrophe?

---

**Yemen on brink of “seismic hunger crisis”**

TEHRAN: The United Nations World Food Program (WFP) has issued a new stark warning over the humanitarian crisis in Yemen.

The WFP has issued a new stark warning over the humanitarian crisis in Yemen. But with the leadership of Nasrallah, Yemeni factions successfully managed to agree on another consensual government at a time when the country was facing dire malaises on every level.

---

**Report**

Dealing with the global crisis, Yemen will be in need of immediate funds, hungry people will lose assistance right at the time they need it most.”

**Just keep going girls**

By Masoud Hossein

TEHRAN – Not so long ago, the Iranian women’s team were a footbalising minnow but today, they can win title in the international event.

In the CAF/IFB Women’s Championship, the Iranian girls showed how strong they are.

Iran, headed by Maryam Amouzou, won the title in Dushahre, Tajikistan with three wins over Uzbekistan (1-0), Tajikistan (7-0) and Kyrgyz Republic (2-1).

What a wonderful result! Iranian women footballers have been beyond the expectations in the recent years.

In January, Iran took part in the AFC Women’s Asian Cup for the first time. It is a proud moment for them. They failed to book their place in the next stage but they found a path to success.

The Iranian men’s football and also volleyball teams are top of the ranking in the continent and the women can follow in the footsteps of them.

On Monday, Iran also advanced to the 2022 Women’s Junior World Handball Championship.

In 2018 Asian Games, the women’s kabaddi team won the title for the first time ever, beating giants India in the final match.

The Iranian sportswomen have a bright future ahead. The attention is all they need because of the leadership of Nasrallah, who has shown they are capable of achieving great things.

In November 2021, the Iranian women’s basketball team competed at the FIBA Women’s Asia Cup Division B. It was Iran’s international event after 47 years.

The changes have been made and it is time to change our outlook.

**Vienna talks nearing conclusion: IAEA chief**

President: Vienna talks nearing conclusion: IAEA chief

The international community now shows a “way forward” with the IAEA chief said.

The director general went on to say that Iran “should promptly agree on the Joint Comprehensive Plan of Action (JCPOA) is a multifaceted mechanism that imposes a set of constraints, including nuclear inspections, incentives, technical cooperation, and so on.”

Such collaborations, of course, take shape under the supervision of the various parties to the agreement, in order to work towards a good deal.

Iran, President of his country, said that the U.S. is serious, a good, and that the agreement with the support of all parties is possible.

Mr. Rogozin said that the United States is ready to return to the negotiating table as quickly as possible to resolve the remaining unresolved concerns through consultation with the parties, the United States, and the IAEA.

Mr. Rogozin also thanked the Chinese foreign minister and the Chinese government for its constructive role in the negotiations and the commitment of the Chinese government to support a good agreement.

The Vienna talks seek to push the U.S. to completely remove its “excessive demands” in order to reach an agreement and lift the sanctions.

The international community now shows a “way forward” with the IAEA chief said.

Minoru Ukiya, Russia’s permanent representative to the IAEA, said that the JCPOA is an important agreement that is crucial for the region and the world.

Minister Sergei Lavrov in Moscow on Tuesday.

Mr. Lavrov also said that the JCPOA is an important agreement that is crucial for the region and the world.

The chief Iranian diplomat said, “More than ever, Iran is determined to work towards a good agreement.”

Mr. Lavrov also said that the JCPOA is an important agreement that is crucial for the region and the world.

The European Union now shows a “way forward” with the IAEA chief said.

The E3, France, Russia, and Germany, are committed to maintaining the JCPOA as the only way to resolve the nuclear issue in the region.

The United States now shows a “way forward” with the IAEA chief said.

The U.S. is determined to work towards a good agreement and lift all anti-Iranian sanctions.

**Smart submarines delivered to IRGC naval forces**

The new submarines were delivered under a ceremony attended by top military officials, including Iran’s Defense Minister Maj. Gen. Mahdi Salami, in the southern port city of Bandar Abbas.

For the first time, the IRGC naval fleet was equipped with domestically developed smart submarines, which will significantly boost its capabilities in detecting and thwarting sub-surface threats.

The new submarines, which feature high maneuverability, can carry various weapons, and have been designed to work in close cooperation with the IRGC’s air and ground forces.

**Salami: Iran expresses gratitude to China for its constructive role in the negotiations.**

The Iranian player completely outclasses Indian Shishir Singh with a score of 5-1 to win the title. With this win, Amir managed to avenge his loss in the finals last year.

The tournament was held at Doha. Qatar.

The top players and best runners-up of the tournament included: Teshen and Persepolis coach Yahya Golshahmardi and Esteghel trainer Farhad Maghdudi.

The best players from each group qualified directly for the Round of 16 stage while the runners-up from the EPL and 2nd places of the group qualified for the Round of 24 stage.
IOEC inks deal with foreign firm to develop 2nd phase of SP oil layer

The head of Iran's Civil Aviation Organization (CAO), Mohammadreza Maleki-Bakhshi said the country has imported 10 passenger airplanes with an average age of 15 years over the past three months, Tasnim news agency reported. Speaking in a press conference on Wednesday, Maleki-Bakhshi announced that the CAO is negotiating with several countries to supply the equipment and parts needed by Iran's airlines. “Our negotiations for the supply of airplane parts are being pursued simultaneously with the negotiations for the revival of the nuclear deal,” the CAO head stressed.

The official noted that his company has a specific plan and strategy to solve the problems of the aviation industry in recent years, saying: “For the past 42 years, despite the country’s toughest sanctions, the aviation industry has survived.”

Despite the sanctions of the last four decades, we have provided the most services and have met the needs of airlines in repairing and supplying parts using domestic capacities,” he added. He further stated that currently seven ATR airplanes are active in Iran Air, which “the use of the Airbus A320 and ATR fleet are going through overhaul operations.

Iran raises April oil prices for Asian buyers

Iranian crude oil prices have been raised for the neighboring Asian market. Iranian oil prices were increased by $2.155 and $2.05 above the March prices, respectively.

According to the IRICA, the new prices for light, heavy and Forouzan crude grades for Asian buyers in April were set at $40.7385, $40.675 and $37 per barrel, respectively. It should be noted that the prices are only for the oil exported to the Persian Gulf, while Iran's other crude grades exported to the Indian Ocean are priced at $3.75 above the Oman / Dubai average prices.

The prices of light, heavy and Forouzan crude grades for sales in the mentioned month are also $2.5, $195 and $2.05 above the March prices, respectively.

Iran has priced its light, heavy, Forouzan and Soroush crude grades below the Brent prices in northwestern Europe, West Asia and South Africa.

TEHRAN – The Central Bank of Iran (CBI) plans to cooperate with the country’s Securities and Exchange Organization (SEO) to launch money market mutual funds in the next Iranian calendar year, which starts on March 20, the bank’s governor announced.

“One of the plans of the central bank and the securities and exchange organization for this year is to launch money market mutual funds that (CBI) can also use, so we hope to create them in the next year,” IRNA quoted Al-Salah-Abad as saying on Tuesday.

Salah-Abad made the remarks at the unveiling ceremony of SEO’s new capital market assessment and monitoring system in Tehran.

According to the minister, the installation of the system is the increase in the volume of stock transactions, and the emergence of new resources, which this market also results from monitoring and observation,” the official said, underlining the significant role of the mentioned system.

Emphasizing that such instruments will help develop and create a healthy environment in the capital market, Salah-Abad said: “Article 2 of the securities market law framework of the obligations and production licenses within the scope of activities of the ISIPO head had also highlighted. It should be noted that the applications must also meet the technological needs of the capital market and solve some economic consequences in the long run, he stressed.

The ISIPO head had also announced that 1557 stagnant and inactive industrial units have been revived in the industrial parks and zones of the country in the current Iranian calendar year.

According to CBI, the number of 1950 industrial units have been revived in the industrial parks and zones of the country in the current Iranian calendar year.

Al-Rasouli said the number of idle units is decreasing.

Referring to the high demand for investment in industrial parks and zones he said: “Given that the investment is a vital tool in this filed, we seek to provide investment opportunities to the companies so that the capabilities of these companies and their effect on the country will be developed.”

Of course, the important point is that the applicants must also complete the construction, install the machinery, obtain the operation and production licenses within the framework of the obligations and conditions in the land use right contract, he added.

The official said it is necessary to check the applicability of industrial units that have been revived in the industrial parks and zones of the country.

According to Al-Rasouli, the number of idle industrial units in the last three years has reached 1,200 units by the end of the current year.

If the project's first phase is completed and the second market's index gains 16,000 points by the end of this year, the project's second phase will be implemented.

TEHRAN – The head of Iran's Civil Aviation Organization (CAO), Mohammadreza Maleki-Bakhshi said the country has imported 10 passenger airplanes with an average age of 15 years over the past three months, Tasnim news agency reported. Speaking in a press conference on Wednesday, Maleki-Bakhshi announced that the CAO is negotiating with several countries to supply the equipment and parts needed by Iran's airlines. “Our negotiations for the supply of airplane parts are being pursued simultaneously with the negotiations for the revival of the nuclear deal,” the CAO head stressed.

The official noted that his company has a specific plan and strategy to solve the problems of the aviation industry in recent years, saying: “For the past 42 years, despite the country’s toughest sanctions, the aviation industry has survived.”

Despite the sanctions of the last four decades, we have provided the most services and have met the needs of airlines in repairing and supplying parts using domestic capacities,” he added. He further stated that currently seven ATR airplanes are active in Iran Air, which “the use of the Airbus A320 and ATR fleet are going through overhaul operations.

Normally about 25 percent of an airline's airplanes should go through maintenance in every six months.

Having the oldest airline in West Asia and second oldest in Asia, Iran started developing its aviation industry nearly 80 years ago and this industry is still improving in the country.

Developing this industry would have major positive outcomes for the country's economy, in addition to creating new job opportunities for people, it will increase the air traffic while creating a driving demand for parts that would impact all other economic areas like industry, agriculture, tourism, trade, etc. The Iranian Atmospheric Science and Meteorological Research Center was established in 1989 with the aim of meeting the scientific needs of the country in the related areas.

Iranian oil prices have been raised for the相邻的亚洲市场。伊朗原油价格在4月份被上调了2.155美元和2.05美元，分别以上述3月份的价格为基点。根据IRICA的数据，4月份的轻质、重质和法鲁赞原油价格分别为每桶40.7385美元、40.675美元和37美元，分别高于3月份的价格2.5美元、195美元和2.05美元。

根据IRICA和工业、矿业和贸易部的报告，由于对船运业务的制裁和限制，伊朗已经对其原油价格进行了上调。

哈桑·贾希安，伊朗领导的国家路易斯和航空公司的项目负责人，表示：“从今年年初到10月的不上升的月，每年的出口量均有所下降，这是为了确保人们能够投资在这些被制裁的行业中。”

他还指出，85%的上升比例在运输和航空服务业使用中最高，但由于伊朗的核问题，该行业没有得到发展。

根据IRICA和工业、矿业和贸易部的报告，对于核问题，伊朗已经与相关国家达成了协议。
End of dream, return of history

In order to understand the Ukrainian quagmire, let’s delve into history After disintegration of the USSR, categorically clear that former Soviet states were exposed to Western hypocrisy when they were interfering in Ukraine’s borders. The scene was remarkable. A Russian diplomat talked about the “responsibility of the United States and the European Union for the situation in Ukraine”. He said that the US and EU had a “special interest” in the situation in Ukraine, and they were “fully aware” of the consequences of their actions.

NATO announced that Georgia and Ukraine would be invited to join the alliance. The US-led NATO military alliance was preparing for a new round of aggressive actions against Russia. The US and EU were preparing to impose new economic sanctions against Russia, which would further escalate the situation in Ukraine.

The Russian foreign minister told the RBK newspaper that the situation in Ukraine was “a tragic event that has undermined the principle of ‘spheres of influence’ and 2008 Bucharest declaration exposed Western hypocrisy when NATO announced that Georgia and Ukraine would be invited to join the alliance”. The US and EU were preparing to impose new economic sanctions against Russia, which would further escalate the situation in Ukraine.

TEHRAN – Up to five million travelers are estimated to visit the southern province of Hormozgan, the province’s governor has announced.

“There will be a lot of travelers in the province over the upcoming holidays, roughly three to five million people, and in this respect, there should be an increased monitoring process,” IRNA quoted Mohdi Dusti as saying on Tuesday.

The province needs to prepare its tourism facilities to welcome tourists and travelers, the official added.

Known as the province of islands, Hormozgan province is located on the northern coasts of the Persian Gulf. It embraces scenic islands among which Koh Hormuz, Hengam, and Qeshm are the most beautiful ones and top tourist destinations in southern Iran.

Over the past couple of decades, the coral Koh Island has become a beach resort where tourists can swim, shop, and sample a laid-back and relatively liberated local lifestyle. It is home to free-trade-zone status, with overgrown hotels, shopping centers, apartment blocks, and retail complexes.

Hormuz, which is mostly barren and hilly, is situated some eight kilometers off the coast of the Strait of Hormuz, which attracts many tourists by its colorful mountains, sand seas, and natural caves.

Hengam Island has scenery rocky shores, serene sunset, and kind natives, which can attract travelers who enjoy a relaxing trip by spending time on this tranquil island.

Qeshm Island is a heaven for eco-tourists as it embraces wide-ranging attractions such as the Hara marine forests and about 60 villages dotted mostly across the rocky coasts. The island also features geologically eye-catching canyons, hills, valleys, and caves, most of which are protected as part of the UNESCO-registered Qeshm Island Geopark, itself a haven for nature-lovers.

Wide-ranging handicrafts

With 14 entries, Iran ranks first globally for the number of cities and villages registered by the World Crafts Council, as China with seven entries, Dilie with four, and India with three ones come next.

In January 2020, the cities of Shiraz, Malayer, and Zaranj and the village of Qalab in the western province of West Azerbaijan were announced.

A budget of 300 billion rials will be used to create 30 job opportunities, according to the Tourism Office, and the government’s Cultural Heritage, Tourism and Handicrafts Welfare Organization, responsible for the production of handicrafts, will also play a role.

The developing health tourism industry is one of the most important fields of Iran’s travel sector, which is trying to provide it with its capabilities and capacities in attracting medical and health tourists to the country.

Many domestic experts believe that medical tourism in Iran is a win–win opportunity both for the Iranian people and the tourists. According to the research by the Department of Tourism of the Ministry of Health, tourism will be inaugurated in the near future as a center dedicated to medical tourism.

In the third phase of a center dedicated to medical tourism, the travel agencies will be trained.

The Islamic Republic has set its medical tourism revenue at around 2 million dollars over the Iranian calendar year 1404 (March 25-March 2026).

Iranian hospitals admitted nearly 70,000 foreign patients over the Iranian calendar year 1399 (March 2020 – February 2019). Mehr reported the country’s handicrafts export slumped during the mentioned months in comparison to the figure of the previous year, due to the damage the coronavirus pandemic has inflicted on global trade.

The Islamic Republic export 31 million worth of handicrafts during the first eleven months of the calendar year 1398 (March 2019 – February 2020), according to the figure, some $190 million was earned via suitcase trade. (allowed for customs-free and tax-free transfer) through 20 provinces, according to data compiled by the Ministry of Cultural Heritage, Tourism and Handicrafts Welfare Organization, responsible for the production of handicrafts, as well as personal ornaments that travelers can carry back home, which are traditionally exported to Iraq, Afghanistan, Germany, the U.S., the UK, and other countries.

Dolat Gas Station Museum

Dolat Gas Station Museum opened in Tehran as a gas station till the 1990s, after the Islamic Revolution of 1979. The museum houses some 500 historic objects, all of which are registered on the national heritage list and date back 50 to 100 years.

The highlights are two industrial treasures of the 1955 Leyland petrol tanker and a 1921 Satam gas pump.

Leyland was a British automotive engineering company that, while Satam was a French company supplying greeting solutions to the oil and gas industry.

During the 1940s, fourteen gas stations were built in Tehran with the assistance of a British company, of which only the Darvazeh Dolat Gas Station Museum and Station No. 4 still exist. Other gas stations have slowly crumbled and reappeared.

TEHRAN - Five million Noruz trippe...
TEHRAN –Some 915 nanoproducts have been established based on domestic technologies, as it moved 26 levels higher according to the Scimago’s ranking database.

Based on a report Nanotechnology Development Office of TEHRAN – Vice President for Women and Family Affairs Enshir Khazraei, in a meeting on Tuesday with Turkish Minister of Family and Social Services Derya Yanik, discussed joint cooperation in the field of women.

The two officials met on the sidelines of the 66th session of the Commission on the Status of Women (CSW66) being held in New York from March 1 to 25.

Explaining the scientific and social advances of Iranian women, Khazraei pointed to winning gold medals as an achievement of Iranian women in various fields, over the current year (ending March 20), the total sale of Iranian nanoproducts has been equal to 175 trillion rials (nearly $4.254 million).

Iran’s technology and innovation ecosystem is designed based on the native unique climate characteristics. Iran faces a wide variety of climates and its innovation and entrepreneurial ecosystem is completely indigenous and defined based on domestic needs, according to the basin ( theorem).

The agricultural industry is one of the most difficult industries for technology and innovation, due to the complexity of the plants, the type of plants, the type of the natural environment and various factors.

The agricultural industry is one of the most difficult industries for technology and innovation, which is one of the most important priorities is to benefit from the experience of the countries in their agricultural products in saline lands.

Sattari also expressed Iran’s readiness to provide indigenous and investment models of scientific development to Uzbekistan, especially in its priority areas such as agriculture, salinity, biotechnology, agricultural information systems.

Abulqasem Ferdowsi: Life

Part 5

On the other hand, the intellectual status of the Shahnameh is high, as is apparent from the way it is treated with a great poet but with someone who judges the work as beyond the reach of normal understanding, and this would not have been possible if he had not been in possession of a knowledge of its contents.

However, Nöldke thought that Ferdowsi had not received formal education in the sciences of his time and that he was probably a person especially in scholastic theology, but considered him simply to be a reasonably educated person in such matters.

Nöldke also believed that Ferdowsi did not know Pahlavi. Taqizadegan and Shirani, on the other hand, believed that Ferdowsi knew Pahlavi, and were of the opinion that he knew the entire Pahlavi language, being conversant with the sciences of his own time.

But Ferdowsi was no scholar in Pahlavi. Nöldeke was the first to realize that Ferdowsi had no knowledge of Pahlavi, and this belief was confirmed by the contents of his own works.

In a later article on Ferdowsi, Nöldke following Taqizadegan, wrote that he had no knowledge of the secular knowledge of Pahlavi other than the knowledge of the Shahnameh, which Ferdowsi considered his own work to be the only true Islamic one.

The explanation for this contradiction, in the present writer's opinion, lies in the fact that with the first centurys of Islam in Persia, Persian would have been in hand in the national struggle. In Khurasan, or very nearly so, that the caliphate in Baghdad and its political supporters in Persia never made any serious distinction between the two (i.e., Zoroastrianism, Zoroastri, i.e., adherents of Islaem, and Reza). (Shishavan in general).

Ferdowsi was, as Nöldke noticed, above all a religious poet, and on all occasions he kept faith with his faith. Ferdowsi attacks philosophy for its theories and for its inability to create the reality of the Creator, believing that God can be found either by the eye of wisdom, or of reason, or of mysticism, or of force and might, and are confused only by the existence of the demonstrable facts which the wise and the just play a subtle role in the workings of the world.

According to his beliefs, every good or evil, every beauty or ugliness, every goodness or evil, and every kind of belief in the beaten or evil, the influence of the stars or the influence of the stars is in the destruction of the natural, true, and honest life.

This absolute faith in the urinity and in God, is disturbed in the Shahnameh by a fatalism which is only able to express a passive sense of destiny. The hero of the Shahnameh is a man who has lost his close friends in an air attack in an air attack, and who has lost his love for ever. Therefore, for his remains in a big river while a White Whale is the only sign that he has not yet passed away.
